GARDEN ANNUAL

1908

J. ROSCOE FULLER & CO.
SEEDSMEN & FLORISTS,
FLORAL PARK, NEW YORK.

6 Rose Novelties for 1908

(Illustrated on Front Cover)

No. 1. Killarney. Siebrecht, the great Fifth Avenue (New York) florist, claims that this is the finest pink Rose ever introduced. He used it almost exclusively during the past year for the great society decorations of New York. In coloring it is especially beautiful, being an exquisite shade of deep shell-pink, while the flowers are enormous in size, the petals being frequently two and one-half inches across. **Strong Plants, 20c. each; 3 for 50c.; 7 for \$1.00.**

No. 2. La Detroit. The new Detroit Rose which has been so largely advertised and exhibited. Shell-pink, shading to soft rose, reverse of petals cream-colored, fragrant like that of old Bon Silene. In form it is large, cup shaped; petals shell like; rich, glossy foliage; a rampant, vigorous grower, making fine plants and is excellent for cutting. **Strong plants, 15c. each; 4 for 50c.; 9 for \$1.00.**

No. 3. Sunrise. The new forcing rose—Sunrise has taken first honors wherever shown, and this year will be grown quite extensively for cut flower work. In close bud form it shows a deep copper pink, but as the flower opens the inner side of the petals shades from a clear yellow to a deep copper, making a very pretty color effect. The young foliage comes a copper bronze, and as it grows older changes to a deep green. This Rose has a good future, having been thoroughly tested, and all the qualities that make a good Rose are in the "Sunrise." **Strong plants, 15c each; 4 for 50c.; 9 for \$1.00.**

No. 4. Ivory. This is a most valuable addition for cut flower purposes. A "sport" from the fine old variety Golden Gate, which to-day is probably the freest flowering Rose of its type in cultivation. Ivory embodies all the good points of its parent, size, freedom of bloom, strong, vigorous, healthy growth with a pure white color, which makes it a valuable acquisition to the list of forcing Roses. It has received highest honors wherever shown. Price, **15c. each; 4 for 50c.; 9 for \$1.00.**

No. 5. Richmond. It is our good fortune to have a fine stock of this grand Rose, which took the gold prize at the World's Fair at St. Louis for the best Rose exhibited. There were hundreds of competitors for these great honors, and it at once stamps this Rose as a wonder, for the judges did not hesitate one moment in awarding it first prize and a gold medal. In color it is a deep, rich, velvety crimson, both buds and flower are extra fine. **Strong plants, 20c. each; 3 for 50c.; 7 for \$1.00.**

No. 6. Baby Rambler. It is identical in every way with that wonderful Rose, Crimson Rambler, except it is a dwarf, bushy grower and is a true ever-bloomer. It is in bloom all the time, flowers in large clusters, brightest crimson. It grows to a height of 18 inches and hides the plant with its bloom. **Strong plants, 15c. each; 4 for 50c.; 9 for \$1.00.** Two year old plants, 35c.

Our special offer, one each of the above six new Roses for 75c., postpaid.

THE FINEST LIST OF ROSES

THE THREE BEST RAMBLERS

New Rambler Rose "Lady Gay"

The introducers say "this Rose is far superior to crimson Rambler" of which it is a seedling and which it closely resembles in habit of bloom and vigor of growth. The flowers (in large loose clusters) are of a delicate cherry pink color, fading to soft tinted white. The effect of a plant in full bloom with the combination of soft white flowers, cherry pink buds and deep green of the foliage is indeed charming. It is perfectly hardy and unsurpassed for climbing work. **20c. each; 3 for 50c.**

Crimson Rambler Rose

Intense, Dazzling Crimson

Undoubtedly the best known, most popular and widely planted climbing Rose in existence. It is extraordinarily fine in many ways. It is of rapid growth, attaining to a height of 15 feet in a season; is perfectly hardy and flowers in trusses 9 inches long and 7 inches broad all over the bush. Will thrive in every part of the United States and should be in every collection. **15c. each; 4 for 50c. 2 year old, 30c.**

Yellow Rambler. The flowers are borne in immense clusters, after the same manner as the Crimson Rambler, often as many as 150 blossoms in a bunch, and the trusses have the same handsome pyramidal shape as those of the Crimson Rambler. The color is a decided yellow. **15c. each; 4 for 50c.**

One each of the Three Ramblers, 40c.

Polyantha or Baby Roses

Clotilde Souperf. Produces great clusters of ivory white flowers with pink center.

Mignonette. Very double and delightfully fragrant, color clear pink.

Perle d'Or. Coppery-gold, changing to fawn.

Miniatuine. The smallest of all baby roses, color light pink flushed with red.

Everblooming Roses

Bessie Brown. Very large, full and double. Color creamy white. Received eight prizes.

Bridesmaid. Flowers very large and perfect form. Beautiful shell pink.

Bon Silene. Color deep cherry red. Noted for its size of buds and fragrance.

Enchantress. Blooms in large clusters. Unsurpassed for late fall and winter blooming. Color creamy white with blushing center.

Golden Gate. Flowers very large and beautifully pointed. Color white tinged with golden yellow.

Helen Gould. The largest and freest hybrid Tea Rose in existence. Color bright red.

La France. An old favorite that needs no introduction. Silver pink.

Madame Margottin. Large full flowers. Rich coppery yellow.

Marie Guillot. The queen of all white roses. Flowers extra large and wonderfully double.

Maman Cochet. The best of all pink roses. Blooms very quickly and freely.

The Queen. A very large, pure white, free-blooming rose.

The Bride. (The Sweet Rose.) For open ground this variety cannot be surpassed. White, tinged with pink.

Hybrid Perpetual Roses. (Hardy)

Anna De Diesbach. Rich, dazzling crimson.

Coquette de Blanches. Very double, snow white and blooms in large clusters.

General Jacqueminot. Intense velvety scarlet.

Magna Charta. Rosy pink, flushed crimson.

Paul Neyron. Largest rose known, immense double flowers of carmine pink.

Prince Camille de Rohan. The very darkest red rose known.

Prices of Roses except where noted, 10c.; 12 for \$1.00.

FLORAL PARK, NEW YORK, January 1st, 1908.

To our Friends and Customers:—

Again we have the pleasure of greeting our numerous friends and customers through the medium of our Catalogue. It is nearly 30 years since the business was established, and in that time we have endeavored to procure, and grow, only the **BEST SEEDS** and **BULBS**. Years of experience have taught us many things and we are only too pleased to give our numerous customers the benefit of that experience.

Success depends to a large extent on the quality of seeds sown. Time is too precious to waste on inferior or cheap seeds. We are prepared this season to give our customers the best seed they ever had and to fill all orders promptly and well. We hope to have a continuance of your generous patronage and solicit orders from those into whose hands this Catalogue may fall.

The best assurance we can give prospective buyers of the superiority of our seed is to refer them to the thousands of satisfied purchasers of Fuller's seeds all over the world. We assure them, also, that no concern is more careful about all the details of filling orders, and that we give all orders, large or small, just as satisfactory service as lies in our power.

Feeling sure if you give us an order you will be more than pleased, and thanking our numerous customers for their generous patronage, we are,

Yours very truly,

J. ROSCOE FULLER & CO

IMPORTANT SUGGESTIONS By carefully observing the following Rules and Directions, Mistakes and Misunderstandings will be very largely avoided.

ORDER EARLY It will greatly facilitate shipments if orders are sent in early. We aim to send off all orders the same or next day after receipt but during the busy season it is nearly impossible—hence the advisability of ordering early.

ERRORS We exercise the utmost care in filling orders, striving to do a little more than we offer, yet in the press of business, errors sometimes occur, in which event we wish to be promptly notified of the fact and will make such corrections as will be satisfactory. Please keep copies of all your orders for comparison.

Send Money **Cash should always accompany the order.** Remittance may be made at our risk by any of the following methods: (1st and best)—**Post-Office Order on Floral Park;** (2d)—**Draft on New York;** (3d) **Express Co. Money Order;** (4th) **Registered Letter.** When money cannot be sent by either of the first three methods, it may be enclosed in a Registered Letter. The rates charged for Post Office Orders and Express Money Orders are now so low that this is the best way to remit where they can be obtained. We will bear expenses of sending money in either of above ways when order amounts to \$1.00 or over.

We will not be responsible for coin sent in ordinary letters, or for postage stamps.

Free by Mail or Express.—We send Seeds, Bulbs and Plants **FREE BY MAIL** at the prices named in this Catalogue. This brings them to the very doors of our customers without trouble or expense. To points where the large express companies touch, we can send some orders as cheaply by express as by mail. In such cases we send by express, prepaid, and notify the purchaser to that effect.

By Express.—If a package is ordered to go by express, we do not pay the charges; but larger Plants, Shrubs and Fruits can be sent in this way, and we always add extra ones to partly or wholly pay the cost. All the large express companies carry our goods at very low rates.

PREMIUM—15 per cent. additional (you may select 15 per cent. extra) will be allowed on all orders amounting to \$1.00 or more. This discount does not apply on special offers, bargain offers or collections.

SPECIAL NOTICE TO OUR CANADIAN CUSTOMERS:—Owing to the postage being double for Canadian orders we cannot allow discounts. All goods quoted at net prices.

OUR COVER SUBJECTS FOR 1908.

We show in colors on the cover of this catalogue the following:

FRONT COVER—6 Beautiful Roses which we can recommend to our customers and feel sure they will give satisfaction. We advise those of our customers who have room for them to add these to their collection.

BACK COVER—Early Long Island Tomato, The May King Lettuce, Fuller's Giant Rhubarb, and the New Pineapple Flavored Strawberry.

These should be in every garden; we have tried them for a number of years and offer them, knowing they will give the best results.

Address all orders and communications to

Floral Park, N. Y.

Giant Comet Asters

Comet Asters. Large and beautiful flowers, free from the formal stiffness of Asters. The flowers average from 4 to 5 bunches across; composed of long, wavy, twisted petals, arranged into loose yet dense half-globes, resembling Japanese Chrysanthemums, and being borne on long stems gives them an added value when cut for vases. The plants are of luxuriant growth, 15 inches high. (See cut.)

Pure White	5c.
White Tinted Rose	5c.
White, passing to Light Blue	5c.
Violet, white center	5c.
Rosy Lilac	5c.
Finest mixed	5c.; $\frac{1}{8}$ oz. 25c.

One each of the above 6, 25c.

Victoria Asters. Probably the handsomest varieties, taken all in all, for size, color and profusion of bloom. The colors include many extremely delicate and some gorgeous shades; flowers very double and 4 inches across; from 20 to 40 on a plant; height, 15 to 18 inches.

Victoria, Finest Mixed. Contains many lovely colors, Pkt., 5c.

Aster Daybreak. This beautiful aster, which we introduced to the public, has proved itself worthy of the wide and very flattering reception it has met with everywhere. It is one of those rare gems that has come to stay; no private garden is complete without it; and for florists' use it is simply unsurpassed. The flowers are round as a ball, very large and full, on long stems; the color a charming seashell pink. The plant flowers very early, and is a continuous free bloomer, a compact, strong grower, and in all respects a desirable acquisition. Pkt., 5c.

Aster Purity. This new aster is the handmaid to our Daybreak, being identical with it in form and habit, but the blooms are pure white. A finer combination of color cannot well be imagined than the massing together of these two beauties, either in bouquet groups or for decorative design. The plant is an early and free bloomer, like its companion. Pkt., 5c.

Dwarf Queen. Large flowering; plants grow from 10 to 12 inches and branches are upright (not loose) in habit, making a dense, compact bush; excellent for pot culture as for bedding. Finest mixed, per Pkt., 5c.

TRUFFAUT'S PEONY-FLOWERED PERFECTION ASTER.

Truffaut's Peony-flowered. A valuable and standard variety. The most perfect Peony type known. Tall growing, and bearing an enormous quantity of extra large double flowers beautifully incurved and of every shade from pure white to glowing crimson. Thirty colors, finest mixed, Pkt., 5c.; $\frac{1}{8}$ oz. 25c.; $\frac{1}{4}$ oz. 40c.

Simple's Marvel. A new American Aster of wonderful beauty and profusion. Plants grow 20 inches high, branch freely in an upright manner, producing a great number of magnificent blossoms on long stems. The flowers are very double and perfect, and possess the richest colors. They bloom a little later than most kinds and escape the ravages of the Aster beetle. One of the good recent novelties. **Mixed Many Fine Colors, Per Pkt. 5c.**

New Japanese Giant Aster. Flowers immense size, measuring from 5 to 6 inches in diameter, with long petals curiously waved and curled so as to give them a striking resemblance to Japanese chrysanthemums. So far only two colors have been obtained—lovely pink and delicate flesh. **Two Colors, Mixed, Pkt., 5c.**

New Ostrich Feather Aster. The new Ostrich Feathery Asters are a new type, with long, wavy, twisted feathery petals, like the wavy beautiful feathers of the ostrich. They are a very valuable addition to the decorative class of Asters. Flowers frequently measure four inches across, on long, thin, wiry stems. **Price, Mixed Colors, 5c.**

New White Branching Giant Flowered. Flowers are pure white and very double; borne on long stems, making them excellent for cut flowers. The long petals are twisted and curled most gracefully. **Finest Mixed, 5c.**

New Yellow Aster. A Yellow Aster is at last at our disposal. It is a double flower in the form of a perfect ball; the quills are close together, and of the brightest sulphur-yellow. The flowers are borne upon long, erect stems, excellent for cutting. **Per Pkt., 5c.**

Tall Asters. Mixed Colors. Our own mixture, embracing many of the choice varieties described. **Pkt. 5c.; $\frac{1}{8}$ oz. 20c.; $\frac{1}{4}$ oz. 30c.**

Dwarf Mixed containing all the choicest varieties. **Per Pkt. 5c.; $\frac{1}{8}$ oz. 20c.; $\frac{1}{4}$ oz. 30c.**

A careful inspection of complete trials of all known varieties of Asters has enabled us to revise our lists with good judgment, and we now consider our collection one of the best and most complete offered, for growing in this country. Amateurs cannot do better than plant the entire list, which we will furnish, one packet of each variety, 18 in all, for **70c.**

AMARANTHUS

Our warm summers suit admirably the varieties of amaranthus cultivated for ornament. These are plants which are striking on account of their foliage or peculiar mode of bloom. In rich ground the plants and leaves are of large size, but the coloring is apt to be less bright. The seed can be sown in the house, in a hotbed, a cold frame, or in a seedbed in the garden, and the plants transplanted into place; or the seeds can be sown where the plants are to stand.

Atropurpureus. A fine variety with blood-red foliage and drooping racemes of flowers. 2 feet. Pkt., 5c.

Caudatus (Love Lies Bleeding). Long drooping "chains" of flowers. Pretty for decorative. 3 feet high. Pkt., 5c.

Tricolor (Joseph's Coat). Red, yellow and green foliage. 2 feet. Pkt., 5c.

ASPARAGUS SPRENGERI

Also called Emerald Feather and Abyssinian Parlor Fern. New. Perhaps the best new plant introduced in 10 years. Highly praised everywhere; handsomest seen drooping from a pot or basket. Sprays from 4 to 6 feet long, of fresh, green feathery foliage; useful for bouquets, wreaths or sprays, remaining perfect for weeks after cutting; grows freely the whole year round; extremely valuable for all purposes. Flowers white, followed by red berries. A plant that will please you. Pkt., 10c.

ALLEGHANY VINE

Mountain Fringe or Adlumia Cirrhosa. This is a hardy climbing plant, native of the Alleghany Mountains, very attractive and picturesque; dainty, feathery, pale-green foliage, flowers delicate rose, pink and white. 15 feet. Pkt., 5c.

ABRONIA

The abronias are trailing plants with prostrate branches, bearing clusters of sweet-scented flowers very much like verbenas. Fine for hanging basket. Mixed colors. Pkt., 5c.

St. Bridgid, or Poppy, Anemone

Nothing could be more glorious than a bed of these new Irish poppies when in flower. One might well compare it to a kaleidoscope picture, glistening with and reflecting thousands of bright colors, or to some bright Oriental carpet whereon the artist has exercised his ingenuity to blend pleasing and effective colors. Indeed, the flowers produced by this new strain show all the colors of the rainbow, and many more; for even black and white are found among them, as well as shades of pink, rose, crimson, fiery scarlet, carmine, maroon, tints of lilac, lavender, blue, purple, even green. Many flowers are curiously mottled, striped, edged, ringed and shaded with the various tints described above, the effect produced being almost bewildering. They are frequently 5 to 6 inches across; some single, but most double, with plain, scalloped or fringed edges. Sown early and planted in the garden in rich soil, they will bloom profusely and frequently until well after frosts have cut down all tender plants; and being perfectly hardy, they will bloom again the next season in greater profusion than ever, and continue to do so for years to come, becoming more handsome each year. Pkt., 10c.

HARDY ALPINE ASTERS

Sow the seed early, and they will bloom profusely during the entire fall, and make plants that will bear hundreds and hundreds of flowers year after year; they are perfectly hardy. The flowers are large and very bright and beautiful; many are deep blue with yellow center. This is a very superior mixture, and contains at least 50 different kinds. Pkt., 5c.

Dear Sir:—I received the balance of my order yesterday in very good condition for which I thank you. I am more than pleased and must tell you it is a great pleasure to do business with you. J. A. LAPORTE, Canada.

ALYSSUM

The sweet alyssum is one of the most fragrant and useful of all annuals, and blooms very quickly from seed.

Tom Thumb. One of the finest plants for edgings, as it is exceedingly dwarf, not growing over 6 inches high, and covered all season with pure white flowers. **Pkt., 5c.**

Yellow. (New.) Perfectly hardy and will bloom first year, and will increase from year to year. **Pkt. 5c.**

Sweet Alyssum. The old-fashioned pure white. **Pkt., 5c.; $\frac{1}{4}$ oz., 10c.**

Alyssum, Mixed. All colors. **Pkt., 5c.; $\frac{1}{4}$ oz., 10c.**

Carpet of Snow. This is truly a "carpet of snow" plant, for the plants, which are only a few inches high, grow so dense, and are so completely covered with snow-white blossoms they create the impression of a beautiful carpet spread over the ground. We know of no other white flower which is so particularly well adapted to borders, ribbons, etc., as our "Carpet of Snow" Alyssum. The plants commence to bloom when quite small, and will flower uninterruptedly all summer long till late in the fall. Added to all this is the sweet fragrance, and we cannot see how a garden could be complete without it. **Pkt., 5c.; $\frac{1}{4}$ oz., 15c.; $\frac{1}{2}$ oz., 25c.; oz., 40c.**

Ageratum

**ABUTILON or FLOWERING MAPLE**

As indispensable for the window or greenhouse as the petunia is for the flower garden. Will stand more abuse and neglect than almost any other plant. Grows rapidly from seed and is soon in bloom. Leaves are very ornamental. **Pkt., 10c.**

AGERATUM The Ageratum is interesting on account of its neat, bushy habit, and its pretty, brush-like flowers which are produced in clusters, constantly all through the summer. Seed may be sown in a mellow seedbed in the open ground, or under glass early in the season.

Little Gem. Very dwarf flowers of lovely blue, an elegant border variety. **Pkt., 5c.**

New White. Flowers pure white. The very best of its color. **Pkt., 5c.**

Golden Gem. Pure golden yellow; double. **Pkt. 5c.**

Ageratum, Mixed. All colors. **Pkt., 5c.; $\frac{1}{4}$ oz., 15c.**

Strong Plants, ready to bloom, 10c. each, 3 for 25c., 7 for 50c., 15 for \$1.00.

ANTIRRHINUM SNAP DRAGON

One of the most constant bloomers of all the hardy perennials, flowering very freely the first year from seed. The flowers are produced on long spikes, and are very popular in cut flower market.

Queen of North. Pure white and very double. One of the best for cut flowers. **Pkt., 5c.**

Golden Yellow. Pure yellow, very sweet. **Pkt., 5c.**

Coccinea. Very bright scarlet. **Pkt., 5c.**

Tom Thumb. Grows only 6 inches high, and make a grand edging plant. Mixed colors. **Pkt., 5c.; $\frac{1}{4}$ oz., 20c.**

Tall Mixed. A mixture of tall-growing varieties, including all colors. **Pkt., 5c., $\frac{1}{4}$ oz., 20c.**

One each of the five antirrhinums. **20c.**

Antirrhinum

DOUBLE BALSAMS

BELLIS (DOUBLE DAISY)

CACTUS

BALSAM The garden balsam is a native of India, and likes a bright sun and warm weather. The seed should be sown in the house, the hotbed, cold frame, or in a warm, sheltered spot in light soil in the garden.

New White Perfection. The finest white yet introduced. The gigantic flowers, double and perfect like camellias, and the wonderful profusion in which they are borne, have been a revelation to thousands who never before knew what really good balsams were. It is not an uncommon sight to see more than 300 of these magnificent large double blooms upon a plant at one time, the branches being perfect pyramids of bloom. Pkt., 5c.

Royal Purple. The nearest approach to deep blue. Pkt., 5c.

Crimson. Intensely brilliant. Pkt., 5c.

Maiden's Blush. Pure delicate pink. Pkt., 5c.

Scarlet, White Spotted. Very large flowers. Pkt., 5c.

Double Superb Mixed. Composed in nearly equal proportions of all the above named. Pkt., 5c.; $\frac{1}{4}$ oz., 15c.; oz., 35c.

Lemon. The very nearest approach to yellow yet introduced, and should be included in every collection. Pkt., 5c.

One each of the above 7 for 25c.

BRYONOPSIS

BRYONOPSIS

A beautiful annual climber of the gourd species, with ivy-like pale green foliage, and showy fruit, first green striped white, turning when ripe to bright scarlet striped white feet
Pkt., 5c.

**BRACHYCOME**

(*Swan River Daisy*)

A very dwarf and bushy plant, covered all summer with a profusion of blue and white flowers that quite resemble cinerarias; fine pot or basket plant. Pkt., 5c.

BELLIS (Double Daisy). Beautiful double flowers that bloom in early summer, and great favorites.

Longfellow. Double dark crimson, Pkt., 5c.

Pure White. Pkt., 5c.

Mixed Colors. Pkt., 5c.

**BIRD OF PARADISE**

Poinciana Gillesii. The flowers of this rare plant are of a rich golden yellow, measure $2\frac{1}{2}$ inches across, and are produced in very large trusses. The most attractive part of the flower is the large pistils, which are spread out in fan-like form and are of a beautiful bright, crimson color. The foliage is highly decorative, similar to a very delicate acacia. If the seed is started early, it will produce a profusion of blooms the first year. Pkt., 10c.

CACTUS These curious and hardy plants grow very easily from seed, and our mixture contains some rare varieties. Pkt., 10c.

CANDYTUFT

Candytufts have long been among the most popular of all garden annuals, and the best effect is produced by raising the plant in masses; the soil should be rich, and when blooming time comes keep the plants well watered, especially if it be a dry time. The plants are very branching, and it is essential at times to prune away some of the shoots in order to increase the size of the flowers. Sow the seeds in beds where plants are to remain and thin out later so as remaining plants will have plenty of room.

Empress (Hyacinth Flowers). A well-grown spike of this candytuft makes a magnificent floral candelabra of snowy whiteness, an easy, rapid grower, continuing in flower a long time. For plants for cutting it is one of our very best plants for general culture and should be planted by all flower lovers. Pkt., 5c.

Snow Queen. This variety comes quickly into bloom, and smothers the dwarf oval plants with large heads of snow white flowers for three months during the summer—a gem. Pkt., 5c.

Candytuft New Hybrids (Dwarf). These elegant hybrid varieties are very remarkable for their numerous and brilliant colors. Rose, carmine, flesh and white mixed. Pkt., 5c.

Hardy Candytuft. Perfectly hardy, and will bloom from year to year; plants a mass of white flowers; it is really a floral treat. Pkt., 5c.

Hyacinth-flowered Candytuft (Empress)

COLEUS

Culture. Sow the seed in boxes or large pots; make a compost of three parts rotted sod and one part fine sand; this makes a rich soil that will not bake. These coleus are quite different from those commonly used in beds and borders. The plants reach a height of from 2 to 3 feet; the leaves often measure 10 inches in length and 8 inches in width, heart shaped; their color combinations are remarkably rich, comprising all the reds, metallic greens and and yellow, in shades from the most delicate to nearly black. Their culture is very easy; no one can fail with the seed and with rich soil, and plenty of water.

Choice Hybrids Mixed,
10c.; 3 for 25c.

Coleus

Centaurea Marguerite

Centaurea Imperialis

New Giant Fragrant

CENTAUREA IMPERIALIS

This new centaurea, a cross between C. Moschata and Marguerite, represents the best that has been produced in these beautiful summer-blooming plants. The bushes are about 4 feet high, of enormous dimensions and are covered with large, beautiful flowers of the form and fragrance of Centaurea Marguerite. The flowers will keep for over a week in water if cut just when they are about to open. It is of easiest culture. The color variation is very great, almost infinite. When well known there will be no garden without this beautiful new flower. If a package of seed is sown every two or three weeks until July a constant succession of bloom can be had throughout the whole summer and fall.

- C. *Imperialis*. Giant White, very fragrant. Pkt., 5c.
- C. *Imperialis*. Giant Rosy Red. Pkt., 5c.
- C. *Imperialis*. Giant Lilac, with white center. Pkt., 5c.
- C. *Imperialis*. Giant Brilliant Purple. Pkt., 5c.
- C. *Imperialis*. Giant Pink, with white center. Pkt., 5c.
- C. *Imperialis*. Giant Iphigenia, whitish rose with large center, extra fine variety. Pkt., 5c.
- C. *Imperialis* finest mixed, all colors. Pkt., 5c.
1 Pkt. each of above 6 Centaureas, 20c.

CENTAUREA MARGUERITE

A very handsome plant, large, pure silvery white flowers of the sweetest fragrance. Produced on long, stiff stems, are most admirably adapted for bouquets, vases, etc. Flowers keep for a week after being cut. Pkt., 5c.

CAMPANULA

Canterbury Bells

The well-known popular, large, bell-shaped flower, known everywhere as Canterbury Bells, is a biennial campanula. There are double varieties of every color, but though curious, they are not really as beautiful as the old single bell. They lose that light transparent grace that is so attractive in a flower.

Canterbury Bells. Finest single mixed.
Pkt., 5c.

Canterbury Bells. Finest double mixed.
Pkt., 5c.

Cup-and-Saucer Canterbury Bells (*Campanula Calycanthema*). New and gigantic form of campanula, producing large, beautiful flowers, resembling a cup on a saucer. The cup flowers are often 3 to 4 inches deep, and the saucers 3 to 4 inches across. They grow like pyramids, 2 feet high, and are often covered with 100 to 200 flowers for weeks during the summer. The colors are mauve, white striped, lavender and pink. All colors mixed. Pkt., 10c.

Cup-and-Saucer—*Campanula Calycanthema*

CALIOPSIS Plants are about 2 feet in height, of slender growth, and should be given plenty of room to spread. The flowers are of various shades of yellow and orange, variegated with different patterns of rich velvety crimson or maroon.

Drummondii (Golden Wave). Plants bushy and compact, covered with rich golden yellow flowers, chestnut-brown center. Pkt., 5c.

Finest mixed from named flowers. Pkt., 5c.

CANARY BIRD VINE

A rapid-growing, summer climbing annual, growing 10 to 15 feet high. It will cover trellis work in the most graceful manner, producing hundreds of its pretty fringed, bright yellow flowers, which resemble a canary bird with expanded wings. Pkt., 5c.

COMMELINA (Butterfly Flower)

Few plants in cultivation possess so great a number of superior points as do these two new Commelinias. Plants are of graceful, trailing habit, superb for carpet bedding or for hanging pots. In pots it blooms every day in the year. In the garden from May until frost, showing daily scores of large winged butterfly-like blossoms. Color white, and the most beautiful blue to be found in any flower. A shade so exquisitely lovely as to baffle description. Thrives in sun or shade, wet or dry, rich or poor soil; as easily raised as a weed. Blooms in 50 days from seed. Mixed Colors—Blue and white, 5c.

FOX GLOVE (Digitalis)

Hardy perennial plants of the easiest culture; long spikes of large showy flowers, ranging through shades of purple, white, rose, yellow; some beautifully spotted. 3 to 5 feet high. Mixed colors. Pkt., 5c.

CALENDULA

The name of this flower is derived from the fact that it will bloom every calendar month of the year. If seed is sown early in open ground, plants will be in bloom by June, and will bloom continuously.

Calendula, Oriole. Extra large, double and brilliant yellow. Pkt., 5c.

Calendula, Pot Marigold. Large and double: rich golden yellow flowers. Pkt., 5c.

Mixed. All the fine double sorts Pkt., 5c.

CHINESE LANTERN PLANT

Physalis Francheti. This singularly handsome new Chinese plant is as easily grown from seed as a tomato, but is perfectly hardy outside over winter. It produces a large number of balloon-like husks, 3 to 3½ inches across. At first these are a bright green, then light to bright yellow, then orange and scarlet. They greatly resemble in this last stage, miniature Chinese lanterns when lighted. The branches covered with husks are used with great effect as parlor ornaments, as they remain bright and fresh looking for over a year. As a Christmas tree decoration, nothing could be more unique or attractive. They are very handsome when arranged in tall vases together with dried grasses. Pkt., 5c.

CUCUMBER

African Horned

The vine is handsome and exceedingly luxuriant. One hill will cover a trellis at least 10 feet square with a solid sheet of dark green through which the sun cannot penetrate. It is the fruit, however, which is the most curious and distinct feature. When the fruits ripen they turn a brilliant orange and yellow, and are then highly ornamental. These ripe fruits will keep sound and perfect for weeks. The young fruit makes most excellent pickles, and from this state up to their full size they can be eaten green. Pkt., 10c.; 3 for 25c.

HORNED
AFRICAN CUCUMBER

CANNA SEED

They are easily grown from seed and give you flowers all summer, and when once grown roots can be kept from year to year by putting in cellar in winter.

The very best from all the named kinds mixed. Pkt., 5c.

CENTROSEMA

Grandiflora. Will thrive from early June until cut down by frost, and produce in the greatest profusion large clusters of inverted pea-shaped flowers, delightfully fragrant. 1½ to 2½ inches in diameter, and ranging in color from rosy-violet to reddish purple, with bright feathered markings through the center. Will climb 10 feet in a season. Pkt., 5c.

CINERARIA ENGLISH PRIZE.

CINERARIA

Seed should be sown from May to September for succession. After transplanting, place in a cold frame facing north if possible. When the pots become full of roots, shift into larger ones till the flowering size is reached. Our strain is justly celebrated for all good qualities. Extra choice mixed. Pkt., 10c.

Coxcomb—President Thiers
CELOSIA (COXCOMB)

Celosias are interesting and brilliant annuals, and when well grown from seed of good quality never fail to please the grower and attract attention. There are two desirable forms of the celosia, the coxcomb and the feathered. There are several colors, red, orange and yellow, but the bright reds are the best. These combs are often grown a foot or more across the top.

Coxcomb—President Thiers. One of the most dwarf of all coxcombs, bears largest crimson combs. It has been grown in our public parks between or alongside of rows of Golden Feverfew and Centaurea Candidissima, and when planted made one of the most brilliant strips of border bedding. It is also a very handsome pot plant. **Pkt., 7c.**

Celosia—Ostrich Feather. The plant grows about 3 feet high, is of handsome pyramidal form, and the numerous massive plumes which resemble an ostrich feather, waving gracefully above the foliage, make it one of the most effective ornamental plants for either pot or outdoor planting. It is easy of culture. **Pkt., 5c.**

Coxcomb—Glasgow Prize. Large crimson combs and always sure to furnish lots of bloom. **Pkt., 5c.**

CYPERUS,

(Umbrella Plant.) Grows finely in water with rich soil or mud, throwing up long stalks with narrow green leaves. Easily raised from seed. **Pkt., 5c.**

CALCEOLARIA HYBRIDS

For house or conservatory this is superb. Plants are one mass of bloom all the year round; every one succeeds with them. **Pkt., 10c.; 3 for 25c.**

Butterfly Runner Bean
1907 Novelty

Our new variety is equal to the old sorts as regards productiveness and quality of fruit, but is quite distinct and surpasses them in the beauty of its flowers; what chiefly distinguishes the latter is the large size of the prettily waved snowywhite wings and the salmon rose of the standard, these two colors making a most agreeable and striking

contrast. The vine is also extremely floriferous, its leaves, of a somewhat lighter green than other runners, almost disappearing beneath the clusters of charming flowers which gracefully rise and fall, like butterflies, in the passing breeze. The seed also is distinct, being mottled brown on white ground. In the Butterfly Bean we have a beautiful new plant both for the kitchen and pleasure garden, which will certainly soon come into general cultivation. **Pkt., 10c.**

1907 Novelty Butterfly Bean

Japanese Chrysanthemums

Japanese Chrysanthemums

Hardy with protection. Composed of all the very best Japanese and Chinese sorts, imported direct from Japan. Beautiful colors, curved and twisted in a manner never before seen. Start seed early in the house and transplant to open ground when weather is favorable.

Tokio. Curious shapes and beautiful colors, including the famous ostrich-plumed sorts. **Pkt., 10c.**

Maximum Perfection. New variety, of great beauty. Elegant for cut flowers, as stems are very long. Plant about 18 inches apart, and give a little protection first winter. **Pkt., 5c.**

CYPRESS VINE. (*Ipomoea Quamoclit*)

One of the most popular vines, with very delicate fern-like foliage, and masses of beautiful small, star-shaped flowers. Sow in May; 15 feet. (See cut.) Mixed, White and scarlet. Per pkt., 5c.; $\frac{1}{2}$ oz., 15c.

Cosmos Klondike

EARLY FLOWERING COSMOS

The Cosmos has a beauty distinct from that of any other plant; its feathery foliage and the soft but brilliant coloring of its bloom make it a universal favorite; but the common varieties are so late that they hardly have time to come into bloom before frost. We have secured an early flowering strain which will produce plants that will come into bloom the last of July, and are covered with flowers until late Fall.

Dawn. New Early Dwarf, Large Flowering. A new variety; more bushy and compact than the older varieties and grows only about four feet while all others attain a height of six to seven feet. The flowers are fully as large as those of the old sort, are a pure white with a tinge of rose, the petals are rather broader, which causes the flowers to appear more round. **Pkt., 5c.**

"Klondike." A golden-yellow Cosmos that has the size of flower of the well-known white and pink sorts. The flowers are borne on long stems and measure from $2\frac{1}{2}$ to $3\frac{1}{2}$ inches across. In form they resemble the ordinary Cosmos, but in color we know of nothing that compares in richness and depth of the golden hue. To get this variety in bloom before frost in the States north of Virginia it should be grown in pots or boxes, so that the roots are confined, thus throwing it into flower, and as a Fall and Winter bloomer for the house it is simply grand, remaining in flower until Easter. **Pkt., 5c.**

Pink. Beautiful delicate pink. A most delightful flower. **Pkt., 5c.**

Black. Bushy grower, and plants covered with flowers of almost velvety blackness with golden yellow anthers. **Pkt., 5c.**

Early Flowering, Mixed. We offer a new giant strain of wonderful beauty and size. The individual flowers measure from four to five inches, borne on long, graceful stems; the colors are pink, crimson, white striped, black, etc. Some are star-shaped, others fringed. All colors, mixed. **Per Pkt., 5c.**

COBEA SCANDENS

The finest of all climbers; beautiful bell-shaped flowers, from one and a half to two inches across, that open a clear green and turn to a purple blue. Plants grow fifty feet in a season and begin flowering when quite young. Remove to house for Winter blooming. **Pkt., 5c.**

DATURA CORNUCOPIA

Very much like the double Brugmansia except much more dwarf in habit and a beautiful lilac and white color spotted.

A very showy and delightful pot plant; blooms very quickly from seed. The roots can be preserved over Winter in cellar, like dahlia roots. **Pkt., 5c.**

FREESIA

It is not generally known that these beautiful, fragrant flowering plants may be grown to great satisfaction in four months from seed. Seed may be sown any time in pots and boxes, or frames of light rich soil. They will soon germinate, and under favorable circumstances they will bloom finely within four months from time of sowing. **Per Pkt., 5c.**

CARNATIONS FROM SEED

Carnations are general favorites for their delicious fragrance and richness of colors, and are almost indispensable, both for house culture in Winter and garden in Summer, and can be had very quickly and easily from seed.

Ever-blooming or Chabaud Carnation. A new strain raised by M. Chabaud, a Carnation specialist of Southern France. The plants are of even height, as if trimmed, healthy and vigorous, the stalks as stiff as wire, the flowers large, very double, deliciously sweet and in the largest and most charming color variations. These also bloom in four months from the time the seedlings are up. **Pkt., 10c.; 3 for 25c.**

Marguerite Carnation. In flower a few weeks after planting, and produces an abundance of large, double, fragrant flowers. Mixed, all colors. **Pkt., 5c.**

Double Mixed Carnation. All the new and choice varieties. **Pkt., 5c.**

Dianthus—Hardy Garden Pinks

DAHLIAS from Seed

But few people know that Dahlias can be raised from seed and will bloom the first year. The seed we offer, if sown early, will bloom profusely all fall. The seeds germinate as easily and certainly as zinnias, and from the very first development are strong, stocky little plants.

New Dwarf Double Cactus Dahlia. The plants grow in compact, well branched, erect bushes, 30 inches in height. If sown as late as April (in the house) they will flower all summer long and until late in the fall. The flowers are double and in a large variety of handsome and rich colors. A very early blooming race. **Pkt., 10c.**

Zimpani. A dwarf, low-growing variety, producing a great profusion of black flowers. **Pkt., 5c.**

Double Large Flowering, Mixed. Extra choice, from select seed only. Will produce some splendid varieties. **Pkt., 6c.**

New Single Mixed Colors. The flowers are large, perfectly star shaped, formed of broad petals, which are gay and beautiful in color. **Pkt., 5c.**

DIANTHUS, or HARDY GARDEN PINKS

This family of pinks is unrivaled for brilliancy and rich variety of color; the plants are bushy, of symmetrical form, blooming so profusely as to almost cover the plants until late in autumn, rendering them one of the most beautiful and satisfactory of all summer flowers for the garden. Height, 10 to 14 inches.

DIANTHUS—Single

Queen of Holland. A beautiful new hybrid variety, with large, round, entire-edged flowers, of a brilliant white. Occasionally a faint rosy, sometimes yellowish, ring appears around the eye. **Pkt., 5c.**

The Bride, or Little Gem. White, with purple center. Dwarf-Pkt., 5c.

Crimson Belle. Brilliant dark red; very handsome. **Pkt., 5c.**

Single Mixed, all Colors. This is the finest strain of Dianthus that can be had. **Pkt., 5c.**

DIANTHUS—Double

Mourning Cloak. Rich blackish crimson, tipped and fringed with snowy white. Large and handsome. **Pkt., 5c.**

White. Large double flowers. **Pkt., 5c.**

Diadem Pink. One of the most marked of the Hedgewigii varieties. Brilliant markings and dazzling colors. Mixed. **Pkt., 5c.**

Double Mixed, all Colors. The rich color patterns are similar to those of the single varieties, but the flowers are very double. **Pkt., 5c.**
One each of the above 8, 30c.

GIANT
WHITE DAISY

If sown early in spring will bloom the first year. Its large, pure white flowers are produced in the greatest abundance, and being borne on long stems are of the greatest value for cutting. Our engraving gives a very good idea of the habit of the plant and the form of the flowers. As a flower for summer cutting, for commercial use, or any other purpose, this grand plant should be freely grown, and will give the greatest satisfaction, and will in a few years be found in every flower garden and collection. **Pkt., 5c.**

WILD CUCUMBER

Echinocystis Lobata.

This is the quickest growing climber in our list. Grows wild, self sown, in many parts of the West. It will grow thirty feet in one season. It is thickly dotted over with pretty, white, fragrant flowers followed by an abundance of ornamental and prickly seed pods. For a trellis or pillar no annual vine is more chaste, and it will quickly cover an old tree or an unsightly building.

Pkt., 5c.; $\frac{1}{2}$ oz., 20c.;
oz., 35c.

GERANIUMS from Seed

This grand plant is the stand-by for all—and at all times—for bedding in summer and for pot culture in winter. Few know how quickly and easily they grow and bloom from seed. Some of the finest sorts are gotten this way. Start seed early and you will have lots of bloom the first year.

Single and Double Mixed. Pkt., 5c.

Scarlet Mixed. All red varieties. Pkt., 5c.

Pansy Geranium. This new and beautiful geranium is of easiest growth, dwarf in habit, and literally covered with flowers all the time, and as it requires little or no attention it is invaluable as a window plant. The coloring and marking of the flowers are most extraordinary—light pink, white, dark purple and black, etc., almost rivaling the pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. Pkt., 15c.

Ivy Leaved—Double and single mixed; extra fine with magnificent trusses of bright colored flowers, and a beautiful trailing habit with rich ivy-like foliage. Per Pkt., 15c.

GLOXINIA

Gloxinias are among the handsomest of our summer-blooming greenhouse plants. The flowers are gorgeous, and the foliage has a velvety appearance. Seed should be started in spring in a warm place. They require partial shade and a liberal supply of water when growing. After blooming, water should be withheld and the bulbs remain dry through the winter. **Seed, Finest Mixed. Per Pkt., 10c.; 3 for 25c.**

PURPLE FEATHER GRASS

Pennisetum Ruppelianum.

An Annual which Produces Plumes by Midsummer.

This is undoubtedly one of the most ornamental decorative grasses ever introduced, and will be found as useful for room, hall or table decoration as many a palm, while having the advantage of rapid and vigorous growth, and being easier to manage.

Its graceful, narrow curving leaves, produced by the hundreds in succession, are overtopped by the most elegant purple feather plumes a foot long, which by themselves are quite ornamental as vase decorations and can also be used for dry grass bouquets.

Pkt., 10c.

THE GENUINE EDELWEISS

or Sunflower of Switzerland

There is a world of poetry connected with this charming flower, to obtain which many travelers have sacrificed their lives. It blooms right through the snow, and when cut lasts for years. The flowers are rare and beautiful, as white as snow and as soft as velvet, growing sometimes 30 on one plant, with grayish-white foliage in spreading rosette. Naturally as hardy as a rock, they grow in any way, on sandy moist soil, gritty and well drained, or on raised rockwork, and even as a border plant, in chalky open soil. Lasting for years in beauty, it will certainly prove a wonderful attraction. **Price, per Pkt., 10c.**

GLAUCIUM (Horned Poppy).

Corniculatum (Luteum). An ornamental foliage plant, with long, recurved deeply cut silvery leaves; of vigorous growth, contrasting finely with colored foliage plants. Flowers are orange-yellow, bell-shaped and drooping; hardy biennial; 2 feet . 5c.

GAILLARDIA

Gaillardias, known as Blanket Flowers, are good bedding plants, being strong, constant bloomers through the whole summer. Set plants 12 to 18 inches apart. Half-hardy. Flowers large and showy, 2 to 3 inches across.

Lorenziana. A new double Gaillardia of the most popular and fashionable style. Long stems, good for vases or bouquets or for wearing; blooms continually all summer. Scarlet, yellow, claret, beautiful yesterdeday. **Pkt., 5c.**

Gaillardia Single. Very showy, large single flowers like a peacock feather, always in bloom during summer; mixed colors. **Pkt., 5c.**

Hardy Gaillardias. Aurora Borealis, as gaudy as a flower can be; bloom first year from seed and live from year to year. Flowers bring high prices in market; finest mixed varieties. **Pkt., 5c.**

NEW HARDY HIBISCUS

One of the fastest growing hardy perennials we have and the most profuse bloomer, a plant often having 300 blooms on. Just the thing for hedges, as they never winter-kill, and are in bloom in mid-summer when other flowers are very scarce. Blooms from seed the first year in open ground. Mixed colors. **Pkt., 5c.**

Crimson Eye. Flowers immense size, 5 inches across. Pure white, with deep crimson center. Hardy. **Pkt., 5c.**

GODETIA

Of hardy annuals none are more beautiful than these. They are of a dwarf habit of growth, the flowers are of handsome shape, in the most brilliant as well as delicate colors, and are produced in marvelous profusion. Of easiest culture. A child can grow them.

Duchess of Albany

Flowers glossy satin-white, produced in great profusion. **Pkt., 5c.**

Lady Satin Rose.

Unequalled for brilliancy and richness of color. Brilliant rosy pink, surface like satin. **Pkt., 5c.**

Mixed, all colors, very fine. **Pkt., 5c.**

Godetia

Gypsophila

Paniculata or Angel's Breath

Gypsophilas are valuable for bouquet making, either green or dried. They are very graceful, and easily cultivated. Should be in every garden. All flower the first season. G. paniculata continues to bloom several years.

Pkt., 5c.

Grevillea

GREVILLEA ROBUSTA

Or Silk Oak

One of the quickest growing of ornamental house plants. It is easy to manage, grows rapidly from seed, and is pretty in all its stages of growth. With its long, drooping, silky foliage it reminds one of a palm or fern. **Pkt., 10c.**

IONOPSISIDIUM or Diamond Flower

A most charming little flower for pot culture. Seeds sprinkled in a pot will bloom in a month. If scattered around on pots in which other plants are growing they will make a most charming effect. The plants grow about two inches high and are covered with glistening white and violet flowers. **Pkt., 5c.**

Ornamental Climbing GOURDS

These plants are very desirable for training over the lattice work and shading the front of the piazza, for porches and trellises, for covering fences, stumps, etc. The foliage is dense and cooling and often grows 20 feet in a season. Besides they furnish an endless source of interest and delight watching the many curious and oddly shaped fruits of all sizes and colors.

Large Fruited Gourds. This mixture contains the Bottle, Corsican, Hercules, Club, Powderhorn, Dipper and many other kinds. **Pkt., 5c.**

Small Fruited or Pepo Gourds. This mixture contains the Apple, Pear, Orange, Egg, Flat, Striped and Bicolor. Very curious. **Pkt., 5c.**

Japanese Nest-Egg Gourds. Resembling in color, shape, and size the eggs of hens; are uninjured by cold or wet and therefore make the best nest-eggs; also very useful when mending stockings. **Pkt., 5c.**

Double Hollyhock

Evening
Glory

Moonflowers.
Rapid-growing vines of great vigor, producing hundreds of flower each night.
Notiphiton. Pure white, large flowers
Pkt., 5c.

Leari. Beautiful azure blue.
Pkt., 5c.

Sweet-scented Four o'Clock.

This variety blooms just as quickly and easily as the old-fashioned kind and is sweet scented. Pkt., 5c.

HOLLYHOCKS In situations suitable for tall flowers we know of nothing better than the hollyhock; and yet the improved varieties do not grow very high—from 4 to 6 feet being about the average. New plants are obtained from seed and by dividing the root. Seed sown in the summer will give plants that will endure winter. The plants may be protected during winter with a little straw and evergreen boughs or leaves. Biennial.

Double White, extra large. Pkt., 5c.

Double Yellow, very brilliant. Pkt., 5c.

Double Red, a prize variety. Pkt., 5c.

Double Mixed, all colors, from best named collection in Europe. Pkt., 5c.

New Fringed Mammoth Allegheny Hollyhock. This grand new flower is a decided improvement in more than one particular over the old-fashioned variety. Its first point of merit is the fine transparent, fringed, chrysanthemum-shaped flowers, which look as though they were made of crushed silk. It is a **perpetual bloomer.** The colors are shell pink, rose and ruby red, a shade or two deeper at the center and exquisitely tinted toward the edge. The flowers do not, as on the other double hollyhocks, rot on the stem but drop as soon as they fade. One has to see this plant in bloom to appreciate its clear, transparent colors, which make a row shine with rainbow effect. **Seed, Mixed, all colors, Pkt., 5c.**

Strong roots ready to bloom, 20c. each, 3 for 50c., 7 for \$1.00, 12 for \$1.60.

Lobelia.

Lobelia Blue Gem

This is a very fine kind of this ever-popular plant. Is dwarf, bushy; flowers deep blue and covered with them all the season. Indispensable for baskets or pots. **Mixed, all colors, Pkt., 5c.**

Lantana.

New Hybrid Lantana

Of dwarf and compact growth they will be found a great improvement upon the older sorts and a splendid acquisition to our list of window and garden flowers. Verbenae-like flowers and in a great many colors. **Pkt., 5c.**

Lemoine's Heliotrope

Efforts to improve the heliotrope have been persistently made by experts all over the world for a number of years, and at last these efforts have been successful; realization has surpassed the most ardent expectation. One can scarcely recognize the old garden favorite in its new glorified form. The size of the foliage and the quality are doubled; the habit of the plant is made compact and bushy instead of being scraggly and sprawling; the size of the flowers are magnified beyond belief, specimen heads measuring ten to fifteen inches across.

Lemoine's Giant. Of robust growth, and produces heads of flowers double the size of the old sort; mixed colors. **Pkt., 5c.**

New Japanese Wistarias

Purple Soudan. A very curious and highly decorative climber much earlier than the ordinary Dolichos and also much more floriferous. The stems are of intense purple color, and the beautiful long flowers, that are produced during the whole summer, are of a brilliant rose, contrasting strikingly with the dark foliage. The seed pods are themselves an ornament to the plant, owing to their dark-red color. Stands heat exceedingly well and for covering walls, trellises, etc., will be found invaluable. **Pkt., 10c.**

Daylight. One of the prettiest climbers. Of very rapid growth, the plant is indifferent to bad weather, and it will grow to a height of 15 feet by midsummer. The flowers, which appear in great numbers, are snow-white, sweet-scented and are followed by cream-colored pods which hang to the plants until late in the fall. **Pkt., 10c.**

J. ROSCOE FULLER & CO.,

Sirs:—I got those plants yesterday evening and will say that they were the largest and finest plants I ever saw come through the mail, and I thank you very much for the Violets and Candytuft. Will send you an order in the fall for Hardy Lillies and other shrubs.

Iowa, May 26th, 1907.

Tours sincerely,

MRS. KATE B. ANDREWS.

Japanese Imperial Morning Glories

**MAURANDIA**

Beautiful, rapid, slender growing climbers, blooming profusely until late in the autumn; also fine for the conservatory or greenhouse; if desired for the house, take up before the approach of frost. A half-hardy perennial, flowering the first season if sown early. Grows to 10 feet.

Barclayan purple. Finest Mixed. Pkt., 10c.

**MESEMBRYANTHEMUM
(ICE PLANT)**

Dwarf trailing plants of great beauty, blooming the whole summer, thriving best in a dry, loamy or sandy soil, requiring a warm sunny situation; half hardy annuals: 6 inches. Flowers white; prized for its singular icy foliage. **Pkt., 5c.**

**DWARF JAPANESE MAPLES**

Exceedingly attractive little foliage plants for high-class decoration indoors or out. The foliage is a picture—hundreds of colors are represented, yellow, brown, pink, scarlet, green and hundreds of variegations. Many different forms of leaves. First-class window plant. They equal or excel abutilions and fancy leaved caladiums in range of colors. Seed of fine mixed sorts. **Pkt., 10c.**

**MYOSOTIS**

(Pillar of Glory)

A very beautiful upright sort, growing in pillar form, 10 to 12 inches high; lovely sky-blue.

Pkt., 10c.

**JAPANESE IMPERIAL
MORNING GLORIES**

These morning glories have given great satisfaction. Their exquisite beauty and enormous size (from 4 to six inches across), with their innumerable markings and shadings, command the admiration of all flower lovers. We are able to offer a very fine mixture of choice colors, ranging through white with pink throat, white spotted with violet, white spotted with rose, mauve with white throat, lavender with central band of crimson, cobalt blue with rose bands, violet with blood-red bands, crimson with carmine bands and purple with maroon bands. The vines are strong and robust, attaining a height of 30 to 50 feet. The foliage is large, finely cut; sometimes plain green, and occasionally green, beautifully mottled with creamy buff. All colors mixed. **Pkt., 5c.; $\frac{1}{2}$ oz. 15c.**

Double Fringed Japanese Morning Glories. For beauty of flowers and foliage these new Japanese morning glories have no equals. In this double strain the flowers are of the same rich color variations as those of the single flowering kinds, with the addition that most of the flowers are double. **Pkt., 10c.; 3 for 25c.**

Brazilian Morning Glory (*Ipomoea Setosa*). A grand and luxuriant twining vine. The thick stems and leaf stalks are covered with reddish brown hairs. The deeply lobed leaves are from 8 to 12 inches across; flowers about 2 inches in diameter of delicate texture, tinted pink, with a five-pointed star of satiny pink, and are followed by curious seed pods. **Pkt., 10c.**

Large-Flowered Morning Glory, Rochester. This grand Morning Glory is remarkable for the large size and beautiful color of the flower. Vines strong, growing quickly twelve to twenty feet high, leaves measuring from eight to ten inches across, and remaining on the vines entire summer. Flowers four to five inches across, deep violet-blue in the throat, blending out to an azure-blue, bordered with a wide white band around the edge. The flowers form in clusters of from three to five, from the ground to the top of the vines. **Pkt. 10c.; 3 for 25c.**

MIGNONETTE

Giant Machet. There is no mignonette which can equal this. Its flowers are larger in every way than those of other sorts, the spikes are very dense, its foliage is distinct, being crinkly, while its odor is strong and most delicious. The plants grow in handsome bush form and the flower spikes are borne on stiff, wiry stems. It is the **best mignonette** for all purposes, either in pots or for the garden. It is an **everbloomer**, the flowers lasting until late in the fall. Color white, tinged with deep pink. Pkt., 5c.; $\frac{1}{4}$ oz., 20c.

New Golden Machet. This new mignonette possesses all the excellent qualities of the red-flowering Machet. Like the Machet, a splendid variety for pots and cut-flowers, while the long, massive spikes are crowded with **golden-yellow blossoms**. This is a very valuable and distinctive novelty. Pkt., 5c.; $\frac{1}{4}$ oz., 20c.

Mignonette Giant Red. This wonderful mignonette grows 12 to 18 inches in height in pyramidal form; its **enormous flower spikes** are of the largest size, the individual blossoms of an **intense red color** and are very sweet-scented. One of the best for cut-flowers and pots. Pkt., 5c., $\frac{1}{4}$ oz., 20c.

Giant White Spiral. Grows from 2 to 3 feet tall. Perfectly erect, spikes of bloom often measuring 15 inches long. It is very showy in growth. Pkt., 5c.; $\frac{1}{4}$ oz., 15c.

Sweet Scented. The old style, but very sweet-scented. Per Pkt., 5c.; $\frac{1}{2}$ oz., 10c.

Mignonette. All kinds mixed. Pkt., 5c.: $\frac{1}{2}$ oz., 15c.

Mignonette Machet

Eldorado Marigold

Marigold Legion of Honor

MARIGOLDS

These popular, bright, showy flowers only need the slightest care to do well and blossom freely. They succeed best in light soil with full exposure to the sun. Seed may be sown in open ground where plants are to remain.

Eldorado. Flowers very large, 10 to 14 inches in circumference, and extremely double; quilled like a dahlia; primrose, lemon, orange, and golden shades. Plants 3 feet in height. Pkt., 5c.

New Marigold. Legion of Honor. Named so in France because it so exactly resembles button of the Legion of Honor. Flowers are bright and almost startling. Bright golden yellow with a deep velvety crimson-brown mark on each petal at the base. Easy to grow. Pkt., 5c.

Prince of Orange. The plant grows 12 to 18 inches high, and produces large, brilliant, deeply imbricated flowers in great profusion all the season. The color is a pale straw yellow, striped with a most intense shade of orange. Pkt., 5c.

Gold Margin. New and fine. Flowers velvety maroon, margined with a golden ring. Plant only 8 inches high, bushy, compact, and free-flowering. Pkt., 5c.

Dahlia-Flowered. Grows 2 to 3 feet high; enormous double blossoms in size and shape resembling the finest dahlias. Pkt., 5c.

French Mixed Colors. Dwarf Varieties. Small double flowers, rich dark shades, profuse bloomers. Pkt., 5c.

African Mixed. Tall varieties, beautiful for clumps. Pkt., 5c.

Myosotis

Momordica

MYOSOTIS (Forget-Me-Not)

These charming little favorites succeed best in damp, sandy places, but will thrive well in almost any soil.

Pure White. Very fine. Pkt., 5c.

Blue. Charming. Pkt., 5c.

Dwarf. Mixed colors, bushy. Pkt., 5c.

MOMORDICA

(Balsam Apple and Pear)

Very curious climber, with ornamental foliage and golden yellow fruit which opens when ripe, showing the seed and carmine interior. Apple and pear mixed. Pkt., 5c.

Giant Nasturtium "Jupiter"

NEW Nasturtium Chameleon

This new strain of Nasturtium is a most remarkable advance in this brilliant family. We find that in richness and variety of colors it surpasses any other strain, and is also unique in bearing flowers of quite distinct colorings on one and the same plant, some clear, deep crimson, others blotched on light ground and others beautifully mottled. This characteristic as well as the wonderful richness of the unusual markings has been fixed in both the tall and dwarf forms, and we recommend both strains to every grower.

Tall Chameleon. This variety, with its very large, rich flowers in the greatest variety, is unsurpassed for training over fences and trellises, and blooms with the greatest freedom the entire season. Pkt., 5c.; oz., 15c.

Dwarf Chameleon. This strain is remarkably dwarf and as a border or bedding plant has a distinct place. Its flowers are even more intense in color, are carried well above the foliage and sometimes almost hide it. The variation of color of course adds greatly to its interest. This is the most brilliant mixture of Nasturtiums we have ever seen; the colors and color combinations are simply magnificent. Pkt., 5c.; oz., 15c.

Dwarf Lady Bird. Very fine, bright yellow, marked with stripes and blotches of ruby crimson. Pkt., 5c.; oz., 15c.

Dwarf Empress of India. Very dwarf and compact in habit, the leaves being of a dark purplish color, while the flowers are of a deep brilliant crimson. Grand things for edging or massing. Pkt., 5c.; oz., 15c.

Tall Nasturtiums, Mixed. Twenty kinds and colors. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 40c.; 1 lb., 75c.

Dwarf Mixed. The very finest mixture of all the low growing varieties. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; 1 lb., 80c.

LYCHNIS

Handsome plants of easy culture, growing in any rich garden soil; for massing in bed and borders, blooming the first year if sown early; hardy perennials.

Burning Star. A blaze of scarlet brilliancy for months, star-like blossoms covering the dwarf bushy plants as with a cloud. Perfectly hardy and blooms even better the second season than the first. One of the most brilliant of garden flowers. Pkt., 5c.

Lychnis Chalcedonica White. This is a very ornamental hardy perennial; grows about two feet high and is covered during the summer season with thousands of white flowers. Pkt., 5c.

New Giant Nasturtium "Jupiter"

The King of Nasturtiums

A new giant flowered Climbing Nasturtium, originated by Mrs. Theodosia B. Shepard. "As beautiful as an Orchid," has been remarked of this magnificent flower, the precursor of a new race of Giant Nasturtiums.

The plants are very strong and vigorous with large dark green foliage. The great, rich, pure yellow flowers measure $\frac{3}{4}$ inches across. The petals are large ($1\frac{1}{2}$ inches in diameter); they overlap and are exquisitely and deeply crinkled like crepe. The flowers are very fine for cutting, resembling Orchids in their rich beauty. A grand and distinct variety. Pkt., 10c.; 3 for 25c.

Madame Gunther's Hybrids. For richness and variety of colors these new hybrids have no equals among Nasturtiums. There are shades of rose salmon, bright-st red, pale yellow, either as self colors or spotted and striped. The foliage is mostly dark and contrasts very effectively with the rich colors. They are climbers and are free and continuous bloomers. Pkt., 5c.; oz., 15c.

New Climbing Nasturtium, Princess Victor'a Louise. This is surely one of the most beautiful and remarkable varieties of climbing Nasturtiums. The large and nobly shaped flowers are cream-white with orange scarlet blotches, the calyx and the spur being of a pure orange red, which is a rather rare color among the annual Nasturtiums; sometimes the flowers are edged with red. The foliage is of a dark green color. Pkt., 10c.; oz., 25c.

CAPRICE. A profuse blooming extra large-flowered variety with beautiful dark foliage. The flowers are wonderfully rich and brilliant in markings—showing many combinations of coloring. It is appropriately named Caprice, from its remarkable character of frequently having most varied colored flowers on a single plant. Pkt., 10c.; oz., 35c.

SPECIAL OFFER. One Pkt. each of the 10 varieties of Nasturtiums on this page for 50c.

Chameleon Nasturtium

Lychnis

Pansy Bridesmaid

Pansy Masterpiece

PANSIES

The Pansy is justly—everywhere and with everybody—a very popular flower. Its modest and innate sweetness, with its almost human face, endears it to the heart of old and young alike. It gives an abundance of bloom until after severe frosts, endures our hard Winters with safety, and greets us in the early Spring with a profusion of bright blossoms. Pansy seed may be sown in the hot-bed or open ground; if sown in the Spring, get it in as early as possible, so as to secure flowers during the early rains. Seeds sown in a cool place in June or July, and well watered until up, will produce Fall flowering plants. To have good flowers, the plant must be vigorous and make a rapid growth, as it will in rich moist loam. Young plants give the largest flowers. Old worn-out plants should be replaced. If the plants come into bloom in the heat of the Summer the flowers will be small at first, but as the weather becomes cooler they will increase in size and beauty. They will flower better in the middle of Summer if planted where it is somewhat shaded from the hot sun, and especially if furnished with a good supply of water; but in almost any situation will give fine flowers in the Spring and Autumn.

Masterpiece or Five Spotted. This strain comes nearer to Double Pansies than anything ever introduced under that name. In reality the number of petals is the same as that in other Pansy flowers, but they are crimped and curled in such a fashion that the flowers appear double. The flowers are of enormous size, often three inches across, and the color variations and combinations are odd and striking. **Pkt., 10c.; 3 for 25c.**

Violet or Tufted Pansies. For years these hardy, tufted Pansies have been grown in England, where they are most extensively used for borders, but they are always propagated by cuttings. We have succeeded in securing a limited amount of seed. The plants grow in dense, compact little bushes, which are completely covered with their bright flowers from early Spring until late in the Fall. The colors range in all shades of white, pink, blue, yellow, violet and purple, as self colors or in combinations. It is a decorative plant of the highest order, and we feel sure it will soon be as universally grown in this country as it has been for years in England. **Pkt., 5c.; 3 for 12c.**

Fairy Queen. One of the latest novelties. Brilliant sky blue; silver white margin; very showy. **Pkt., 5c.**

Madame Perret. Extra large flowers. Edged marble and shaded blue; dark red and violet. One of the newest introductions. **Pkt., 5c.**

Peacock. A Pansy of superb and varied colors, most of them showing that glorious and luminous bronze-blue seen only in peacock feathers. **Pkt., 5c.**

Fancy Striped. A strain made up of various colors, all elegantly striped and variegated. **Pkt., 5c.**

Snow Queen. Large, pure white flowers. Fine for cemeteries. **Pkt., 5c.**

Bridesmaid. The flowers of this new interesting variety are very large and of fine form. Its ground color is a rosy white, rivaling in delicacy and beauty the finest Apple-blossom, and most strikingly setting off the dark blotches of the center. It is the freest blooming of the Giant Pansies. **Pkt., 10c.**

Yellow Bird. This is one of the grandest bedding Pansies known, being a clear deep yellow with no other marks. **Pkt., 5c.**

Victoria. Deep scarlet. The brightest and only red Pansy known. **Pkt., 5c.**

Emperor William. Fine large flower. Blue, with violet-purple eye. **Pkt., 5c.**

King of Blacks. Almost coal black, coming true from seed. **Pkt., 5c.**

President Carnot. The ground color is white, and each petal is almost covered with a rich, velvety blotch of dark violet-purple, leaving a broad white margin. Very fine flowering. **Pkt., 5c.**

Mammoth Butterfly. The flowers are very large and are produced freely. In coloring they are varied—seldom two alike in a hundred plants. They are mottled and spotted, streaked and splashed, while the colors are mainly those rich reds, brown chocolate, lavender, violet, purple, etc. **Pkt., 5c.**

Sweet Scented Pansies. This lovely new class is the result of a hybridization or crossing of the Pansy with the Sweet Violet, retaining the delightful Violet perfume, with Pansy blooms two inches in diameter, of good substance and in many colors. They include pure white, yellow, black, maroon, orange, lavender, striped, blotched, etc. **Pkt., 5c.**

One Pkt. each of 15 named Pansies, **70c.**

Fuller's Extra Choice Mixed Pansies

Fuller's Giant Perfection, Mixed. Flowers three to three and one-half inches across. Made up of large flowering kinds and most profuse bloomers. **Pkt., 5c.; $\frac{1}{8}$ oz. 25c.; $\frac{1}{4}$ oz. 40c.**

Fuller's Superb Mixed. Our superb mixture still retains its superiority above all others; and for range of colors and flower-producing qualities it cannot be equaled. **Pkt., 5c.; $\frac{1}{8}$ oz. 25c.; $\frac{1}{4}$ oz. 40c.**

Mixture of Scarlet and Red Pansies. Red and Scarlet flowers. It is made up of such varieties as Meteor, Red Riding-hood, Cardinal, Fiery Faces, and also some special selections we had made for this mixture by several Pansy specialists. A bed of these Pansies presents a striking and beautiful effect. **Pkt., 5c.**

GIANT PETUNIAS

For outdoor decoration or house culture few plants equal the petunias in effectiveness. They commence flowering early and continue a sheet of bloom throughout the whole season until killed by frost: easily cultivated, only requiring a rich soil and a sunny position.

New Hybrids. Striped and blotched: a magnificent strain, producing a great profusion of crimson and white flowers. **Pkt., 5c.**

Double Snowball. Very rare and scarce. Large double white flowers. **Pkt., 10c.**

Double Crimson. Large double flowers of a very intense scarlet. **Pkt., 10c.**

Double Fringed. All petunias will not come double from seed, but this will produce as many double flowers as any in cultivation. **All Colors Mixed. Pkt., 10c.**

Ruffled Giants of California. This new race is the result of years of careful hybridizing and selection by one of the foremost petunia specialists. The flowers are of extraordinary size and substance, with very deep throat, and distinguished from the large-flowering fringed section by the deeper fringing and fluting, giving the appearance as if artificially ruffled. The colors are not surpassed by any other strain, ranging from the deepest plum-purple to the purest white. **Pkt., 10c.**

Finest Mixed. This mixture is made up of all colors, and is one of the very best that can be had. **Pkt., 5c.**

HOWARD'S NEW STAR PETUNIA. **The Floral Novelty of 1902.** Their ground color is a dark crimson maroon, with a rich velvety texture, justly pronounced equal to that of the pansy. Showing through the ground color are violet veining.

From the center start the points of a five rayed star, which broadens half way up, narrowing to a point at the margin of the flower. This star is a very light blush pink, some almost white, which deepens in color as it reaches the margin and finally blends with the maroon ground color. Over eighty per cent of the plants from seed will produce the star markings. Others with veined and feathery markings on dark or light ground are not less surprisingly beautiful. The plants are free growers, branching freely and attaining an average height of 18 inches by 24 inches in diameter. They are remarkably prolific bloomers, single plants often having one hundred or more fully expanded flowers at a time. We feel confident that in view of the universal praise of those who have seen these petunias, it will have the largest sale of any floral novelty that has been offered for many years. **Pkt., 10c.; 3 for 25c.**

Large-flowering Fringed Petunia

Giant-flowering Phlox

GIANT PHLOX

The various varieties of this flower are noted for extreme richness of color, profuseness of blossom and length of duration in bloom; of first-rate habit, and whether in clumps or masses look equally beautiful. It is one of our finest annuals for beds and borders.

Phlox Drummondii Grandiflora. A bed in bloom dazzles the eye with its brilliancy, and the different colors produce a beautiful effect. Sow seed in the open ground early. **Pkt., mixed colors, 5c.**

Star Phlox. A decidedly unique variety. While the petals of all other phloxes are entire, in this variety they are partly fringed and partly toothed: the central teeth of the petals are 5 or 6 times as long as the lateral ones, projecting like little spines, giving the flowers a regular star-like form. The beauty of the flower is enhanced by a white margin which borders the edges of the petals. **Best varieties, mixed, Pkt., 5c.**

Double Yellow. Large double flowers. **Pkt., 5c.**

Alba. Pure White, one of the finest. **Pkt., 5c.**

Mixed Varieties. The very finest of all colors. **Pkt., 5c.**

Hardy Perennial Phlox. Magnificent hardy flowering plants, growing into strong bushes from 2 to 3 feet high, bearing immense heads of large waxy flowers of the most lovely shades of color. **Pkt., 10c.**

Primula (Chinese Primrose)

POLYANTHA or FAIRY ROSES

In Bloom Two Months After Planting

These may well be called "Fairy Roses," for they bloom when scarcely two months old. They flower on little shoots from 3 to 5 inches high, and with age they increase in number until a plant a foot and a half tall is covered with these beautiful little midgets, delightfully fragrant. Colors, white, pink, crimson, etc. A grand plant for pot culture and perfectly hardy outside, increasing from year to year. A packet of seed will give a great many beautiful flowers for both summer and winter. Start seed early in the house for outdoor blooming. Pkt., 5c.

J. ROSCOE FULLER & CO.

Gentlemen:—Plants and seeds have come to hand promptly, and all in splendid condition. Nothing could be better for the money. Many, many thanks. Yours truly,

Cuba, June 7, 1907.

PEDRO LOSCA.

PRIMULA

(Chinese Primrose)

The Chinese primrose is the brightest and most free flowering of all pot plants for growing in the house during the winter. It does well in a cool room and will bloom freely in a shady window, where most flowers will not thrive. Sow seed in shallow boxes of light soil, barely covering seed from view, and it is best to keep box shaded during the hottest part of day. The earth should be moist always—neither wet nor dry at any time. Keep plants in cool, shady place during summer months.

Primula, Pure White.	Large trusses of white flowers.	Pkt. 10c.
Primula, Pink.	Fine fringed flowers of pink.	" 10c.
Primula, Red.	A very brilliant red.	" 10c.
Primula, Blue.	New and beautiful.	" 10c.
Primula, Single Mixed.	All colors.	" 10c.
Primula, Double Mixed.	All colors. Very choice.	" 20c.

Baby Primrose (Forbesii). One of the freest flowering primulas. The seed comes up very quickly and the little plants throw up flower stalks when only a few weeks old which are shortly covered with a never-ending profusion of sprays of beautiful rosy lilac flowers. Pkt., 10c.

Bedding PETUNIA

BABY-BLUE

Owing to its dwarf compact growth it is one of the most satisfactory plants to grow in solid masses, or to plant as a border around the beds of other plants. It begins to bloom when only a few inches in height and flowers profusely until the plants are killed by frost early in the fall.

The flowers measure from one to one and a half inches across, and are a soft reddish purple in color when examined closely, but when seen en masse in the strong sunlight from a little distance appear a lovely blue. The small pure white throat shows as a small white circle in the center of the flower, but this is so small that it does not reflect the solidly blue coloring—except on close examination. The small very dark green leaves form an admirable background for the flowers.

Pkt., 10c.

Petunia Baby-Blue

PERENNIAL PEA

The most Fragrant Pea in cultivation and Absolutely Hardy without protection.

No praise can be too high for this lovely iron-clad vine, that blooms constantly from early summer until late autumn. Plants a picture of vigor and healthfulness, bearing a profusion of long-stalked clustered flowers, white, pink and deep rose in color, each flower an inch or more across. It is strange that they are so rarely seen, for they are easily grown, perfectly hardy, and so beautiful that we have never yet seen a person who did not admire their cheerful flowers. 4 to 6 feet high. Mixed, all colors, Pkt., 5c.

White, Per Pkt., 5c.

Pink, " 5c.

Red, " 5c.

Perennial Pea

Double Portulaca.

POPPIES

There is nothing more graceful than the silky blooms of poppies, and few flowers are easier to grow.

New Oriental Hybrid Poppies. For brilliancy of colors there is nothing to equal these Oriental poppies. The flowers are of enormous size, often measuring over 6 inches in diameter, while the colors range from soft flesh and rose to the most brilliant dazzling scarlet and richest maroon purple. Their culture is as simple as that of the garden poppies. They are perfectly hardy perennials, living through our winters with but little protection, and increasing in size and beauty from year to year. **Pkt., 10c.**

Iceland Poppy

Iceland Poppies. These poppies produce flowers the first year from seed. The colors range from the purest white to the deepest orange scarlet and have a delicious fragrance. For vase or house decorations they rank among the loveliest. Mixed colors. **Pkt., 5c.**

Shirley, Silk or Ghost Poppy. The Shirley poppy is not new, but the stock we here offer will be a revelation to all lovers of the beautiful. Our strain is one of superlative excellence, and many beautiful new forms will be found in it. They are especially strong in shades of terra cotta and combinations of this with pink and scarlet. If gathered early in the morning while the dew is still on them, and before the rays of the hot sun have affected them, and placed in water, they will last in all their beauty for forty-eight hours. **Pkt., 5c.**

New Tulip Poppy. The perfect and striking flowers are intensely vivid in color; the two outer petals form a tulip cup; after a time deep black spots appear at the base of each petal. The glowing scarlet of the large flowers is such that the eye cannot bear its glare when the sun is shining on it. **Pkt., 5c.**

Fairy Blush. A lovely feathery variety, double, with fringed edges. Pure white with rose cream edge. **Pkt., 5c.**

Giant Snowdrift. Pure snow white flowers. **Pkt., 5c.**

Giant Carnation-flowered. Double flowers, brightest colors, perfectly grand. **Pkt., 5c.**

Special Mixture of Poppy. Comprises not only all the double and single poppies described, but also a number of other sorts especially purchased for this mixture, including some entirely new ones. Will make a grand display. **Pkt., 5c.** One each of the above Poppies, **30c.**

PORTULACCA

In brilliancy and beauty of colors portulaccas are unrivaled; they delight in sunny situations, where they very soon carpet the ground. Some double as roses.

Grandiflora, Mixed Colors. White, crimson rose, scarlet, yellow, striped, etc. Very brilliant. Single mixed. **Pkt., 5c.**

Double Rose-flowered, Mixed Colors. Large blossoms, as double as roses, and of the greatest variety of colors and variegations. Our seed is extra choice and will produce large double flowers. **Pkt., 10c.**

Double Yellow. Fine brilliant color. **Pkt., 10c.**

Double Scarlet. Clear and bright. **Pkt., 10c.**

Double White. Pure and beautiful. **Pkt., 10c.**

New Oriental Poppies

MIMULUS

In exquisite coloring these flowers rival the gloxinia. The flowers are spotted and marked in a very beautiful way.

Mixed Sorts (Monkey Flowers). **Pkt., 5c.**

Moschatus (Musk Plant). Delightful musk odor from the foliage. Flowers bright yellow. **Pkt., 5c.**

Tigrinus Grandiflorus. Flowers are large, nearly the size of a petunia and of the brightest and most striking colors, spotted and variegated in a most beautiful manner. **Pkt., 5c.**

A COLLECTION OF ALL THE BEST VARIETIES

SWEET PEAS

DOROTHY ECKFORD. (See illustration from a photograph.) So much has been written and said of this grand new white that already it must be familiar to a great number of lovers of this glorious flower. The First-Class Certificate of the N. S. S., and of the Shropshire Horticultural Society, stamps it at once as the grandest pure white yet seen. In addition to its pureness it is a grand giant flower, also robust in growth and stem, with no tendency whatever to tinge or go pink; the plant is very short jointed, and grows an enormous mass of bloom. **Pkt., 5c.; $\frac{1}{2}$ oz. 10c.; 1 oz. 20c.**

King Edward VII. This is a very lovely intense bright crimson self, with a slightly hooded yet prominent standard; a true giant-flowered variety with strong stems and growth, with no inclination to burn in the sun. A fine decorative and show variety, much brighter than either Mars or Salopian. **Pkt., 5c.; $\frac{1}{2}$ oz. 10c.; 1 oz. 20c.**

THE CHOICEST MIXED SWEET PEAS at Wholesale Prices

Fuller's Finest Mixed.—"All New Sorts." This is the finest mixture obtainable, containing not only the highly improved varieties but also many of the choicest. The finest mixture ever offered. **Per Pkt., 5c.; 1 oz. 10c.; 2 oz. 15c.; $\frac{1}{4}$ lb., 25c.; 1 lb., 75c.**

Double Mixed Sweet Peas. Made up entirely of double named varieties. **$\frac{1}{2}$ oz. 5c.; 1 oz. 10c.; 2 oz. 15c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.; 1 lb. 60c.**

Red, White and Blue Mixed. Made up in equal proportions of the three colors, Red, White and Blue. **$\frac{1}{2}$ oz. 5c.; 1 oz. 10c.; 2 oz. 15c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 40c.; 1 lb., 70c.**

Blanche Ferry. Earlier than most others, largest flowered' most perfect in form, most beautiful, most fragrant, compact and bush-like in habit. The plant throws up innumerable flower stems, each bearing three or four immense pink and white flowers. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Brilliant. Bright scarlet flowers, borne three on a stem. The flowers retain their full brilliancy of color under the hottest sun. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Pure White. Large pure white flowers of great substance, borne on long stout stems. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Maid of Honor. A fine shaped flower of hooded form. Color white edged with lavender. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Earliest of All. Grows 2 feet high and very free flowering. Color, pink and white, and are produced 10 days earlier than any other variety. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Stella Morse. This is unquestionably one of the loveliest of all Sweet Peas. The flowers are of largest size, faultless form, grow on long stem, with three or four flowers to the stem. Color, a lovely shade of deep cream which, as the flowers grow older, turns into the most delicate primrose with a faint rose-pink. **Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; $\frac{1}{2}$ lb., 35c.**

Navy Blue. An entirely distinct color from any existing variety of Sweet Pea. Color dark blue standards brilliant royal purple, wings pure violet. A most vigorous grower; stems bear from three to four flowers. **Pkt., 5c.; 1 oz. 15c.**

Gorgeous. The most gorgeous in coloring yet produced; flowers of a very large size and borne in threes at the end of long, stout stems. Color bright orange pink shaded rosy lilac. **Pkt., 5c.; 1 oz. 15c.; $\frac{1}{4}$ lb., 35c.**

Emily Lynch. The earliest Pea in existence; wings buff cream, and standards, bright rosy pink. **Pkt., 5c.; 1 oz. 10c.**

One each of the above named Sweet Peas, 35c.

NEW CUPID SWEET PEAS

White Cupid. This charming variety only grows from 6 to 10 inches high, making a dwarf, compact plant, often spreading over an area of from 10 to 15 inches. **Pkt., 5c.; oz. 10c.**

Pink Cupid. Growing from 6 to 8 inches high and shooting up stems about 6 inches long, which bear in full bloom at once from **three to four handsome large flowers.** **Pkt., 5c.; oz. 10c.**

"Beauty Cupid." The flowers are large, three to a stalk, the standards are a delicate rose color, whitening toward the edges, slightly streaked carmine at the base; the wings are suffused ruby carmine. **Pkt., 5c.; oz. 10c.**

"Alice Eckford" Cupid. Flowers of medium size; the standards are rich, creamy white, suffused with flesh pink, the wings are silver white, with a faint pink flush in the center. **Pkt., 5c.; oz. 10c.**

DOUBLE NAMED SWEET PEAS

Double Butterfly. White shaded lavender. **Pkt., 5c.; 1 oz. 15c.**

Double Bride of Niagara. Very fine form. Color rose and white. **Pkt., 5c.; 1 oz. 15c.**

Double Duke of Clarence. The very best of all doubles; rosy claret. **Pkt., 5c.; 1 oz. 15c.**

Double White. Pure snow white, of great substance. **Pkt., 5c.; 1 oz. 15c.**

Double Apple Blossom. Beautiful pink. **Pkt., 5c.; 1 oz. 15c.**

Double Splendor. Superb rose, shaded with bright crimson. **Pkt., 5c.; 1 oz. 15c.**

Double Black. The very darkest shade of red in Sweet Peas. **Pkt., 5c.; 1 oz. 15c.**

1 Pkt. each of 7 Double Named Peas for 25c.

Large-flowering Ten Weeks Stocks.

**Sunflower**

New Ever-blooming Sunflower "Stella." This new annual attains a height of 3 to 4 feet and produces its handsome, well-formed flowers in the greatest abundance all through the summer till late in fall. The flowers are 2½ to 3 inches across, are borne on long stems which rise well above the lively green, small foliage and of purest golden yellow with black disk. It is a splendid flower for cutting and equally as valuable for flower groups or as a solitary plant on the lawn. Per Pkt., 5c., ½ oz., 15c.

STOCKS. (Cut and Come Again)

These popular favorites are so easily grown, so deliciously fragrant and such great beauty that they should have a place in every garden. Very profuse bloomers, and are unsurpassed for bedding edging, or pot culture.

Princess Alice (Cut and Come Again).—A most valuable cut flower variety of the perpetual blooming type. It grows about 18 inches high; throws out numerous side branches bearing clusters of very double pure white fragrant blossoms. A little later than Snowflake. Pkt., 5c.

Snowflake. (Dwarf Forcing 10 Weeks). A very early Dwarf Stock producing large double snow white flowers. Unequalled for forcing. Of exquisite fragrance. The best of all. Pkt., 5c.

Double Giant Perfection 10 Weeks. Tall late-flowering class. Choice mixed. Pkt., 5c.

DWARF LARGE-FLOWERING DOUBLE TEN WEEKS STOCKS.

Pure White . . .	Pkt. 5c.	Canary Yellow . . .	Pkt. 5c.
Blood Red . . .	Pkt. 5c.	Bright Rose . . .	Pkt. 5c.
Double Mixed Large-flowering Dwarf	Pkt. 5c.	Dwarf German Ten Weeks. Fine Mixed	Pkt. 5c.

Stevia

Serrata. A tender perennial, in great favor for cutting purposes; large heads of small white flowers of very graceful effect; suitable for pot culture, flowering in winter, or if sown early, will bloom in the garden the first summer, 1½ feet. Pkt., 5c.

**Thunbergia**

Mixed Colors. Rapid growing annual climbers; splendid for trailing over trellises, fences, etc., beautiful flowers borne in profusion; buff, white, orange, etc. 4 to 6 feet high. Pkt. 5c.

**Boston Smilax**

A very pretty and easily grown pot plant for a trellis. A little plant obtained in the spring, and given plenty of root room in a rich compost, will become a handsome plant in late autumn, covering a pot trellis with its elegant green sprays. In developing the first sprouts make a dwarf growth, but each succeeding shoot is stronger and more vigorous, until six feet or more are reached, when given strong support. Pkt., 5c.

**Solanum Jerusalem Cherry**

Easily-grown plants with ornamental fruit. Especially fine for pots and last a long time in beauty. The fruit is about the size and color of a cherry. The plants can be grown out of doors and then be potted up in September for house use Of easiest culture. Pkt., 5c.

**New "Blood Red" Salvia**

New Salvia, "Blood Red." This new strain of the well-known Scarlet Sage is of the same general type of growth and flower as the original variety, but the large spikes of flowers are distinctly darker, richer, and more intensely glowing in color.

The plants are of strong vigorous growth, and while beginning to bloom quite early in the season will attain a height and breadth of from three to three and half feet when in full flower. Nothing richer and more dazzling in color than this new SALVIA has ever been offered. **Pkt., 10c.; $\frac{1}{2}$ oz., 30c.; $\frac{1}{4}$ oz., 50c.**

Salvia Splendens. The standard sort; an easy, continuous and persistent bloomer. These scarlet flowers surpass the brightest geraniums in color and quantity of bloom. **Pkt., 5c.**

Salvia Farinacea (The Silver Sage). It appears to run altogether to flower, hundreds upon hundreds of tall spikes of silvery lavender blooms rising from a dense mass of foliage during the entire season. Far handsomer is it indeed than most any bedding plant we know of—there being none of this color grown. As isolated specimens it is also very showy. Its long lasting and the graceful sprays were greatly admired when shown at the last exhibition. **Pkt., 5c.**

Salvia Patens. One of the most rare and beautiful of all salvias; a rich deep sky-blue, a blue that is blue—one of the richest blues of all flowers; a perennial. Roots can be kept over winter in the cellar. **Pkt., 10c.**

**SWEET WILLIAM**

The favorite flower of our grandmothers. One of the best edging plants for the border, bearing in early summer large heads of the richest and most varied colors. Very fragrant and a favorite with every one for vases and bouquets.

Improved Single Mixed Colors. Perfect in form, large in size, brilliant and varied in colors. One of the most delightfully fragrant plants we know of. **Pkt., 5c.**

Giant Double Mixed. The single florets often measure 1 inch in diameter, producing enormous umbels on stiff stems in many rich shades of color. **Pkt., 5c.**

**SCHIZANTHUS**

These beautiful "butterfly flowers" are extremely easy to grow, and are among the most continuous bloomers we have. The flowers are large and brilliant, and very unique in form and color, the shape resembling the orchid very much. Colors: crimson, yellow, violet, white, etc. A grand pot plant, and for Winter blooming we do not know of a plant that will prove more satisfactory. **Pkt., 5c.**

Sensitive Plant (MIMOSA)

Curious and interesting annuals, with pinkish-white flowers; the leaves close and droop when touched or shaken. **Pkt., 5c.**

**SCABIOSA**

New Golden Yellow. The color has long been desired in the scabiosa family and is now obtained after years of selections. The flowers are double, of a fine pure yellow color. **Pkt., 5c.**

Black Prince. The flowers are very large and double and nearly black, a beautiful color, very effective as a bunch in a vase. **Pkt., 5c.**

Double Blood-Red. A very striking color. **Pkt., 5c.**

Snowball. Flowers 2 inches in diameter, of purest white and very double. **Pkt., 5c.**

Caucasica. (Hardy.) One of the handsomest hardy perennials we possess; for cutting they are particularly adapted, lasting a long time when placed in water, and their peculiar soft lilac-blue shade is charming. **Pkt., 5c.**

Large-Flowering Scabiosa. Flowers average 3 inches across, very double; valuable for bouquets. Many colors mixed. **Pkt., 5c.**

**New "EMPEROR" SALPIGLOSSIS**

Ease of culture is the first quality that commends the salpiglossis to all amateur gardeners. It thrives in any good garden soil, and in almost any situation, though, like other flowers, it responds readily to good treatment. The New Emperor strain is a very great improvement on the older type in its increased size of flowers, their improved shape and larger variety of colors, and more than all else in their singularly beautiful veinings of gold. These are the only flowers, to our knowledge, that show a glint of gold in their coloring. **Pkt., 5c.**

Salpiglossis Grandiflora. Large-flowering sorts in splendid mixture. **Pkt., 5c.**

VERBENA

Verbenas are more easily grown from seeds than from cuttings, and such plants are more vigorous and free-flowering. Sow seed early and they will bloom for you constantly from June until frost time.

Verbena Mayflower. This truly wonderful seed novelty so closely resembles the trailing arbutus in shape and color of flower and fragrance that it may well be called the Mayflower. It is of the most pronounced trailing or creeping habit; a single plant will often cover a space of from 4 to 6 feet in diameter and will be covered from early summer until late fall with hundreds of clusters of the most delightfully fragrant light pink flowers. **Pkt., 5c.**

Verbena Odorata. This lovely verbena possesses great merit over other varieties, and they are such important ones that it will become a necessity to every garden. It is so hardy, seed can be sown in the open ground early in the spring, where they will quickly germinate, and in a few weeks be in bloom and give a great profusion of beautiful blossoms all summer. The blossoms, instead of being in clusters like other sorts, run up into spikes, usually 3 or 4 inches long, as shown in the cut. It is very sweet scented. Color is pure white. **Pkt., 5c.**

Hardy Lemon Verbena. This, everybody's favorite, is very scarce and high. Leaves so fragrant and refreshing. Grows easily from seed and lives from year to year. It should be in every garden.

Pkt., 5c.

MOSS VERBENAS

Purple Blue. This new Verbena produces a mass of fine moss-like foliage, and as the branches spread out over the ground in all directions, a lovely carpet of mossy green is formed, above which are borne the delicate clusters of purple-blue blossoms in the widest profusion. The effect is most charming. Blooms in a very short time from seed. It is novel and beautiful. **Pkt., 5c.**

Pure White. It is absolutely pure snow white, the blossoms having the same delicate fragrance as the Sweet Alyssum, and form in such profusion that a single plant shows 100 or more clusters at all times; new and fine. **Pkt., 10c.**

Mammoth Verbena

Special Mixture of Verbena. This mixture embraces all that is choice and desirable in verbenas. It includes the mammoth flowered strains of three celebrated verbena specialists, the beautiful and dazzling Defiance, the New Mammoth Snowball, purples, striped and all the auricula-flowered varieties with their large umbels of white-eyed flowers, the New Giant Striped, the new "Mayflower," the new Mammoth reds and pinks, the Fordhook Mammoth and Howard's "Royal Splendor" verbenas. We feel perfectly safe in stating that this mixture of verbenas will eclipse every other strain offered by any other house. **Pkt., 6c.; 3 for 15c.; 1/2 oz. 30c.**

Plants of Hardy Lemon Verbena. To those who do not wish to plant seed of this old favorite we shall be pleased to furnish strong, well-established plants at 10c. each; 3 for 25c.; 7 for 50c.; 12 for 80c.

VIOLETS FROM SEED

Viola Odorata is the well-known English violet, a free-flowing hardy perennial. Easily grown from seed. Succeeds best in a partially shaded, moist place. **Mixed Colors, Pkt., 5c.**

Viola Cornuta. This is a beautiful old border flower which, since its introduction into the summer flower-garden, has been taken in hand by the hybridizer, and many lovely forms of it now enrich our collections. It commences flowering early in the season and continues until frost. **Mixed Colors, Pkt., 5c.**

VINCI, OR PERIWINKLE
Indispensable for borders; a lovely pot plant; leaves a deep glossy green, very thick, large, bright, flat star-shaped flowers; white-rose, and rosy eye. **Pkt., 5c.**

Curled and Crested Zinnia

Tecoma Smithii Dwarf Trumpet Creeper

Belonging to the Trumpet Creeper family, but always growing in dwarf bush form. It has bloomed for us in the open ground from seed planted this Spring. As many as 100 flowers are sometimes produced on a single shoot, the total height of which is not more than 18 inches. The flowers are nearly two inches in length of a rich lemon and dark orange color combined. Pkt., 5c.

ZINNIAS

Crested Zinnia: Curled and Crested. A beautiful strain of this popular plant, showing on each plant from 100 to 200 large double flowers, the petals being crested, twisted and curled into graceful and most fantastic forms. The colors comprise all the beautiful shades characteristic of the Zinnia. **Mixed Colors, Pkt., 5c.**

Lilliput, Mixed Colors. This strain is the acme of beauty and perfection in Zinnias. Plants small and of bushy growth, each one bearing scores of beautiful little blossoms of the most perfect shape and brilliant colors. These charming little Zinnias are gems indeed, and should be in every garden. **Pkt., 5c.**

Mexican Hybrids. These new hybrids, obtained by crossing the double Mexican Zinnia with the double Darwin sorts, produce flowers of the size of a large daisy. They are single, semi-double and double, and the colors are in the most unique, pleasing and numerous variations. In it are found shades peculiar to the marigold, the gaillardia and chrysanthemums. They are extremely pretty, very free-flowering, elegant plants that will please everybody. **Mixed, Pkt., 5c.**

Golden Yellow. Large, perfectly shaped flowers on compact plants. **Pkt., 5c.**

Snowball. The finest pure white. **Pkt., 5c.**

Double Crimson. Very brilliant and extremely double. **Pkt., 5c.**

Mammoth Zinnias. A great improvement over all others. Flowers double and single. Colors dazzling. **Pkt., 5c.**

Fairy Zinnias. Named so because the flowers are so small, also the plants. **Pkt., 5c.**

Zebra or Striped Zinnias. Very curiously marked. Many colors on each flower. **Pkt., 5c.**

One each of the above, 30c.

WALLFLOWER (Gold Lace.)

Wallflowers should be better known. Their ease of growth, their adaptability for pot culture and outdoor bedding, and their peculiarly sweet odor should win favor. They are easily grown and last long as cut flowers.

Eastern Queen. A decided new shade, a bright salmon-red. **Pkt., 5c.**

Double and Single Mixed. Extra fine mixture of named kinds. **Pkt., 5c.**

Red, White and Blue WATER LILIES

Few plants are much more attractive than these beautiful pond lilies; very fragrant and sweet. Grand combination of colors. **Three colors, mixed red, white, blue. Pkt., 5c.**

Hardy Water Lily Plants

We have a nice lot of plants of hardy water lily which are sure to bloom. **15c. each; 3 for 40c.; 9 for \$1.00.**

VEGETABLE SEEDS

ARTICHOKE

The Globe Artichoke is very little grown in America. It is cultivated for its flower heads, which are used in an undeveloped state, cooked like asparagus. Plant seed early in spring, 3 inches apart, in rows 1 foot apart. Cover with fine earth $\frac{1}{2}$ an inch in depth. When 1 year old, transplant to rows 3 feet apart and 1 foot apart in the row, in deep, rich soil. Where the winters are severe the plants must be thoroughly protected with leaves or dry litter, to keep the crowns from freezing.

Green Globe. Pkt., 5c.; oz. 30c.; $\frac{1}{4}$ lb., \$1.00;
lb., \$3.00.

BRUSSELS SPROUTS

Forms numbers of miniature cabbage heads, each being 1 or 2 inches in diameter, or about the size of a large walnut, on strong, erect stems, 2 to 3 feet high. In the fall break the leaves down to give the little heads room to grow, but the top of the stem should be left until after the sprouts are used. The sprouts are used as greens, and become tender and better flavored when touched by frost. Sow seed in early spring, and treat like winter cabbage. 1 ounce will produce about 500 plants.

Improved Dwarf. Pkt., 5c.; $\frac{1}{2}$ oz. 10c.; oz. 20c.

BORECOLE, or KALE

The kales are more hardy than cabbage, and will endure considerable frost without injury; in fact, they are best when touched with frost. When cut frozen they should be immediately placed in cold water. They do not form heads like cabbage, but produce abundance of handsome, curly leaves that are very ornamental and highly prized. The kales are the most tender and delicate of any of the cabbage tribe, and furnish abundant food for the cottagers of Europe, and when well grown and properly prepared are good enough for any one. Sow seed early in June, and transplant. Culture same as cabbage. 1 ounce will sow 300 feet of drill.

Dwarf Green Curled Scotch. Dwarf, beautifully curled and bright green; hardy, and may be cut from the ground all the early part of winter. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 30c.; lb., \$1.00.

CHICORY

Sow chicory seed as early in spring as the ground can be worked, in drills $\frac{1}{2}$ an inch deep and 15 inches apart, and in good mellow soil. The after culture is the same as for carrots. In the autumn the plants will be ready for bleaching, when it is used as a salad. The dried roots of this variety are also used quite extensively as a substitute for and an adulterant of coffee. 1 ounce is sufficient for 100 feet of drill.

Large-Rooted Long Magdeburg. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb. 80c.

Mammoth White Asparagus.

ASPARAGUS

Sow in early spring in drills 2 inches deep and 1 foot apart between rows. After the plants are one or two years old transplant them into permanent beds. Set them then 15 inches apart each way and cover 4 inches deep. Manure plentifully each fall, to be forked in very early in the spring, after which sow on a good dressing of salt. 1 ounce to 50 feet of drill.

Columbian Mammoth White. A distinct variety of strong, vigorous growth, producing very large white shoots that in favorable weather remain white as long as fit for use. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb. 25c.; lb. 70c.

Conover's Colossal. A standard sort of large size, tender and excellent quality. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb. 60c.

Palmetto. Extensively grown for the early markets, selling at an advance over other varieties on account of its mammoth size and regularity. Quality not excelled. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb., 70c.

ASPARAGUS ROOTS

The purchase of roots one year old will
save a year's time.

Conover's Colossal and Palmetto. 12 for 20c.; 50 for 65c.; 100 for \$1.00.

Columbian Mammoth White. 12 for 25c.; 50 for 75c.; 100 for \$1.25.

Bean—Stringless Green Pod

Bean—Dwarf Kidney Wax

BEANS

Bush and Pole

Fuller's White Wax Large Seeded Stringless Bush Bean

A large white-seeded stringless bush bean, of strong healthy growth, with handsome lemon-yellow pods which while flat are very meaty. The large plump pure white beans are of the finest quality for winter use.

The plants make stocky robust bushes fifteen to eighteen inches high, with strong branches which hold the pods well up from the soil and insure them from rusting during wet weather. The pods are borne abundantly; they are remarkably handsome in appearance and of the finest quality. The pods measure from five to six inches in length, one-half inch or more in breadth, and are distinctly thick and meaty when ready for the table. They are a bright lemon-yellow in color and at all stages of growth are *entirely stringless* and free from any muslin like fiber. **Pkt., 5c.; pt., 25c.; qt., 40c.**

Stringless Green Pod (Bush). For either the market or home garden, no other green-podded bean is so satisfactory, while by frequent plantings fine pods may be had in constant succession from spring until cut off by heavy frosts in the fall. Combined with the extra hardiness and early maturity we have **unequalled quality and handsome appearance** of pods. The pods are a rich green, very round and straight, 5 inches long, solidly meaty and broad. **Pkt., 5c.; pt., 25c.; qt., 40c.**

Dwarf Kidney Wax Bean (Bush). Hardy and productive, pods long, broad, flat, and of a delicate waxy yellow, brittle and entirely stringless. The yield considerably exceeds that of the common Golden Wax and is equally as early. **Pkt., 5c.; pt., 25c.; qt., 40c.**

Burpee's Bush Lima, comes absolutely true from seed. The bushes grow 18 to 20 inches high, of stout growth and always erect, yet branching so vigorously that each plant develops into a magnificent circular bush from **2 to 3 feet in diameter.** It is an immense yielder, the handsome large pods being well filled with very large beans identical in size and luscious flavor with the well-known large pole Limas. **Pkt., 7c.; pt., 25c.; qt., 45c.**

Lazy Wife (Pole). The pods are produced in great abundance and measure from 6 to 8 inches in length; they are broad, thick, **very fleshy** and **entirely stringless.** The pods retain their rich, tender and stringless qualities until nearly ripe, and are unsurpassed in all stages. Each pod contains 6 to 8 round, white beans, which make excellent winter shell beans. They are late to mature, but are valuable to extend the season. This is an excellent bean and is sure to give satisfaction. **Pkt., 5c.; pt., 25c.; qt., 40c.**

Early Golden Cluster Wax (Pole). A desirable sort, only 7 days later than the Dwarf Golden Wax. The pods are tender, 6 to 8 inches long, borne profusely in clusters of 3 to 6, and are of a beautiful golden-yellow color, which they retain a long time after being picked. They snap easily, are stringless, cook tender and are delicious. **Pkt., 7c.; pt., 25c.; qt., 45c.**

King of the Garden Lima (Pole). It is claimed to be larger, stronger growing, more productive, and with larger pods and beans than the large White Lima. It is a favorite with market gardeners on account of its large pods. If two vines are left to grow on a pole it will come into bearing sooner and will make larger pods. **Pkt., 5c.; pt., 25c.; qt., 40c.**

Bean—Golden Cluster

Detroit Dark Red Turnip.

Long Smooth Blood Beet.

Cauliflower

CAULIFLOWER

Extra Early Snowball. An extremely early dwarf variety, producing magnificent white heads of the finest quality. Its dwarf habit and short outside leaves allow it to be planted as close as 18 or 20 inches apart each way. Excellent for family use and for market. **Pkt., 20c.; $\frac{1}{4}$ oz., 70c.; $\frac{1}{2}$ oz., \$1.00.; oz., \$2.00.**

Erfurt Earliest Dwarf. Until we had, after years of selection, perfected Snowball, the Erfurt was a leader, and to-day this variety will stand the test with any other extra early sort. It is very dwarf in habit, producing pure white heads of great solidity and finest quality; quite desirable for forcing or for planting in open ground. **Pkt., 10c.; $\frac{1}{4}$ oz., 35c.; $\frac{1}{2}$ oz., 60c.; oz., \$1.00.**

Veitch's Autumn Giant. One of the finest late varieties, of robust habit; heads large, compact and thoroughly protected by the leaves. **Pkt., 5c.; $\frac{1}{4}$ oz., 20c.; $\frac{1}{2}$ oz., 35c.; oz., 60c.**

BEETS

Crosby's Egyptian. A carefully selected strain of Egyptian, as early as the original, but larger, thicker, smoother, and of better quality. Flesh deep blood red. It is a rapid grower, attaining a usable size quicker than any other variety, and does not become woody with age. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 60c.**

Extra Early Egyptian Blood Turnip. A standard sort, 10 to 12 days earlier than the old Blood Turnip; fine for forcing and for first early crop out of doors. Roots rich, dark crimson, with very small tap roots; flesh dark blood red, zoned with lighter shade; crisp, sweet and tender when young. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 70c.**

Detroit Dark Red. The uniformity of size, shape and fine appearance puts this variety at once among the leaders of this most desirable of all vegetables. Tops small and upright, admitting of close planting. Roots medium in size, globular or oval, and very smooth; skin a dark blood red flesh deep bright red, zoned with a lighter shade, fine grained, crisp, tender and sweet, remaining so long after many sorts become woody. This is certainly a market gardener's beet. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 70c.**

Long Smooth Blood Red. Tops large, with good sized-long roots, tapering and growing even with the surface; dark red; flesh very sweet and tender, remaining so when kept till spring. A popular winter sort. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 50c.**

Sugar Beets for the Table. Although sugar beets are grown principally for sugar-making and for stock-feeding, they are very desirable for table use, being more tender, sweeter, and of better flavor than any other sorts grown especially for that purpose. Everyone who has a small garden should try them. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 50c.**

Large-Ribbed Swiss Chard

Swiss Chard, or "Spinach Beet."

Large-Ribbed White. This variety does not make edible roots like the regular garden beets, but is grown for the broad, white leaf-stalks, which are bunched and cooked in the same manner as asparagus and make a delicious summer vegetable. The young leaves may be gathered also and cooked like spinach, and by many are considered more delicious in flavor. **Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 60c.; postpaid.**

Famous Long Island Grown Cabbage Seed

CULTURE. For very early use sow in January or February in hotbeds; prick out when the plants are strong enough 2 feet apart and 18 inches in the row. For a succession sow in the open ground the last of March or early in April. The autumn and winter varieties sow in April or early in May, in shallow drills, 3 or 4 inches apart, transplant early in July, in rows $2\frac{1}{2}$ feet apart, and 2 feet in the row. Cabbage succeeds best in a fresh, rich soil, well manured, and deeply dug or plowed. The late plants are subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To preserve the plants sprinkle them with wood ashes, air-slacked lime, plaster, slug-shot or tobacco dust early in the morning while the plants are wet with dew.

Early Wakefield

CABBAGE Extra early varieties. $\frac{1}{4}$ lb. will produce plants for 1 acre.

Early Jersey Wakefield. The earliest and hardest heading of extra early cabbages. Most gardeners depend upon it for the bulk of their extra early crop. Our stock is grown and selected with the greatest care, and there is none better, and there are few as good. Heads conical, very compact, solid and of excellent quality. The thick, stout leaves, and compact habit make it the best for wintering over and very early setting. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 60c.; 1 lb., \$2.00.**

New Early Spring. This valuable acquisition is an extra early variety, coming as early as Wakefield, and yielding one-third more. The heads are round, slightly flattened, and very solid. It has few small outer leaves, allowing it to be planted close. Truckers or private gardeners will make no mistake in growing this valuable variety. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 50c.; 1 lb., \$1.75.**

CABBAGE Late fall varieties. 1 pound will produce about 32,000 plants.

Improved Danish Ballhead. Hardest heading variety known. Remarkable for great weight and long-keeping qualities. The fame of this particular strain has become worldwide, and it stands without a peer. It commands a higher price in the market than any other variety. The heads are of medium size, with few outer leaves, admitting of close planting; exceedingly fine, hardest of all, tender, crisp, solid, with no waste heart. Will average 6 pounds per head. **Pkt., 5c.; oz. 25c.; $\frac{1}{4}$ lb., 75c.; 1 lb., \$2.50.**

Selected Premium Late Flat Dutch. No introduction is necessary for this old, reliable, and popular cabbage. There are many so-called strains of this valuable variety, but what we offer is our own, having for years taken great pains to maintain and develop all its good qualities. It produces large, solid heads of superior quality, keeping in best condition for a long time. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 50c.; 1 lb., \$1.75.**

RED CABBAGE

RED DRUMHEAD. (Improved Large Red Dutch.) The well-known standard. Heads of large size,

slightly rounded, seven to eight inches in diameter. The most popular pickling cabbage. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 60c.; 1 lb., \$2.00, postpaid.**

Mammoth Rock Red. The largest and most solid of the Red varieties; a sure-heading sort and tender. Color is deep red, both outer leaves and inside head. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 75c.; 1 lb., \$2.50.**

CABBAGE Early fall varieties. 1 ounce of seed will produce 2,000 plants.

All Seasons. A very superior, sure-heading, long-keeping variety. As its name indicates, it can be planted early or late. It would be classed as a second early variety; but whether medium early, main crop, or late use, it is unsurpassed by any other sort. The gardeners of New Jersey and Long Island have for years made this their main crop for supplying the New York City markets, and it is now the standard there. The heads are large, nearly round, somewhat flattened, very solid, and in quality the best. Its ability to stand the summer heat and dry weather is quite remarkable. In fact it is a leader and will remain so for years to come. We have for years had this seed grown for us by a specialist, and its trueness and purity have never been equaled. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 50c.; 1 lb., \$1.75.**

Autumn King, or World Beater. A comparatively new strain of late cabbage, and one which will supersede the old Mammoth Marblehead Cabbage of years ago. The Autumn King grows to an enormous size, making heads as solid as a rock, and comes uniformly true to type. It can be relied upon to produce a greater weight of crop from the same space of ground than most of the late sorts, having few outer leaves. **Pkt., 5c.; oz. 20c.; $\frac{1}{4}$ lb., 50c.; 1 lb., \$1.75.**

Flat Dutch.

Sewell's Evergreen

Improved Early Champion. The Earliest Large Sweet Corn. Produces ears 12 inches long in 60 days. This new variety is without question the earliest large sweet corn yet introduced, being only a few days later than the first early small sorts. Ears nearly as large as the Mammoth, 12-rowed; pure white kernels, with medium-sized white cob; very sweet, tender and full of milk, yielding two and three ears to the stalk. The best kind for early and late planting. Pkt., 5c.; pt., 25c.; qt., 40c.

Crosby's Early. A most excellent early variety of fine quality. Ears of medium size, 12-rowed or more, with short, nearly square grains which are very tender and sweet. This is the sort so largely grown in Maine for canning, and it is the use of this variety rather than any peculiarity of soil that has given Maine sweet corn its reputation for quality. Pkt., 5c.; pt., 20c.; qt., 35c.

Mammoth White Cory

Country Gentleman. (Late.) The most delicious of all sweet corns. The ears are somewhat smaller and less showy than the coarser varieties, but for private family use, where quality is preferred to size, it has no equal. The cob is very small, giving great depth to the kernels. Time of ripening a little later than Stowell's Evergreen. Pkt., 5c.; pt., 25c.; qt., 35c., pk., \$1.25.

Improved Early Champion

Queen's Golden Pop Corn. Ears large, kernels yellow, and pops perfectly white. Its quality and handsome appearance when popped are unexcelled. Pkt., 5c.; pt., 20c.; qt., 35c.

SWEET CORN

Stowell's Evergreen. (Late.) The most popular of all. If planted at the same time with earlier kinds will keep the table supplied until October. It is hardy and productive, very tender and sugary, remaining a long time in a fresh condition suitable for cooking. Pkt., 5c.; pt., 20c.; qt., 35c.

Mammoth White Cory. The Cory has for a long time been the earliest sweet corn on the market. In the new Mammoth White Cory we have a variety that is nearly as early, but is larger than that well-known favorite. The ears are 12-rowed, with no opening between the rows at the base, and are symmetrical and handsome. The grains are large, broad, very white, and of excellent quality for an early sort. Pkt., 5c.; pt., 20c.; qt., 35c.

WHITE Evergreen

The most valuable Sweet Corn for main-crop! It is a high-bred ideal type of Stowell's Evergreen —only it is PURE WHITE! The stalks are of strong vigorous growth, six to seven feet high. The ears are very large and average large; they are uniformly well filled to the tip with long slender grains of the purest whiteness and most delicious sweet flavor. Sweet and tender, of the very finest quality. When in the green state both cob and grains are WHITE AS SNOW. Pkt., 5c.; pt., 25c.; qt., 45c.

CARROTS

Deeply tilled soil of a light sandy loam is the most suitable for carrots. Land that has been manured heavily the year previous is the best. Cover the seed about one-half inch in depth, and press the soil firmly over the seed with the feet or a roller. For early use sow as early in spring as the ground can be worked, and for late crop from May 1st to June 1st.

Chantenay. One of the most perfect and uniform, intermediate in size and shape. The flesh is of a deep golden orange color, very tender. For table use one of the best. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb. 80c.

Danvers. A handsome shaped carrot of good size. Midway in form between Long Orange and Early Horn class and grows very smooth. One of the best for stock feeding. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb. 80c.

Guerande, or Ox-Heart. A very short and thick stump-rooted variety, either for family use or market, and profitable for feeding. It is of extra fine quality and very productive. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb.. 25c.; lb. 80c.

Improved Long Orange. A well-known sort, roots long, thickest near the crown, tapering regularly to a point, color deep orange. It is a good keeper, of fine quality; for winter use, and extensively grown for stock feeding. Pkt., 5c.; oz. 10c.; $\frac{1}{4}$ lb., 25c.; lb. 80c.

The Best of the Standard CELERIES

Winter Queen Celery. The best late or winter keeper

Winter Queen. Most popular of all Celeries for winter. Since the introduction of this very valuable celery, it has become the most popular of all as a late winter keeper, frequently being seen and selling at high prices in the month of May after all other celeries are done. Of vigorous growth, each plant makes a large number of fine stalks (magnificent large heart of rich golden yellow) which are broad, thick, heavily ribbed. Stored for winter it is an excellent keeper, and when taken out the blanched stalks are firm and crisp; entirely free from strings, brittle, and of sweet flavor. Most highly recommended. **Pkt., 5c.; oz., 20c.; ¼ lb., 65c.; lb., \$2.25.**

Giant Pascal. This is a green-leaved variety developed from the Golden Yellow Large Solid, and is an excellent sort for fall and winter use. It branches very quickly to a beautiful yellowish-white color, is very solid and crisp and of a fine nutty flavor. The stalks grow broad and thick, a single plant making a large bunch. With rich soil and high culture this variety will be wholly satisfactory. Especially recommended for the South, where it is prized more than almost any other kind. **Pkt., 5c.; oz., 20c.; ¼ lb., 60c.**

Pink Plume. The red celeries are harder and better keepers than the white and yellow sorts, and are of very fine quality, possessing a peculiarly rich nutty flavor. This variety possesses all these good qualities, while its delicate pink color gives it a handsome appearance. A self-blanching variety, of strong and vigorous habit. **Pkt., 5c.; oz., 20c.; ¼ lb., 60c.**

Golden Self-Blanching. This is without doubt the best celery for general use. The ribs are perfectly solid, crisp, brittle and of delicious flavor, surpassed by no other variety, while it has the decided merit of being self-blanching to a very remarkable degree. The heart is large, solid and of a beautiful rich, golden-yellow color. **Pkt., 5c.; ¼ oz., 20c.; oz., 35c.; lb., \$1.00.**

White Plume. A variety specially adapted to cultivation by amateurs, as its inner stalks and leaves are naturally white and do not require blanching by the old process of high banking. By simply tying up the stalks and drawing up the soil with the hoe, the work of blanching is complete. It is ornamental, tender, crisp and of good flavor. **Pkt., 5c.; oz., 20c.; ¼ lb., 60c.**

Celeriac (Turnip-Rooted Celery). The root of this celery is turnip shaped, tender, sweet and of strong flavor. May be cooked like turnips; used largely for seasoning meats and soups. **Pkt., 5c.; oz., 15c.; ¼ lb., 40c.**

Cucumber—Arlington or White Spine

CUCUMBER

Improved Early White Spine. One of the most popular varieties, both for marketing and table use. Vines vigorous, fruiting early and abundantly, fruit uniformly straight and handsome, light green with a few white spines, flesh crisp and of fine flavor. Largely grown for forcing and extensively grown in the South for shipping to the Northern markets early in the season. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; 1lb., 90c.**

Livingston's Evergreen. This new variety is proving of great value. It is very hardy and probably the most prolific of all varieties. In addition to being so wonderfully prolific, it is very early, and the cucumbers retain their beautifully green color longer than any other sort. It is one of the very best varieties for slicing, as it is very crisp and of good quality, and as it produces fruit of medium size it is likely to be of much value for pickling purposes. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; 1lb., 90c.**

Japanese Climbing. While all cucumbers are running vines, yet this variety is much more creeping or climbing in its habit, so much so that it quickly climbs on poles or trellises in the same manner as the pole Lima bean. It is entirely distinct. The quality is splendid. It is well adapted for pickling as well as for slicing for salads. The great advantage of having a cucumber which can be trained on a pole or a fence will be apparent to all. **Pkt., 5c.; oz., 15c.; ¼ lb., 40c.; 1lb., \$1.50.**

Extra Early Green Prolific or Boston Pickling. Same as a good stock of Green Prolific, but from ten days to two weeks earlier. Those who grow exclusively for pickling will find in this something they have long desired. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; 1lb., 90c.**

West India Gherkin. A very small oval-shaped, prickly variety; grown exclusively for pickling. **Pkt., 5c.; oz., 15c.; ¼ lb., 50c.; 1lb., \$1.25.**

EGGPLANT

When well grown and sliced and fried in batter, this is a most delicious vegetable, and should find a place in every garden. It is a tender plant, requiring a strong uniform heat, and should be started in the hotbed early to mature its fruit in the Northern States. Care is necessary at transplanting and in the earlier stages of growth to prevent the young plants being chilled, for if they receive the least check they never recover. Those who have no hotbeds can sow a few seeds in boxes in the house where a temperature of 75° can be maintained. Plant out early in June 2½ feet apart. Hand glasses are useful for covering at time of transplanting. One ounce will produce about 1,500 plants.

New York Improved Large Purple. The leading market variety. Plants of strong growth with large foliage, and in rich soil very productive. The fruits are of large size with smooth, glossy, deep purple skin. This is the finest eggplant in cultivation. **Pkt., 5c.; oz., 25c.; ¼ lb., 75c.**

The Pearl. This comes from Georgia and produces magnificent "eggs," as large and fine as we have ever seen of any variety, with an attractive pure white skin. The plants are very productive and the fruits are of finest quality. **Pkt., 5c.; oz., 25c.; ¼ lb., 75c.**

Early Long Purple. Hardier and much earlier than the large New York Purple, succeeding farther North. Fruit from 6 to 10 inches long. **Pkt., 5c.; oz., 20c.; ¼ lb., 60c.; 1lb., \$2.00.**

Eggplant—New York Improved

DEACON LETTUCE.
From a Photo-
graph.

Deacon Lettuce

LETTUCE

There is no vegetable which is more universally used than this, and yet comparatively few people ever eat really **good** lettuce, as that obtainable in the market is generally of the poorer but more showy varieties, and so wilted as to be inferior to well-grown heads of the better sorts, fresh and crisp from the garden. We earnestly urge all of our readers who can do so to grow their own lettuce, and use some of the following varieties:

Deacon. This magnificent lettuce stands hot weather better than any other of the rich butter varieties and is justly *most popular*. Plants make firm heads, nearly as large and almost as solid as a cabbage. The heads are light green outside, while the inner blanched portion is beautiful cream-yellow, of delicious rich buttery flavor. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25, postpaid.

Black-Seeded Simpson. The most popular sort of all the non-heading varieties. One of the best for use under glass as well as for early outdoor planting. The plants form large, loose heads; outer leaves a light yellowish green, with inner leaves blanched almost white. Resists the heat and remains long in a good edible condition. For this reason it makes a popular variety for all market gardeners' use. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25.

Denver Market. An early head lettuce, good either for forcing or open ground. The leaves are beautifully curled and crimped (like the Savoy Cabbage), very crisp and tender and of excellent flavor. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.15.

Hanson. Heads very large from two to three pounds each, hearts quickly and stands the summer well; quality excellent. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25.

California Cream Butter. A grand good butter lettuce. The heads are of good size, round and solid; outside medium green; within, the leaves are a rich cream yellow color. Rich and buttery in taste. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25.

New Trianon Cos, or Celery Lettuce. The finest of all the Cos sorts; leaves when bleached are stiff like celery stalks, and can be eaten in the same manner. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25.

Hanson Lettuce

LEEK

One ounce will sow one hundred feet of drill, and produce about one thousand plants.

NEW GIANT ITALIAN

This new leek from Italy is fully twice the size of the ordinary London leek, and much handsomer in appearance. Like the Italian onions, it is very mild and agreeable in flavor; extremely hardy and a fine keeper. All who have grown it were astonished at its large size and fine white appearance. It is by far the best leek that can be grown either for the market or home use. **Pkt.**, 5c.; **oz.** 20c.; $\frac{1}{4}$ lb., 50c.; **lb.** \$1.75.

Large American Flag. Previous to our introduction of the Giant Italian, this was the favorite variety. Very fine and large. **Pkt.**, 5c.; **oz.** 15c.; $\frac{1}{4}$ lb., 40c.; **lb.** \$1.25.

ENDIVE

Endive is an excellent autumn and winter salad. Sow seed late in the spring, or even as late as July, in shallow drills 15 inches apart, and when plants are strong thin cut to about a foot apart. To blanch, gather up the outer leaves over the center of the plant and tie them together at their tips. Sow one ounce to 100 feet of drill.

Green Curled. The hardest variety. Leaves dark green finely cut, easily blanched to a fine white. $\frac{1}{4}$ oz., 5c.; **oz.** 20c.; $\frac{1}{4}$ lb., 50c.

White Curled. Foliage somewhat coarser than the Green Curled, moderately dense, pale green. Very attractive. $\frac{1}{4}$ oz., 5c.; **oz.** 20c.; $\frac{1}{4}$ lb., 50c.

MUSTARD

Very hardy. Seed can be sown as soon as the soil is free from frost, in shallow drills. Cut when a few inches high. It grows rapidly, and several sowings may be made. The young leaves are used for spring salad.

Ostrich Plume. Exceedingly ornamental as well as useful. The leaves are long, ruffled and frilled, and curved as gracefully as an ostrich plume. For salad it is better than any other variety, and for boiling it is superior to spinach. $\frac{1}{4}$ oz., 5c.; **oz.** 20c.; $\frac{1}{4}$ lb., 65c.; **lb.** \$2.00.

White. Fine for salad or culinary purposes. $\frac{1}{2}$ oz., 5c.; **oz.** 10c.; $\frac{1}{4}$ lb., 25c.

CRESS—Peppergrass

Australian. Leaves delicate green; flavor mild and fine. $\frac{1}{4}$ oz., 5c.; **oz.** 20c.

Water. Does well in mucky situation but better on the edges of streams in shallow water. It needs no after care. **Pkt.**, 5c.; **oz.** 40c.

Champion Market

Emerald Gem

Kleckley's Sweet Melon.

McIvor's Sugar Melon

flavor, and is ten to twelve days earlier than either. In shape about one-third longer than thick; color of skin dark green and beautifully striped; rind thin, but remarkably hard; flesh a bright scarlet, sweet and juicy. A strong vigorous grower and exceedingly productive, making it altogether the melon for the home market or garden. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Mammoth Ironclad. This variety, like the preceding, grows to an immense size. It is a remarkably strong grower, very productive, and an excellent keeper. The skin is beautifully striped with light green. The hardness and tenacity of its shell give it the name of Ironclad. Flesh bright red, solid, crisp and of excellent flavor. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Kleckley Sweet. This new variety is one of the finest-flavored melons grown. The vines are strong and vigorous; the fruit oblong in form, 18 to 20 inches long and 10 to 12 inches in diameter; skin dark green; flesh bright red, extremely sweet, melting and luscious. Ripens close to the rind, which is only about one-half inch in thickness. The large, solid heart does not crack open when ripe. Not a shipper, but highly recommended for the home market and family garden. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

MUSKMELON

Champion Market. The flesh is thick, light green in color and of very rich, sweet flavor. It is as early as the Netted Gem, which it resembles in shape and appearance, but is fully three times larger; very prolific and a good shipper. **Pkt., 5c.; oz., 10c.; ¼ lb., 35c.**

Long Island Beauty

Fruits of large size, well flattened, heavily ribbed and netted. Of very handsome appearance and fine quality. *Most highly recommended;* it ripens as early and is similar to Hackensack; but superior. **Pkt., 5c.; oz., 15c.; ¼ lb., 35c.: per lb., \$1.25.**

Emerald Gem. Color dark green, flesh thick and of a delicate salmon color. For table quality it ranks very high. It is one of the sweetest melons grown, and especially suited to the home garden. **Pkt., 5c.; oz., 10c.; ¼ lb., 35c.**

Early Hackensack. We offer under this name a very distinct stock, different and much superior to that often sold as Extra Early Hackensack. The fruit is medium sized, nearly round, with deep ribs and very coarse netting. The flesh is green, a little coarse, but very juicy and sweet. **Pkt., 5c.; oz., 10c.; ¼ lb., 35c.**

Improved Large Green Nutmeg. Vines vigorous, hardy, productive; fruit very large, round, slightly flattened at both ends, ribbed, covered with coarse netting; flesh very thick and of the highest flavor. **Pkt., 5c.; oz., 10c.; ¼ lb., 35c.**

WATERMELON

McIvor's Wonderful Sugar. This is of Southern origin, and is one of the very best melons in cultivation. It excels both in beauty and lusciousness, being exceedingly sweet and juicy. The melons attain great weight and size; oblong in shape, the rind showing broad stripes of light and dark green. The flesh is a rosy pink, perfectly solid and stringless from rind to core, very crisp and of delicious flavor. For the home garden or general market it is unrivaled. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Sweet Heart. A magnificent new and distinct shipping variety of the largest size, nearly globular in shape; skin a bright, beautiful mottled green; rind thin; flesh bright red, firm and solid to the center, heavy, but crisp, melting and exceedingly sweet. A good keeper, and improves in quality for a long time after ripening. Vine vigorous and productive, ripening its fruit early. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Dixie. A decidedly popular melon. A cross between Kolb's Gem and the old reliable Mountain Sweet. It surpasses Kolb's Gem as a long distance shipping melon, while it fully equals the Mountain Sweet in its excellent

flavor. A strong grower and exceeding-ly productive, making it altogether the melon for the home market or garden. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Mammoth Ironclad. This variety, like the preceding, grows to an immense size. It is a remarkably strong grower, very productive, and an excellent keeper. The skin is beautifully striped with light green. The hardness and tenacity of its shell give it the name of Ironclad. Flesh bright red, solid, crisp and of excellent flavor. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

Kleckley Sweet. This new variety is one of the finest-flavored melons grown. The vines are strong and vigorous; the fruit oblong in form, 18 to 20 inches long and 10 to 12 inches in diameter; skin dark green; flesh bright red, extremely sweet, melting and luscious. Ripens close to the rind, which is only about one-half inch in thickness. The large, solid heart does not crack open when ripe. Not a shipper, but highly recommended for the home market and family garden. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; lb., 75c.**

PEANUTS

Peanut, Mammoth Virginia. The Mammoth Virginia peanut is the most profitable variety to grow, and is more desirable than the common spreading kind, because more easily cultivated; very erect stems and upright foliage, and the largest pods and kernels of any variety; also yields fewer imperfect pods. The vines make excellent forage. **Pkt., 5c.; Pt., 20c.; Qt. 35c.**

Spanish Peanut. The earliest variety grown; pods are small, but remarkably solid and well filled, and yield per acre very large; can be cultivated with the plow. Because of its early habit and easy cultivation it is the best variety to grow for fattening hogs. **Pkt., 5c.; Pt., 15c.; Qt., 25c.**

Extra Selected Yellow Globe Danvers.

ONIONS

In onion culture, thorough preparation of the ground, careful sowing and the best of after culture, though essential for a full yield, will avail nothing unless seed of the best quality be used. Given the same care and conditions, the product from two lots of onion seed of the same variety but of different quality may be so unequal in the quantity of merchantable onions that it would be more profitable to use the good seed though it cost 20 times as much as the other.

Our thorough equipment and long experience in growing onion seed of the very best quality enable us to say without hesitation that our stock is fully equal to any and superior in quality to the most that is offered.

Although onions are often raised from sets and from division, by far the best and cheapest mode of production is from seed. The facility with which seed is sown and the superior bulbs it produces recommend it for general use.

Extra Selected Yellow Globe Danvers. The finest shaped, best colored and largest cropper of any of the yellow onions, and not to be compared with the ordinary stocks of Yellow Globe Danvers. We grow this strain from carefully selected bulbs, everything being rejected that does not come up to the standard in shape and size. By this careful system of selection we have produced an onion entirely distinct from the old type of Yellow Globe Danvers. Its points of superiority over the ordinary Yellow Danvers are earliness of ripening, smallness of neck, perfect globe shape and uniformity of shape and color. It is an immense cropper and will yield more marketable onions to the acre than any strain we have ever tried. **Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 75c.; 1b., \$2.50.**

Large Red Wethersfield. The standard red variety, and owing to its great productiveness the most profitable red onion for the market gardener. Form somewhat flattened, skin a deep purplish red, flesh purplish white. The best variety for poor or dry soils. **Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 50c.; 1b., \$1.75.**

Southport White Globe. Handsome large-sized, globular in form. Skin and flesh a pure white. The demand at all times being fully up to the supply, the grower is well repaid for all expense and labor. To succeed in producing good, pure white onions, the crop should be pulled just as the stalks begin to fall down, and then allow them to dry off in the open air, keeping them from rain or dew, which would cause discoloration of the bulbs. **Pkt., 5c.; oz., 30c.; $\frac{1}{4}$ lb., \$1.00; 1b., \$3.25.**

Mammoth Silver King. An enormous onion, resembling the White Italian Tripoli, but is larger, slightly later and a better keeper, making it better suited for fall and early winter market. Skin silvery white; flesh pure white, very tender and mild flavored. **Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; 1b., \$2.00.**

Australian Brown. This new sort is distinct from all other onions. It is uniform in size and shape, wonderfully hard and solid, and will keep almost indefinitely. Ripens extremely early, and never makes scallions. It is of medium size, round, with skin of a deep amber-brown; flesh mild and agreeable. When better known it will be used extensively. **Pkt. 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; 1b., \$2.00.**

Mammoth Prize-Taker. Genuine seed of this variety produces the handsomest, largest Yellow Globe Onion in the list. Our seed we have specially grown for us. Our **American grown seed** produces bulbs enormous in size, and the yield per acre is larger than that of any other variety. While not so good a keeper as our Yellow Danvers, it is a valuable sort for immediate or early fall use. The skin is of a rich yellow straw color; flesh white, sweet, mild, and tender. Very attractive when crated, as generally sold. Early. It readily brings double the price of other sorts. **Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; 1b., \$2.00.**

KOHL RABI

The Kohl Rabi is a vegetable intermediate between the cabbage and turnip, and combines the flavor of each. The edible part is a turnip-shaped bulb formed by the enlargement of the stem. When used for the table, this should be cut when quite small, as it is then very tender and delicate, but if allowed to reach its full size, it becomes tough and stringy.

Culture. Sow in light, rich soil, as early as possible, in drills 16 inches apart, and when well established, thin to 6 inches apart in the row. One or two plantings at intervals of 10 days will give a succession until hot weather, when they fail to grow well; but plantings may be made the later part of July for fall use.

Early White Vienna. Very early; small, handsome white bulb. Best early variety for table. **Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; 1b., \$2.00.**

Early Purple Vienna. Nearly like the last, except in color. This is a bright purple. The leaf stems are tinged with purple. **Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.; 1b., \$2.00.**

Nott's Excelsior. The Earliest and Best Pea in Cultivation.

PEAS—Early, Late, Tall, Dwarf

Nott's Excelsior. The earliest and best dwarf pea in cultivation. Height, 15 inches. As hardy as the earliest market sorts, but in quality equal to the Little Gem. It outyields that variety and the American Wonder 20 to 30 per cent., and is as early as the latter. The pods are about three inches long and each pod contains from 6 to 8 large peas, which are tender and of unusually fine flavor. It not only yields more heavily in bulk of pods than other dwarf varieties of the same season, but also of shell peas. Pkt., 7c.; pt. 25c.; qt. 45c.

Improved Stratagem. The best of the large-podded late sorts. Height, 18 inches. The old Stratagem pea has always been one of the best late sorts for quality, but it was a shy yielder, which impaired its usefulness. The improved Stratagem has all the sterling qualities of the original type and is one of the heaviest yielders. The vines are of medium height, very stocky; the pods are of immense size, well filled with very large dark-green peas. Pkt., 7c.; pt. 25c.; qt. 45c.

Champion of England. One of the best late peas for the market gardener or private garden, superior flavor, exceedingly productive. Universally admitted to be one of the richest and best-flavored peas grown, and very productive. Height, 4 or 5 feet; seed whitish green and much shriveled. We consider this equal in quality to any in cultivation, and the best of its season either for the amateur or market gardener. Pkt., 7c.; pt. 25c.; qt., 45c.

Bliss' Everbearing. For the private garden this excels in every respect—flavor, size of pea and productiveness. A variety maturing soon after the Advancer, and continuing a long time in bearing. Vine stout, about 2½ feet high, bearing at the top 6 to 10 broad pods. If these are removed as they mature, and the season and soil are favorable, the plant will throw out branches bearing pods which will mature in succession, thus prolonging the season. Peas wrinkled, large, cooking quickly and very tender, of superior flavor. Pkt., 7c.; pt. 25c.; qt. 45c.

American Wonder. A variety nearly as early as the First and Best, with stout branching vines about 9 inches high, and covered with well-filled pods containing 7 or 8 large, exceedingly sweet, tender and well-flavored peas. Dry peas, medium sized, much wrinkled, pale green. We have taken great pains in growing our stock and know it to be much better than that usually offered. Pkt., 7c.; pt. 25c.; qt., 45c.

Little Gem. (McLean's.) A green wrinkled variety which comes into use a few days later than the First-of-all or improved Daniel O'Rourke. 18 inches high, very prolific and of excellent flavor. Pkt., 7c.; pt. 25c.; qt. 45c.

J. ROSCOE FULLER & CO.

Gentlemen:—From the Emerald Gem Canteloupe seed I bought of you I raised melons to weigh 11 pounds.

Oct. 1st, 1907, Va.

MRS. SALLIE H. CARTER.

Improved Stratagem

PARSLEY

Very useful for flavoring soups and stews and for garnishing. The green leaves are used for flavoring, or they may be dried crisp, rubbed to a powder, and kept in bottles until needed.

Champion Moss Curled. A compact growing, finely cut and densely curled variety, of a bright green color. Owing to the fine color and density of foliage, it is one of the most popular sorts. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Turnip-Rooted, or Hamburg. The root, which resembles a small parsnip, is the edible portion of this variety. Extensively grown and used for flavoring soups, etc. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Parsley

PARSNIP

The value of the parsnip as a culinary vegetable is well known, but is not generally appreciated at its full value for stock feeding. On favorable soil it yields an immense crop of roots, which are more nutritious than carrots or turnips, and particularly valuable for dairy stock.

New Ideal Hollow Crown. A greatly improved and wonderfully fine strain of true **Hollow Crown Parsnip**. The roots do not grow as long as the old Hollow Crown variety, are of larger diameter and more easily gathered. It is a very heavy cropper. The roots are very smooth, flesh fine grained and of excellent quality. The best variety for the market or home garden. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 65c., postpaid.

Improved Guernsey. An improved strain, which has given general satisfaction. The roots do not grow as long as those of the Hollow Crown, but are of greater diameter and more easily gathered. Of excellent quality. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 65c.

Improved Crown or Long Smooth (Abbot's Improved.) Smooth, large, tender and sugary; one of the best. Our stock is very fine. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 65c.

PEPPER

Kaleidoscope. Beautiful enough to be classed among pot plants, yet with a fine sharp flavor that makes it valuable in the garden also. From the time the pretty plum-like peppers form until they are fully grown they are of a light yellowish-cream color. As they commence to ripen, they change, first to a clear canary color, then deepening to orange, then again turning to pink or rose, varying from shade to shade until they become a vivid, shining scarlet. One of these pepper plants, with its dark green leaves, and hanging full of cream, pink, yellow, rose and red fruits, is exceedingly beautiful. A very easily grown house plant and an attractive one. It is enormously prolific, plants branching freely and sweeping to the ground with their load of jewel-like fruit. Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.; lb., \$2.00.

Chinese Giant. A magnificent new variety, the largest and finest pepper in cultivation. The plant is about 2 feet high, of strong vigorous growth, stocky in habit, very productive, and ripens its fruit earlier than the Ruby King. The fruit averages 4 inches in diameter, and is of a bright glossy scarlet when ripe. The flesh is unusually thick and very mild, having none of the pungency of most of the older varieties. The immense size of the fruit and its brilliant color render it very attractive, and will cause it to sell readily in the market. Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.

Bull-Nose, or Improved Large Bell. The standard sweet-flavored scarlet sort. Plants two feet in height, prolific and quite early ripening. Sweet scarlet fruits three inches in length and two inches in diameter. Our stock is particularly fine; it is earlier than Ruby King. Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 75c.; lb., \$2.25, postpaid.

Red Cluster. A distinct and beautiful variety, bearing a profusion of bright scarlet fruit in clusters in an upright position. Hot and pungent. As a decorative plant for the flower garden or for pots, it will be found very useful. Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.

Celestial. A Chinese variety, useful as well as ornamental. Sets its fruit early, and continues until frost. When full grown the fruit is bright scarlet. Makes a plant of striking beauty. Pkt., 5c.; oz., 25c.; $\frac{1}{4}$ lb., 60c.

Large Red Cayenne. Beautiful and productive. Fruit 4 inches long, bright red, slim, pointed pod; flesh thick and pungent. Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 60c.

Pepper, Kaleidoscope

226 lbs. Salmon-orange skin, very thick bright yellow flesh, which is fine grained, tender, and of excellent quality for pies. To raise the largest pumpkins, vines should be allowed ample room in which to grow, and only the best fruit allowed to remain on the vine. Pkt., 5c.; oz., 15c.; $\frac{1}{4}$ lb., 45c.; lb., \$1.50.

Winter Luxury. This is the finest pie pumpkin yet introduced; we cannot recommend it too highly for this purpose. It is also a good keeper, wonderfully productive, while its finely netted and golden russet color make it desirable for market use. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Large Sweet Cheese (Kentucky Field). One of the best for table use, and very productive. Shape flat; skin mottled light green and yellow, changing to a rich cream color; flesh yellow, thick and tender. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

SQUASH

Hubbard. One of the best late table sorts. A general favorite. Flesh bright orange yellow. Very dry, sweet, rich flavored; keeps perfectly through the winter; boils or bakes exceedingly dry. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Golden Hubbard. This variety is a well-established improvement on the old Hubbard, which it resembles very closely in shape and size. It is much more attractive, however, in appearance, on account of the color, which is a deep orange. The flesh is golden yellow, fine grained, of excellent flavor and cooks dry. Its color and productiveness, in addition to its fine quality, place it in the front rank as a market gardener's variety, as well as for the private garden. An excellent keeper; also can be used early in the green state. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 30c.; lb., 80c.

Fordhook. A long, golden yellow Squash, with very dry and fine-grained flesh. This is one of the best winter squashes and an extra fine keeper, and the plants are so robust that failure is very rare. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 40c.

Early White Bush. A good early scalloped variety for market or shipping. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Giant Summer Crookneck. This is fully as early as the old Bush Crookneck, and grows to nearly double the size, often 18 to 20 inches long, and a beautiful bright yellow. It is a profitable sort for market, because it grows so quick and large, keeps bearing all summer and commands good prices. It needs to be farther apart than other bush varieties. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 70c.

SEEDS OF SWEET, POT AND MEDICINAL HERBS, ETC.

	Pkt.	Oz.
Anise. For flavoring.....	5c.	10c.
Balm. Very fragrant leaves; medicinal.....	5c.	15c.
Caraway. Seed extensively used for flavoring.....	5c.	20c.
Coriander. Used for flavoring cakes, etc.....	5c.	15c.
Dill. Used to impart a pleasant flavor to pickles.....	5c.	20c.
Hoarhound. Used for curing coughs and colds.....	5c.	20c.
Lavender. Fragrant leaves used to scent clothing.....	5c.	40c.
Rosemary. Aromatic and medicinal. Very fragrant; also a moth preventive.....	5c.	30c.
Sage. Most useful of all; needed in every garden.....	5c.	20c.
Savory, Summer. Fine for flavoring, dressing, etc.....	5c.	15c.
Sweet Fennel.....	5c.	20c.
Sweet Marjoram. Pot herb.....	5c.	15c.
Tansy. For medicinal use.....	5c.	30c.
Thyme.....	5c.	25c.
Wormwood. A splendid plant for poultry.....	5c.	15c.

Herbs should have a place in every garden. Any good housekeeper knows the value of the little patch of herbs upon which she makes daily drafts in the summer, and which furnishes such a nice collection of dried herbs for winter seasoning, while as domestic medicines several kinds are held in high repute. The culture is very simple; the best way is to make a little seed-bed in the early spring, and set the plants out in a bed as soon as large enough. They should be harvested on a dry day, just before the blossom develops, dried quickly and bottled, or closely packed in dry boxes with the air entirely excluded.

PUMPKIN

Golden Oblong Pumpkin. A very hardy and productive variety, pumpkins averaging 15 to 20 inches in length and 8 to 10 inches in diameter. Skin of a rich golden orange, thin but tough, making it almost as good a keeper for winter as the hard-shell squashes. Flesh is a light golden yellow color, of very rich, fine quality. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

Genuine Mammoth Pumpkin. The "True Potiron" of France, Also called "King of the Mammoths" and New Mammoth "Jumbo" Pumpkin. This is the very best genuine strain of the true Mammoth Pumpkin, which is offered under so many various names by different seedsmen. Fruits grow to enormous size, sometimes reaching 2 feet or more in diameter and from 100 to 200 pounds or even more in weight. In 1884 our prize was won with one of

Spinach

SPINACH

Improved Thick-leaved or Long-standing. A fine market sort. Leaves large and thick, somewhat crumpled. Does not run to seed as early as other varieties. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 15c.; lb., 40c.

Victoria. This has proven by repeated tests a valuable sort. Its attractive dark-green color, long-standing and hardy character make it desirable for both spring and late sowing. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 15c.; lb., 40c.

Round or Summer. This is a sort adapted for early spring sowing, and is quite popular with our market gardeners. Leaves thick and large. It stands the winter well. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 15c.; lb., 40c.

Prickly or Fall. A hardy variety used for fall sowing. With very slight protection it will withstand the severest weather. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 15c.; lb., 40c.

SALSIFY

or

VEGETABLE OYSTER

Salsify is one of the most delicious and nutritious of vegetables, and should be more generally cultivated for use in winter, when the supply of really good vegetables is so limited. It has a grassy top and a long white, tapering root, nearly resembling a slim parsnip. It closely assimilates to the taste and flavor of the oyster when properly cooked, and is a good substitute for it; very wholesome and nutritious. The roots are either boiled or mashed and made into delicious fritters.

Sandwich Island Mammoth Salsify

Sandwich Island Mammoth. This grows uniformly to an extra large size, averaging fully double the size and weight of roots of the old variety. The roots, notwithstanding their extra large size, are of very superior quality and delicate in flavor. It is such a decided improvement that we are quite sure that all market gardeners who once try it will use it exclusively. Pkt., 5c.; oz., 20c.; $\frac{1}{4}$ lb., 50c.; lb., \$1.50.

Scarlet Olive-shaped Radishes

White-tipped Scarlet Turnip and White Turnip-rooted Radishes

Chartier Radishes

RADISH One ounce will sow 100 feet of drill; 10 pounds to the acre. Patrons will please note our prices of seeds, $\frac{1}{2}$ oz., at 5c.—2 to 4 times the quantity offered by others in packets at 5 cents.

White Chartier. This beautiful long white radish is of same character as Beckert's Chartier, except that it is pure white. It is a good summer radish, matures in about 6 or 7 weeks from time of sowing and is of mild flavor. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 65c.

Early Round Dark Red (Non Plus Ultra). Especially adapted for forcing on account of its very small tap-roots and tops. It is also good for summer use in the open ground. Skin dark red; flesh white, crisp, and tender. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 65c.

French Breakfast. Color bright carmine with clear white in the lower portion. Very tender and mild. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 65c.

Scarlet Turnip White Tip (Rosy Gem). Very desirable for forcing and outdoor planting. Tops and roots both small; skin bright scarlet; flesh very mild and crisp. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 65c.

Scarlet Olive-shaped. Oval; very tender and excellent; $1\frac{1}{2}$ inches long; fine for forcing or open ground. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 20c.; lb., 65c.

Icicle Radish. These radishes are beautiful transparent white, have small tops, allowing close planting, and are very crisp and brittle. A feature greatly in its favor is that it remains in good condition while growing for a long time, thus allowing a continuous pulling from same planting. Pkt., 5c.; oz., 10c.; $\frac{1}{4}$ lb., 25c.; lb., 75c.

TOMATO

Our New Market Gardener's Tomato, Early Long Island

Early Long Island. Having tested at one time or another nearly every variety offered by seedsmen, we confidently claim that there is no better variety than this for general market or family use. We speak emphatically because we have given a great amount of time perfecting our stock, and know that for smoothness and regularity of shape, uniformity of size, color and freedom from rot or cracking, **Early Long Island** is unsurpassed. Its first fruits are very early, but the vines continue to bear for a long time. Vines large, with large, dark green leaves, vigorous and wonderfully productive, being under high culture one of the heaviest croppers; fruit medium sized to large, and, unlike most varieties, grows larger as the season advances; perfectly smooth, solid, but without a hard core; deep rich red color, and of excellent flavor. Try it and you will never plant any other variety in the future. **Pkt., 10c.; ½ oz., 25c.; 1 oz., 45c.; 2 oz., 75c.; ¼ lb., \$1.40; ½ lb., \$2.50; 1 lb., \$4.50.**

Sparks' Earliana. The earliest large, smooth tomato in the world. The most perfect of all tomatoes. Of large uniform size and beautiful red color. Quality almost beyond praise. Ripens thoroughly all over, the stem-end coloring up perfectly. Almost seedless and as solid as beefsteak. Most vigorous grower. A prodigious bearer, continuing until frost. Succeeds everywhere from Maine to California, and Canada to Mexico. **Pkt., 5c.; oz., 35c.**

The New Stone. **The tomato for a main crop.** Choicest seed. We call this the king of the Livingston kinds, which are the best types of large, smooth, solid, "beefy" tomatoes. If asked to select one **main crop, market sort,** we advise this. Color fine scarlet, stem (calyx) set high, core small and shallow, so that but little is lost when it is taken out of the fruit before slicing. We want to make what we say of this kind definite, because there are very many good kinds and a long list is confusing. If in doubt, buy the New Stone for market or home use for that matter. **Pkt., 5c.; oz., 30c.; ¼ lb., \$1.00.**

"Ponderosa." **A large fruited Tomato** of fine quality for slicing. The vines are of strong rather open growth largely oblong in form, deep through, and generally ridged or ribbed; deep purple in color. They are fleshy with small seed-cells; of fine sweet flavor. Planted in good soil, fruits frequently attain a weight of one pound or more. **Pkt., 5c.; ½ oz., 20c.; oz., 35c.; ¼ lb., \$1.00; 1 lb., \$3.75.**

TABLE TURNIPS and RUTA BAGAS

Purple-Top White Globe. An improved variety of the purple-top flat turnip; globular in shape, of fine appearance, a good keeper, of excellent quality, and equally desirable for table or stock. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; 1 lb., 70c.**

Extra Early Purple-Top Milan. A white variety, purple-top and strap-leaf. This with the White Milan, is the earliest of all turnips. Remains in good condition a long time. **Pkt., 5c.; oz., 10c.; ¼ lb., 20c.; 1 lb., 60c.**

Early White Snowball or Six Weeks. A perfect globe shaped, white skinned turnip, of medium size and excellent flavor. For early showing this is one of the best, being crisp and tender, and maturing in six weeks from the time of sowing. A good keeper. Fine for family or market. **Pkt., 5c.; oz., 10c.; ¼ lb., 25c.; 1 lb., 75c.**

White Sweet Swede. A large, white, solid Swede, sometimes called White Russian. Quite desirable for table or stock feeding. A great yielder. Fine form and good keeper. **Pkt., 5c.; oz., 10c.; ¼ lb., 20c.; 1 lb., 65c.**

Imperial Purple Top Yellow (Ruta Baga). An excellent variety either for the table or cattle feeding. Flesh yellow, firm, solid, rich and sweet. Very hardy, prolific, tender. A splendid keeper. **Pkt., 5c.; oz., 10c.; ¼ lb., 30c.; 1 lb., 65c.**

Our New Market Gardener's Ever Bearing Tomato,

EARLY LONG ISLAND

Ready for market July 15, and will continue to bear until frost. A bushel of tomatoes to a plant. Crop never fails. Fruit solid and will stand a week's journey without crushing. Never rots, never cracks. Absolutely smooth and no core.

EARLY SNOWBALL

Sure Flowering Summer Bulbs for Garden and Window

TUBEROUS BEGONIAS

Tuberous Begonias, Single and Double

AMARYLLIS

A beautiful class of plants with large drooping, bell-shaped, lily-like flowers, varying in color from the richest crimson to pure white, striped with crimson or scarlet.

Johnsonii. Very large flower, of a rich crimson-scarlet color, striped with white. **30c. each; 2 for 50c.**

Prince of Orange. The nearest clear yellow or orange that we have, with a slight marking of green in the throat. **30c. ea.; 2 for 50c.**

Longifolia (Hardy). This is a great favorite as it is hardy out of doors, and once planted it increases in size and beauty each year. **Mixed colors, 10c. each; 3 for 25c.**

Atamasco Alba. Flowers upright, with broad petals, pure white. **Bulbs, 10c.; 4 for 25c.**

Hybrid Amaryllis. Mixed. Beautiful striped, flaked and feather varieties; from the leading European specialists. **20c. each; 3 for 50c.**

Formosissima. Crimson; blooming early in the summer. **10c. each; 3 for 25c.; per doz., 75c.**

Amaryllis

No class of plants has so marvelously improved in the past few years as the Tuberous Begonias. Persons familiar with the old sorts of Begonias would scarcely recognize this section as belonging to the Begonia family; for, in addition to the marvelous beauty of the flowers, the foliage has been greatly improved, and one will hardly find any two plants with the same kind of leaves. The flowers are brilliant and large, handsomely formed, and of wonderful size, often measuring from four to six inches in diameter. The plants bloom freely all summer, and are fine either as pot or bedding plants, being easily raised and requiring but little attention.

Double Begonias. Under color: Scarlet, white, pink, yellow, rose. **15c. each; 3 for 35c.; 5 for 55c.; 12 for \$1.** Double Mixed Colors, **10c. each; 3 for 25c.; 7 for 50c.; 12 for 80c.**

Single Begonias. Scarlet, white, pink, rose, yellow. **8c. each; 3 for 20c.; 5 for 30c.; 12 for 60c.** Single Mixed Colors **6c. each; 5 for 25c.; 12 for 50c.; 100 for \$3.**

The set of 10 Begonias, 5 double and 5 single, separate colors, for **75c.**

Begonia Seed. The very finest strain of Tuberous Begonia, and will produce beautiful and very often rare specimen plants. Double and Single Mixed. **Per pkt., 15c.**

Gloxinia

Giant Flowering Gloxinias

This gorgeous flower is as easily grown and cared for as many of the common flowers. They are the most magnificent table decorations we have in summer.

Separate Colors. White, Blue, Pink, Red, **15c. each; 3 for 35c.; 6 for 60c.; 12 for \$1.10.**

All Colors, Mixed. **10c. each; 3 for 25c.; 7 for 50c.; 12 for 90c.**

Gloxinia Seed: Choicest Mixed, **10c. per pkt.**

Montbretia

A very pretty Gladiolus-like class of bulbs, free blooming and easy of cultivation. Must be taken up in the fall and winter like a Gladiolus. They are in full glory a month after all tender plants are killed by frost. Large flowers on spikes, 12 to 24 inches long; bright orange, dotted purple. Our price is so reasonable that every one should plant a number. **3 for 10c.; doz., 25c.; 100, \$1.25.**

Gladiolus Childsi

SUPERB MIXED GLADIOLUS

Superb Mixed. First Size. No finer mixture of these grand flowers can be had than our Superb Mixed. Color, red, snow-white, pink, variegated, blotted, striped, etc., and will furnish you an abundance of bloom early in the summer. **3 for 10c.; 12 for 30c.; \$1.75c. per 100.**

Superb Mixed. Second Size Bulbs. All blooming bulbs, same quality as above but smaller. **5 for 10c.; 12 for 15c.; 25 for 25c.; 100 for \$1.00.**

Gladiolus Childsi. It is difficult to describe flowers of such varied and peculiar beauty as these gladiolus. They are very tall and erect, often standing 4 or 5 feet high with spikes of bloom over 2 feet in length. They branch freely, in most cases each stem producing 3 or 4 spikes of bloom, and bloom much earlier than ordinary varieties. The flowers are of great substance and gigantic size, frequently 7 to 9 inches across. The form of both flower and spike is perfection itself, and they last in bloom a long time before fading, owing to their great substance and vigor, but their most remarkable feature is their coloring. Orchids cannot surpass them in their varied and delicate shades, markings and blendings. Mixed, 50 colors and kinds. **3 for 15c.; 5 for 25c.; 12 for 40c.; 100 for \$3.00.**

Hardy Gladiolus Lemoinei. The odd and fantastic marking of these Gladiolus and their beautiful shape resemble the fascinating beauty of the orchid. Yellow, crimson, white, brown, green, pink, etc., are blended together, producing an effect seen in no other flower. Besides their gay colors and odd markings, they have two very important points. First, they bloom two or three weeks earlier and are in full perfection before others appear, and, secondly, they are hardy. Mixed, 30 colors and kinds. **3 for 10c.; 5 for 15c.; 12 for 25c.; 30 for 50c.; 75 for \$1.00.**

GLORIOUS NEW GLADIOLUS AMERICA

Without a single exception this is the most beautiful and useful Gladiolus yet introduced and the greatest Floral Novelty of 1906.

Growth. By far the most vigorous and easily grown Gladiolus known. Strong and healthy, with luxuriant dark-green foliage and a freedom of growth and flowering surpassing all others.

Flowers. Spikes two to three feet long, erect with a great number of large spreading blossoms, all facing one way and showing a color the delicacy and beauty of which it is impossible to describe or reproduce. It is an exquisite soft lavender pink, very light, almost a tinted white; the color is the same as seen in the most exquisite Cattleya Orchids. No color like it in any other Gladiolus; none half so beautiful.

Usefulness. As a cut flower it is perfectly immense, lasting in water for a week or more, the great blossoms retaining full size and delicate coloring. For bedding it is without a rival. **Large Blooming Bulbs, 15c. each; 2 for 25c.; 4 for 50c.; 9 for \$1.00.**

10 NAMED HARDY GLADIOLUS

(Lemoinei)

Admiral Pierre. Large flowers, round, very open; dark carmine red. Lower divisions clouded with purplish maroon surrounded with light yellow.

Bejazet. Lovely light pink, shading to delicate blush; velvety carmine blotches.

Bassuet. Large, brilliant vermillion.

Chas. Martel. Rosy blush, intense large carmine blotch.

Cleopatra. Red carmine blotches, tinged with yellow.

De Cheville. Salmon red, buff blotch.

Edison. A beautiful combination of many rich colors.

Incendiary. Fiery red, large blotch of crimson-red on lower petals, small gold markings.

La France. Light salmon; velvety purple, blotched on yellow ground.

Marie Lemoine. Large spike of fine well-expanded flowers; upper divisions of a pale creamy color, flushed salmon, lilac, lower divisions spotted violet and yellow.

Large Bulbs, 5c. each; 6 for 25c.; 10 for 55c.

10 FINEST NAMED GLADIOLUS

(Gandevensis)

Adison. Dark amaranth, with white stripes.

Ajax. Beautiful striped.

Augusta. Lovely pure white, with blue anthers.

Brenchlyensis. Vermilion-scarlet; fine old variety.

Ceres. Pure white, spotted with purplish rose.

Gen. Phil. Sheridan. Fiery red, white line running through each petal, and a large, pure white blotch.

Buchanan. Very fine yellow. Excellent spike.

Bull. White, slightly tinted with sulphur.

Madame Monneret. Delicate rose; very fine flower.

Napoleon III. Bright scarlet, white line in each petal.

Large Bulbs, 5c. each; 6 for 25c.; 10 for 35c.

Special Offer—1 each of the above-named Gladiolus, 20 Bulbs in all, by mail, post paid for 60c.

Gladiolus Seed. Germinates very quickly. Lemoinei, Gandevensis or Childsi, per Pkt., 5c.

NEW GIANT-FLOWERING SWEET-SCENTED CALADIUM

In general appearance this plant somewhat resembles the common caladium (C. Esculentum), but is entirely distinct, being much larger and grander, and vastly superior in every way. Both the plant and the leaves are of gigantic size, and attain a large size in a very short time. Under the same conditions it will grow three or four times as fast as the common species. Well-grown leaves are four to five feet long and two to three feet wide, and the plants 8 to 10 feet high. The leaves are of different shape than those of C. Esculentum, and instead of being a dull green, the Giant Caladium leaves are of a bright glossy green, glistening in the sun as if varnished.

Produces flowers freely. Think of it! A flowering caladium, the plant, the most magnificent of foliage plants, and in addition producing in abundance large snow-white fragrant flowers. A plant so grand as to deserve a prominent place in every garden for the beauty of its foliage alone, and with the flowering feature added, forms a combination unrivaled. The plant commences to flower when 4 or 5 months old, and produces flowers in constant succession. Plants lifted from open ground in the fall will continue to bloom a winter in greenhouse until time for planting out again next spring. The flower-buds break out of the leaf stalks near the base, each flowering leaf stalk producing 6 to 12 buds, which open in succession. The flower resembles a giant calla and remains open 3 days and nights; the first two days it is of the pure snow-white, the third day it changes to a pale yellow. The fragrance of the flower is remarkable, being spicy and aromatic, and so powerful that a single flower will scent the air for rods. It is of the easiest culture, enduring adverse conditions well, and the leaves attain a great size even in small pots. **Plants sure to bloom, 20c. each; 3 for 50c.**

Giant Flowering Caladium

SURE FLOWERING TUBEROSES ESPECIALLY GROWN FOR OUR CUSTOMERS.

Tuberose

Double Excelsior Pearl Tuberose. This is the best double tuberose in cultivation; grows about 18 inches high, blooms early and bears immense spikes of large, pure white, perfectly double flowers; deliciously sweet. Large blooming bulbs, 3 for 12c.; 7 for 25c.; 35c. per dozen; \$2.50 per hundred.

Silver-leaved Tuberose. A lovely hardy variety; bulbs remain in ground over winter and bloom from year to year; the leaves are bordered with creamy white, making a handsome ornamental plant. Large single flowers, very sweet; blooms earlier than the other kinds, which adds to its value. Fine blooming bulbs, 5c. each; 3 for 12c.; 40c. per dozen.

Orange-flowered Tuberose. A very beautiful variety with elegant single flowers borne in great profusion; resembles orange blossoms in exquisite beauty and delicious fragrance. It blooms earlier and is considered more hardy than the Excelsior.

6c. each, 3 for 15c.; 7 for 25c.; 50c. per dozen.

Orchid Flowering TIGRIDIAS

One of the most showy of all summer bulbs, and blooms from midsummer until frost, growing 3 feet high, with large wide-open triangular blooms 4 to 6 inches across. The colors and markings are very brilliant and peculiarly odd and attractive, and clumps of them in the border have a most gorgeous effect. It is difficult to name a flower of such unique and exquisite beauty as a Tigridia, the superb potting being so self-like and handsome. They are easily grown and always more than satisfactory.

Mixed sorts, all colors, 10c. each; 3 for 25c.; 7 for 50c.;

12 for 80c.

Madeira Vine

MADEIRA VINE

The Madeira Vine is of rapid growth, with dense and beautiful foliage, twining to great height. It grows anywhere, but does better in a warm, sunny-sheltered location. It is also a very pretty plant for training around the windows in the house.

Strong tubers, each 5c.; 3 for 10c.; per doz., 30c.

CINNAMON VINE

A very pretty vine to train around the window or on a trellis. In mid-summer the plant is covered with brilliant, glossy foliage and an abundance of fragrant flowers. It is also an exceedingly quick grower, having been known to attain a height of 20 feet in one season.

Good roots, 5c.; 6 for 25c.; doz., 40c.

Extra large roots 10c.; 3 for 25c.; doz., \$1.

CINNAMON VINE

GIANT SUMMER-FLOWERING HYACINTH

A new blooming hardy Hyacinth which in August and September throws up quantities of flower spikes 2 feet tall, which are covered with pure white flowers. Very fragrant. This has become so popular that last year's sale was nearly 100,000 bulbs. 5c. each; 6 for 25c.; 12 for 40c.

YUCCA FILAMENTOSA

The stately clumps of stiff, bayonet-like leaves, bristling out from the center in every direction, are extremely ornamental, but in mid-summer they take on an added glory. Thick, woody flower-stalks are thrown up, growing as high as a man's head, and bear at their summit immense compound panicles of creamy, bell-shaped flowers, each floret 2 inches across. 8c. each; 4 for 25c.

Summer Hyacinth

RARE SUMMER-FLOWERING CALLAS

Spotted Calla

Grand New Yellow Calla, Mrs. Roosevelt. Now offered for the first time. This is truly a rare and beautiful variety; it has the same habit of growth as the ordinary white calla, with flowers the same size and shape, but of a rich clear yellow color, produced freely on long stems; foliage, deep green, distinctly and freely blotched with white, making the plant very effective for banking and other forms of decoration, and is much more distinct and showy than Fancy-Leaved Caladiums for many purposes. It does particularly well planted outside; grows strong and flowers freely. **Price; strong blooming bulbs, 25c. each; 3 for 60c.; 5 for \$1.00.**

Special Offer—One each of the 6 beautiful Callas and the Arum Cornutum, 7 Bulbs in all, for \$1.25.

Arum Cornutum

Arum Cornutum. A rare and curious garden bulb, with odd flowers and luxuriant Palm-like foliage. The spathe of its Calla-shaped flowers is two feet in length, with tapering point and is of very large size. Color of bloom, greenish chocolate on outside, inside yellow, spotted with purple. Foliage very large, luxuriant like a Palm. **Strong bulbs 20c. each; 3 for 50c.; 5 for \$1.00.**

New Pink Calla. (*Rhemmanni*) Another new Calla which has created a wonderful sensation in Europe, and bulbs have been sold as high as ten dollars each. It is a strong, free grower with large blossoms which are of a beautiful pink color. Leaves long, lanceolate, dark rich green, in shape unlike other Callas. Flowers freely in the open ground. It is truly the most wonderful Calla ever offered to the public. **Strong bulbs 30c. each; 2 for 50c.; 5 for \$1.00.**

Yellow Calla. This is one of the rarest and most eagerly sought of all callas. The color is one of the most beautiful shades of yellow seen in flowers, and, with its jet black center, lends to the blossom a peculiar charm. The bulbs are strong and send up a rank growth of beautiful leaves. It requires the same treatment as other callas, and will bloom very soon after planting. **Large blooming bulbs, 20c. each; 3 for 50c.; 6 for \$1.00.**

The Spotted Calla. Leaves spotted white, very handsome flowers, pure white with black center, fine for the flower bed. Also for pot culture—keep roots in cellar over winter. **Extra large bulbs, 10c. each; 4 for 30c.; 12 for 75c.**

Calla Fragrance. Flowers pure white and a very profuse bloomer; their fragrance is wonderfully sweet. Similar to that of violets. **Strong plants, 20c. each; 3 for 50c.**

Calla Ethiopica Gigantea. We now have a sufficient stock of this most superb of all Callas to offer at a reasonable price. All thus far sold have brought FIVE DOLLARS each. In size and magnificence it is truly a wonder. Leaves two feet long and flowers a foot in length, three times larger than any other Calla. It is a strong, quick grower, but requires a large pot and a little time to bring it to full perfection. Foliage very dark rich green. Flowers snow-white and open unusually flat and broad. We have had single plants showing ten or more of these magnificent blossoms at once. It is exactly like the Common Calla except in size, richness of color in foliage and purity of blossoms. **Strong Plants, 25c.; 3 for 60c.; 5 for \$1.00.**

**Fancy Leaved Caladiums
FANCY-LEAVED CALADIUMS**

For window boxes, house or greenhouse growing this is one of the most decorative plants. Its rich, thrifty leaves, handsomer than begonias, are spotted, marbled, veined and striped with white, pink and dark red. These bulbs, though comparatively rare, are easily grown, and their handsome foliage is much admired. Out of doors use a shaded location, with light soil; watering often as needed. Bulbs should be dried down and stored in a warm place during the winter. They should be started into growth in a warm place by April 1st.

Mixed, all colors. Our mixture is superb and contains many valuable and expensive varieties. **15c. each; 2 for 25c.; 4 for 50c.; 9 for \$1.00; 12 for \$1.25.**

Tenuifolium. The lovely Coral Lily of Siberia. A great beauty. The brightest of all Lilies. Grows 20 inches high, with finely cut foliage, slender stems and beautifully shaped flowers of a brilliant coral-red. One ought to grow it by the dozen, they are so fine for cutting, and make such grand clumps for the lawn, Blooms very early. **15c.; 3 for 40c.**

Wallacei. This Lily is very floriferous, each bulb throwing up from four to six flower stems, each one of which is crowned with three to ten beautiful upright blossoms of a delicate bright apricot color. It is very perfect in form and a most desirable sort. **15c. each; 3 for 40c.**

Speciosum Rubrum. White, shaded and spotted with deep red and carmine; very sweet. **15c. each, 3 for 40c.**

One each of the above, including the New **Lilium Philippensis**, \$1.40.

NEW EVER-BLOOMING TRITOMA

Plants show from 6 to 20 flower stalks at a time, each holding at a height of 3 or 4 feet a great cluster of flame-colored flowers of great beauty and brilliancy. Each cluster keeps perfect for weeks, and when it fades two or three more are ready to take its place. Fall frosts do not stop it from blooming, as it is hardy in open ground south of Pennsylvania; further north it should be wintered in cellar. Plants

Leaves grow to a length of 3 to 4 feet and are beautifully striped and variegated crosswise with white on a very dark green ground which makes it a very attractive pot plant. In May and June it sends up long plumy flower spikes, which, together with its sword-like leaves, make it a superb p'ant. The splendid outlines of this plant, together with its distinctive markings, make it a superb plant for jardinières or center pieces. **15c.; 2 for 25c.**

Or Climbing Fuchsia

This is a slender, blooming, climbing, vine, highly valued for window and house culture; will grow two to three feet high, and can be trained in any form desired. It is a tremendous bloomer, bearing, in Spring, Summer and Winter, hundreds of pretty little pear-shaped flowers for months at a time. The flowers are rich bright crimson inside and creamy white outside, which makes a very striking and attractive combination, always greatly admired, and should be in every collection of window plants. **10c. each; 3 for 25c.**

HARDY GARDEN LILIES

Lilium Philippensis. This rare and beautiful Lily is exceedingly graceful, the main stalk being slender and clothed with narrow grass-like foliage. It is perfectly hardy anywhere in the open ground and a superb garden bulb. But for pots it is more than satisfactory, far exceeding the best Harriusi. **Large flowering bulbs, 20c. each; 3 for 50c.; 7 for \$1.00.**

Lilium Aratum. (Gold Banded Lily.) Creamy white flowers, spotted with pink and gold, with a golden band down the center; flowers often a foot across. **15c. each; 3 for 40c.**

Longiflorum. White, trumpet formed, very fragrant; a lovely Lily, being almost exactly like the Bermuda Easter Lily, but blooming a little later, and hardy in the open ground, therefore a grand variety for garden culture as well as for pot culture. **15c. each; 3 for 40c.**

Double Tiger Lily. Grows from 4 to 6 feet; foliage a dark green and very long, bearing great quantities of double bright orange-red flowers' spotted with black. **10c. each; 3 for 25c.**

Album. Absolutely pure white, graceful and fragrant. **15c. each, 3 for 40c.**

Elegans Bicolor. Another grand early blooming sort, exceedingly showy, being of a brilliant red color, flamed with yellow: very large and perfect. **15c. each, 3 for 25c.**

Thunbergianum. Early flowering, ranging in height from fourteen inches to four feet; flowers cup-shaped borne upright, and of a great variety of colors. They are very effective planted either in lines or clumps, and include many showy sorts. Mixed bulbs. **10c. each, 3 for 25c.**

Pardalinum. (Leopard Lily.) Rich scarlet and yellow flowers, spotted with rich brown. Robust and free flowering. A superb Lily and one which will give the greatest possible satisfaction. Succeeds in all situations. No garden complete without it. **15c. each, 3 for 40c.**

Umbellatum. One of the very best, blooming in June or July, with very large perfect flowers and dazzling colors. They are robust growers and produce an enormous head of bloom. Colors range from black red through all the shades of crimson, rose, yellow, buff, apricot, etc., many being finely spotted and variegated. **15c. each; 3 for 40c.**

STRONG FIELD GROWN PLANTS

16 BEST NAMED CANNAS For \$1.25 Postpaid.

Florence Vaughan. It still remains the highest type of new French canna flowers. The flowers are a rich golden yellow, thickly dotted with brightest red. Height, 5 feet. No canna bed is complete without this perfect ever-bloomer. **10c. each; 3 for 25c.; 12 for \$1.00.**

Paul Marquant. Immense flowers, in bold, shapely trusses; shimmering salmon-rose with silvery lustre of many changeable tints. **10c. each; 3 for 25c.; 12 for \$1.00.**

Philadelphia. An ideal bedding variety of medium height; a healthy, vigorous grower, with handsome foliage, and a continuous bloomer. Color, a bright scarlet crimson; very rich and velvety. **10c. each; 3 for 25c.; 12 for \$1.00.**

Souvenir de Mme. Crozy. 5 feet; green foliage; extra strong grower. The flower spikes, of which there are 5 to 6 on a stalk, are very large and full. Garnet red flowers, with broad border, and large center of a brilliant yellow. **10c. each; 3 for 25c.; 12 for \$1.00.**

Souvenir d'Antoine Crozy. 4 feet; green foliage. This is a perfect gem, and in our estimation the finest gold-bordered variety. The flowers are large, well-rounded petals, which are of the intense scarlet-crimson, rich and dazzling, and are bordered with a broad, rich, golden-yellow border. **10c. each; 3 for 25c.; 12 for \$1.00.**

Star 91. The dwarfest canna in existence. Grows from 1 to $\frac{1}{2}$ feet. Elegant for pot culture. Color scarlet, bordered with gold. **10c. each; 3 for 25c.; 12 for \$1.00.**

Alphonse Bouvier. Its every shoot is topped by enormous trusses of vivid crimson-scarlet flowers, a single plant sometimes showing 30 or 40 at one time. **10c. each; 3 for 25c.; 12 for \$1.00.**

Alsace. Pure white, grows from 4 to 6 feet, clear green foliage, produces from 12 to 18 shoots from a single eye. The only white canna in existence. **10c. each; 3 for 25c.; 12 for \$1.00.**

Robusta. One of the most effective of all dark-leaved varieties, valuable on account of its luxuriant dark bronze foliage, 6 to 8 feet. **10c. each; 3 for 25c.; 12 for \$1.00.**

For a brilliant show all summer there is no plant excelling the canna: it even surpasses the geranium in its gorgeous display of brilliant colors, blooming continuously from the time of planting until cut down by frost. As cannas are good pot plants either for summer or winter flowering, they may be lifted and potted in the fall before the approach of frost. Grown in this way, they are ready to continue their good work without disturbing the plants. For window boxes, or grown as specimens for the porch, they are unsurpassed.

Canna Seed. Plants produced by seed will bloom profusely, and our mixture of colors is unsurpassed. **PKt., 5c.**

Austria. Enormous flowers, beautiful canary yellow, with a silvery hue inside slightly dotted with red. Both in foliage and flower this canna surpasses all others. **10c. each; 3 for 25c.; 12 for \$1.00.**

Burbank. Giant yellow flowers, like an orchid: 15 to 20 spikes on a plant. **10c. each; 3 for 25c.; 12 for \$1.00.**

Beaute Poitevine. $3\frac{1}{2}$ feet. This proved one of the best cannas in our collection last summer. It is of a bright rich crimson color, with erect flower spikes. It is an ideal canna for bedding. It seems to stand severe drought better than most kinds the flowers standing up during the hottest summer days without injury. It comes into bloom very early and blooms continuously. **10c. each; 3 for 25c.; 12 for \$1.00.**

Chas. Henderson. Height, 4 feet. Color, brilliant, deep crimson. Broad, deep green foliage, narrowly margined with bronze. Vigorous grower. **10c. each; 3 for 25c.; 12 for \$1.00.**

Flamingo. Immense trusses of superb deep, glowing crimson flowers. A sturdy and vigorous plant of dwarf habit, with massive dark green foliage. Good, not only for bedding purposes, but also for pot culture on account of its dwarf and compact habit and perpetual blooming qualities. **10c. each; 3 for 25c.; 12 for \$1.00.**

New Ever-blooming Pink Canna—Clara Barton. Now offered for the first time. In this we have the finest pure pink canna ever introduced. There are several other pink cannas, but compared to Clara Barton they are truly insignificant. It is a very dwarf compact grower and produces from early summer until cut off by frost, solid well-filled trusses of the freshest, tenderest pink flowers ever seen in a canna: the heads of bloom are so compact that it gives one the impression of being double, and, unlike other varieties, the bloom is produced close to the stalk, and looks as though the flowers were artificially set in amongst the foliage. An excellent pot plant as it grows only 2 to $2\frac{1}{2}$ feet. **Price, strong roots, 20c. each; 2 for 35c.; 4 for 60c.**

New Black-Leaved Canna—Red Cross. This is a black-leaved canna that produces bloom—a point that other black-leaved varieties do not possess. It is a very free bloomer and produces large trusses of glowing scarlet flowers, held well above the foliage, which is of the darkest (almost black) color known in the canna family. It is the most tropical looking plant growing and in flower that one can imagine. Height, 4 feet. **Strong roots, 20c. each; 2 for 35c.; 4 for 60c.**

One each of 16 named Cannas, \$1.25.

VARIEGATED LEAVED CANNA Phrynum Variegatum

This is without doubt the grandest ornamental foliage plant in cultivation; its habit of growth is precisely like the canna; it grows from a bulb or tuber, and may be wintered dry, like a gladiolus, or kept growing the year round as a pot plant. The canna-like shoots grow from 18 inches to $2\frac{1}{2}$ feet high, and the leaves, which are spreading and oblong in shape, are from 6 to 10 inches long and from 2 to 5 inches broad; they are a bright green, beautifully variegated with pure white, the variegations being extremely diversified. It is almost impossible to find two leaves exactly alike; in some leaves the whole area is pure white, while in others only half and in some one-third, and in others again only a few faint stripes. **15c. each; 3 for 30c.; 6 for 50c.; 80c. per dozen.**

12 FINEST NAMED DAHLIAS

New Snow-white Show Dahlia, Storm King. This superior variety is an extremely early, profuse and constant bloomer, a strong, vigorous grower, of dwarf, branching habit, and produces its flowers on long stems. The flowers are snow-white, of perfect form, and full to the center. As a cut-flower variety, it is the florist's ideal, while for grouping or as a specimen plant it is far ahead of any other white show dahlia. **20c. each; 3 for 50c.**

Pink Water Lily Dahlia (Nymphaea). A grand sort: large, full, regular flowers, with broad, heavy petals and incurved center on creamy white ground; closely resembles the pink water lily, and is delightfully sweet-scented; remarkably beautiful. **15c. each; 3 for 40c.**

William Agnew. Undoubtedly the grandest red cactus dahlia yet produced; immense flowers of perfect form; intense dazzling red, truly magnificent in every way; strong roots. **15c. each; 3 for 40c.**

Snow-clad (Pompon). The finest of all pure snow-white pompon dahlias, perfect form, always full to the center, and a profuse and continuous bloomer. **15c. each; 3 for 40c.**

Floral Park Jewel. The most unique novelty in dahlias. The great beauty of a plant laden with flowers, each of a different color, must be seen to be appreciated. Unequalled. **15c. each; 3 for 40c.**

One each of above 12 named dahlias, \$1.40 postpaid.

Asparagus Plumbosus Nanus

A beautiful climbing plant, with bright green, gracefully arched foliage, surpassing Maidenhair Ferns in grace, delicacy of texture and richness of color. The fronds are twelve to fifteen inches in length and taper to a point from a width of twelve inches. One of the most beautiful decorative plants. **Each 15c.; 3 for 35c. Seed 10c. per pk.**

Plant dahlia tubers about May 1st, covering the neck some 3 inches. If many shoots start, thin them out. After flowering, and before hard frost, take up the plants, remove the tops, dry the bulbs a little, and put them in the cellar until spring, when they can be divided and replanted.

New Pink Dahlia (A. D. Lavoni). This is the most beautifully quilled soft pink dahlia yet introduced; flowers grow on long stems and command a very high price in the cut flower market. **15c. each; 3 for 40c.**

Camelliaflora. Dwarf. Flowers pure white, borne on long stems. The very best for cut flowers. **15c. each; 3 for 40c.**

C. W. Bruton. Most superb yellow cactus dahlia yet produced; unequalled in beauty. Enormous flowers 5 to 6 inches across; perfectly double and pure deep golden yellow, magnificent. **15c. each; 3 for 40c.**

May D. Hallock. A rich, deep yellow, one of the most perfectly formed flowers. **15c. each; 3 for 40c.**

Electric. Dazzling scarlet, profuse bloomer. **15c. each; 3 for 40c.**

Bronze Beauty. At a distance this beautiful new dahlia looks like a chrysanthemum, with its petals curled and twisted in the most artistic fashion; flowers large, stems long. Color, **pure golden bronze (not yellow).** **15c. each; 3 for 40c.**

Ben Butler (Pompon). Very deep red and one of the finest pompon dahlias, in cultivation. **15c. each; 3 for 40c.**

On the left, a detailed illustration of a Dielytra Spectabilis (Bleeding Heart) plant, showing its characteristic heart-shaped flowers hanging in racemes.

Dielytra Spectabilis (Bleeding Heart).

DIELYTRA, OR DICENTRA

Spectabilis, (*Bleeding Heart, or Seal Flower*). An old-fashioned favorite, equally well adapted for forcing as for planting in the open border; its long racemes of graceful heart-shaped pink flowers are always attractive. (See cut.) **Strong roots, 20c. each; 3 for 50c.**

Hardy Phlox

Hardy Phloxes As shown on FRONT COVER, 1905

Our friends who remember the old-fashioned Perennial Phlox of our grandmother's garden would hardly recognize the beautiful varieties grown to-day as bearing any resemblance to them. The improvement has been truly wonderful. Instead of the small, dull-hued flowers of olden times, we now have immense trusses, all bright and showy, the individual flowers three times the size of the old varieties, and the colors ranging from purest white to violet. With Hardy Phlox a show of brilliant flowers can be had from June until November, as they are perpetual bloomers.

Violet Queen. Without question the grandest variety yet introduced, flowers extra large and in color a distinct **Lilac**, shading dark towards the center.

Andreas Hoffer (No. 1). A fine early and continuous flowering; pure white.

Eugene Danzanvillier. (No. 2). Lilac, shading white toward the edges, with large white center.

Madagascar. (No. 3). Delicate rose with deeper center,

La Vague (No. 5). Rosy pink with red eye.

Coquelicot. (No. 5). Bright scarlet with deep carmine eye.

B. Comte. (No. 6). Rich purplish crimson.

Colibri. White with deep rose center.

Jeanne d'Arc. Late flowering, pure white.

Strong field grown plants **15c. each; 4 for 50c.; \$1.40 per doz.**
The above set of nine named phlox **\$1.00.**

Hardy Phlox Seed. Germinates very rapidly, growing into strong bushes from 2 to 3 feet high, bearing immense heads of large wavy flowers of the most lovely shades of color.

Mixed Colors, Pkt., 10c.

HERBACEOUS
PAEONY.

PAEONIES

DOUBLE, LARGE, FLOWERING, HARDY.
Once planted they will last a lifetime with little care.

These great big-hearted flowers of June are coming again to be as much liked as they were by our grandfathers, and as they have always been by those wonderful Japanese gardeners. They grow from 1 to 3 feet high, producing the most magnificent blooms, which sometimes almost surpass the beauty of the rose. Another point which is largely in their favor, is the fact that the plants are never attacked by either insects, animal or fungal disease. Peonies will succeed in most any kind of soil, but give best results when planted in a deep, rich and somewhat moist loam. Our collection of peonies is large and consists of all the new colors as well as the old. **Strong roots, ready to bloom.** **Double Pink, each 25c.; Double Red, each 30c.; Double White, each 30c.; 1 each of the three colors, 70c.**

Japanese Iris.

Iris Kaempferi—Perfectly hardy. The newer varieties of this King of Iris, recently introduced from Japan, are marvels of beauty and stateliness. Think of a plant sending up to the height of three feet a dozen flower spikes, each spike bearing from two to four enormous blossoms eight to ten inches across, and of the most delicate and beautiful colors, markings and combinations. Think of a bed of all colors—white, indigo, violet, lavender, mauve, sky-blue, royal purple, blush, yellow, etc. Your imagination can conceive of nothing grander and when you see them you will realize they are infinitely more grand and beautiful than your imagination can portray. Such are the new Iris Kaempferi, the king of hardy perennials.

Strong Roots. 15c. each; 5 for 50c.: 12 for \$1.00.

Clematis Paniculata

CLEMATIS

This beautiful flower may well be called the prince among all hardy flowering vines, and we presume all of our customers who have seen the magnificent masses of flowers produced by this grand climber have promised themselves to plant one at the very next opportunity. It is especially adapted for house fronts, trellises or open lawns, where it can be trained as a creeper to cover rocks, stumps or mounds. We offer four of the best varieties, strong, field-grown plants, on their own roots.

New Sweet Scented Clematis Paniculata. One of the finest additions to our list of hardy climbers that has been made in years. A vine of very rapid growth, quickly covering trellises and arbors with handsome, clean, glossy green foliage. The flowers are of medium size, pure white, borne in immense sheets, and of a most delicious and penetrating fragrance. It begins to bloom in August and is a mass of snow-white flowers until late in the fall. The extreme rapidity of its growth, the showy foliage, beautiful and fragrant flowers borne so very freely, and its late blooming nature united with an entire hardiness, serve to make this one of the most desirable and useful of climbing plants. **20c.; 6 for \$1.00.**

Mad. Ed. Andre. This is the nearest approach to a bright red Clematis and has been called the Crimson Jackmanii. The plant is a strong, vigorous grower and very free in bloom. Color a distinct crimson red; a very pleasing shade and entirely distinct from all other varieties. **Strong plants, 30c.; 3 for 75c.**

Jackmanii. The flowers, when fully expanded, are from 4 to 6 inches in diameter; intense violet purple, with a rich, velvety appearance, distinctly veined. It flowers continually from July until cut off by frosts. **Strong plants, 30c.; 3 for 75c.**

Henryi. A very strong grower, and very hardy, producing a great profusion of pure white flowers. The very best white. **30c. each; 3 for 75c.**

WISTARIA SINENSIS

The Chinese Wistaria is a strong and rapid grower, desirable for trellises, porches, etc. When well established it blooms profusely. The light purple flowers are very showy and are produced in long racemes. In England the plant is often called the kidney bean tree and in Australia the grape flower vine.

Sinensis. The favorite variety, producing thousands of pendulous clusters of delicate violet-blue blossoms, richly perfumed. **25c. each.**

Alba. Of similar habit to Sinensis, with pure white flowers; a lovely climber. **25c. each.**

Asparagus Sprengeri

Asparagus Sprengeri—Sprays 4 to 5 feet long, of fresh green feathery foliage; is useful for bouquets, wreaths or sprays, remaining perfect for weeks. Flowers white, very fragrant, followed by red berries. **Good plants, 15c.; 2 for 25c.; Seed 10c. per pkt.**

CHINESE PRIMROSE

These are the new large-flowering Obconica-Sinensis Hybrids of various colors as large and fine as Primula Sinensis. Colors, pink, violet, blush rose, lilac, white, etc. Very charming flowers, being borne in large trusses and at all times of the year in great profusion. They bloom very quickly from seed and the large showy blossoms are borne constantly for a year, and when we realize that these flowers are as large as P. Sinensis, and almost as varied in colors their great value is at once apparent. Plants very vigorous and easily grown as a Geranium.

Plants Mixed—Fine healthy stock, ready to bloom, **15c. each; 2 for 25c.; 9 for \$1.00.**

Seed—All Colors Mixed, **10c. per pkt.**

Hardy Azalea

Azalea Mollis (Hardy). Among the rarest and choicest of all garden flowers. Great flaming masses of bloom are produced by these new Hardy Azaleas, making a show the glory of which one cannot describe. Suffice it to say that the blossoms are often larger than the hot-house Azaleas, and more brilliant and fiery in colors, scarlet, red, orange, yellow, pink, etc., often flamed and variegated in a lovely manner. Perfectly hardy anywhere in the United States, and the most brilliant flowering shrub known. **Strong Plants 30c.. each, 4 for \$1.00.**

Hardy Candytuft

Blooms from May until November

A plant of exquisite beauty, being of low, compact and spreading growth and producing its profusion of bloom in May or June, when pure white flowers are particularly scarce. Its profusion of bloom is so great that a bed of it looks at a little distance like a mass of fleecy snow just fallen. Few hardy plants will give as much real satisfaction as will this beautiful gem. Lifted late in the fall, it will bloom well in the house during the winter. Perfectly hardy and foliage ever green. **10c.. each, 3 for 25c., 12 for \$1. Seed germinates very rapidly and plants bloom first year. Pkt., 5c.**

NEW DOUBLE GOLDEN RUDBECKIA
Golden Glow.

This is one of the grandest hardy yellow flowering plants ever introduced, particularly valuable for garden, lawn and park planting, grows 6 to 8 feet high; graceful branching habit and pretty foliage. Blooms during July and August, the first season, and bears immense masses of large, round, golden-yellow flowers, perfectly double like roses and 2 or 3 inches across, covering the whole plant with a sheet of splendid golden-yellow flowers for weeks. It is easy to grow, and sure to bloom, and cannot be too highly recommended as one of the most showy and handsome ornamental plants ever introduced. The flowers are borne by hundreds, on long, graceful, nodding stems, just right for cutting. **Strong plants 10c. each, 3 for 25c., 7 for 50c.. 15 for \$1.00.**

BUDDLEIA VARIABILIS (CHINESE LILAC.)

It is a hardy shrub, growing three to four feet high, its gracefully arching branches covered with a woolly bloom. The leaves are bright green above, **velvet white underneath**, effectively undulated. The contrast of white and green produces a highly decorative effect. The very numerous branches are terminated by racemes of flowers, frequently twelve inches in length, and borne in such quantities as to cover the entire bush. The predominating shade is **rosy lilac with orange tint in center**. The flowers, which have a rather agreeable odor, are produced from June until October and even later. The plant is extremely hardy. **Strong blooming plants 20c.. each, 3 for 50c.**

Seed of Buddleia Variabilis. Plants grown from seed will bloom the first year and are of the easiest culture. This is one of the best new plants we have. **Pkt., 10c., 3 for 25c.**

A SELECT LIST OF BEST HARDY FLOWERING SHRUBS, ALL STRONG 2 AND 3 YEAR PLANTS.

Japan Snowball (Viburnum Plicatum). This Japanese variety of the old-fashioned snow ball is one of the most valuable of our hardy shrubs. Forms an erect, compact shrub, 6 to 8 feet high; it blooms in early June and for a long time is a solid mass of white, the plant being completely covered from the ground to the top of the branches with large balls of flowers as white as snow. **20c. each; 3 for 50c.**

Hydrangea Paniculata Grandiflora. We believe this to be the most desirable hardy shrub in cultivation. Flowers white, borne in immense pyramidal trusses more than a foot long. It remains in flower 2 or 3 months; creates a great sensation wherever seen. It is sure to bloom finely the first season. **20c. each; 3 for 50c.**

Deutzia Gracilis. Very bushy and completely covered with pure white flowers. **15c. each; 2 for 25c.**

Weigelia (Variegata). There is no more desirable shrub than this. Leaves are finely variegated white and green, and the flowers are borne in immense masses bending the branches to the ground. Color, blush pink, Superb. **15c. each; 2 for 25c.**

One each of the above 8 shrubs, \$1.00 postpaid

TUB HYDRANGEAS

Superb and easily managed tub plants, blooming when very small, and growing larger and finer each year. Their immense close panicles of bloom are wonderfully showy, and they last in perfection for months. Largely grown for Easter and early summer decorations, and are perhaps the most beautiful plants for piazzas or steps.

Rosea. Beautiful rose-colored bloom that later turns to blue. A profuse bloomer bearing very large panicles. **20c. each.**

Thos. Hogg. Much like above but more white. **20c. each.**

Red Branched. This new variety, with immense heads of bloom is of unusual value, commencing to bear its enormous trusses of deep rose pink bloom while yet very small and increasing constantly in size and profusion of bloom. The stems and branches are dark purplish red which, with the fresh green leaves set off the clouds of rosy bloom admirably. **20c. each.**

HONEYSUCKLE

Golden Leaved. Give this full sun and it is very effective. Color of leaves gold and green. **15c. each; 2 for 25c.**

Halliana. The best white monthly honeysuckle. The foliage remains green nearly all winter. **15c.; 2 for 25c.**

HARDY MOONFLOWER - Ipomea Pandurata (Day Blooming Morning Glory) This magnificent species is perfectly hardy all over the United States. Its growth is very neat and graceful; leaves heart-shaped, flowers very large three and a half to six inches across, pure satiny-white, with a pinkish-purple throat shading off deeper in the tube. Many flowers are produced on the same peduncle, greatly prolonging its season of bloom. The flowers, which are bell-shaped, not flat as are those of the Moonflower, together with the leaves, are produced in the greatest profusion from the root up, making a dense shade even down to the ground. The rapidity of its growth is simply phenomenal. We sent an ordinary sized tuber to a customer in Texas, and the first summer it made thousands of feet of vine and was daily loaded with flowers. **Large Bulbs 15c.; 2 for 25c.; 5 for 60c.**

SUMMER FLOWERING OXALIS RED, WHITE, PINK

Fine for Hanging Baskets or Pot Culture

The oxalis is the most valuable bulb we know of for edging the borders of walks or flower beds; they produce an unbroken row of foliage and flowers. They bloom very quickly after planting and every bulb will grow. **We offer 3 colors;** white, light pink and deep pink at 10c. per doz.; 25 for 15c.; 100 for 40c.; 200 for 70c.; 300 for 90c.; 500 for \$1.30.

THE KING OF ALL SHRUBS

New Hydrangea Arborescens Grandiflora Alba

The Most Valuable Hardy Shrub Ever Introduced

Hydrangea Arborescens Grandiflora Alba

This magnificent hardy American shrub is the very finest addition to this class of plants found in many a year. The blooms are of the very largest size, of pure snow-white color, and the foliage is finely finished, lacking entirely the coarseness found in *H. Paniculata Grandiflora*. One of its most valuable characteristics is its coming into bloom just after the passing of all the early spring shrubs, while its long season of bloom, from early June through August, renders it doubly valuable, not only to the florist, but to every owner of a garden; perfectly hardy, standing 20 degrees below zero. The form of the panicle is much like that of the *Hyd. Hortensia*; the habit of the plant is excellent; it is bound to become the most widely grown and the most useful of all the *Hydrangeas*, and the most valuable shrub found in the American garden, while it is more than probable that the florist will find it a most important addition to his class of plants, both indoors and out. **Strong plants 25c. each; 3 for 60c.**

CYCLAMEN PERSICUM.
CYCLAMEN

Among the many charming plants which grace the greenhouse and sitting-room during the spring and winter months, few, if any, are so interestingly pretty and accommodating as the *Cyclamen*; its neat, chaste, graceful flowers, varying from snow-white to crimson, secure for it universal admiration, while the simplicity of its culture brings it within the reach of even those who can command no better accommodation than a sitting-room window. *Cyclamen Persicum Giganteum*. Prize strain. 20c. each; 3 for 50c. Seed 10c. per pkt.; 3 pkts. for 25c.

THE PEARL ACHILLEA.

ACHILLEA—The Pearl

The Great Cemetery Plant

Its flowers are pure white, perfectly double, and produced in large sprays, making it one of the finest cut flowers for bouquets, vases, baskets, etc., or for any kind of decoration. For cemetery planting it is the most valuable of all flowers, for it is sure to thrive and bear its great profusion of snow-white flowers nearly the whole summer. **Price, strong plants, 15c. each; 3 for 40c.**

THE WONDERFUL JAPANESE KUDZU VINE

If you wish a vine that will grow anywhere, in the best or poorest soil, then plant the Japanese Kudzu. It will flourish where nothing else will grow, and will last for twenty-five years or more. Please read what Mr. Meehan, of the nursery of Thos. Meehan & Sons, says: "Sticklers for the right must kindly excuse me heading these notes with the name given instead of the correct one, Pueraria Thunbergiana; but old names hang to us and it seems like giving the cut to an old friend to give this plant a new designation. This vine has been given much notice of late on account of its enormous annual growth. Shoots of 50 feet in a season are not at all uncommon. It is such a rapid grower that it must have lots of room, and for this reason common porches and similar structures are unsuited for it. What it wants is a pergola, or something on which it can entwine itself to reach the top of a tall building or tree; it wants no enticement to make more growth than any other vine in cultivation known in our nurseries to-day. The foliage of this vine is not unlike that of the Lima bean, but it belongs to the family of wistarias, and, like those vines, has racemes of flowers 6 to 8 inches in length; the blossoms are rose colored and fragrant. But instead of the racemes drooping, as they do in wistaria, they are erect. The plant when in bloom continues to flower for about six weeks. When grown to something overhead, such as a pergola, the flowers are free to the vision, but when growing to a tree, or similar object, the growth is so rapid as to overlap the blooms, and one sometimes does not know the vine is flowering till admonished to look for the flowers by the odor when passing, or those that have fallen. It is a most useful vine because of its rapid growth, and one which may be considered quite hardy, as, no matter if its shoots are hurt by cold, it springs up and grows like magic as the season opens."

JOSEPH MEEHAN."

Price—Strong Roots, 25c. each; 5 for \$1.; 12 for \$2.

Extra Large Roots, 3 years old, 45c. each; 3 for \$1.

Seed. It is no trouble to grow plants from seed. Pkt., 10c.; 3 for 25c.

COPYRIGHTED 1895 BY BEAN

Japanese Kudzu Vine

BOSTON IVY (*Ampelopsis Veitchii*). This very attractive clinging vine will be readily recognized by our readers when we remind them that its glossy ivy leaves overlap each other and its long delicate, young shoots stretch up the stone walls of our finest city residences. The tendrils at nearly every joint cling firmly to the smoothest surface of rock or wood. The glossy leaves assume in the Autumn the most beautiful tints of scarlet and crimson. The handsomest vine possible for growth on house walls, especially the foundation and the first story, round the doors and windows. It is perfectly hardy. Strong Plants, 20c. each; 3 for 50c.; 7 for \$1. Seed per Pkt., 5c.

APIOS TUBEROSA

Or the Tuberous-Rooted Wistaria

A valuable hardy tuberous-rooted climber, closely resembling the common wistaria in vine and foliage, and having clusters of rich deep purple flowers, which have a strong, delicious violet fragrance. Plant the bulbs near a trellis, fence, tree, or any place where you may wish a climber. They grow to a great height and bloom profusely; perfectly hardy. 5c. each; 6 for 25c.; 12 for 40c.

NEW CRIMSON MOUNTAIN BEAUTY VINE

(Antigonon Leptopus)

This is a new climbing vine of striking and remarkable beauty, and though not quite hardy here, is especially recommended for the South and Pacific Coast, where it will give immense satisfaction. It is a strong vigorous climber, suitable for covering walls, porches, verandas, fences, etc., has handsome foliage and is covered for months at a time with splendid clusters of bright crimson flowers, like flaming red wistarias. Those who have seen it in bloom in the South say it is the most magnificent flowering vine they ever saw, and in parts of Central America where it abounds, it is said to color the mountains with a blaze of glowing crimson. It is certainly unequalled in brilliant beauty among climbing vines, and we hope our friends will give it a liberal trial. As far north as New York it should be protected in winter.

Strong Plants 15c. each; 2 for 25c.; 5 for 50c.

Seed per Pkt., 10c.

Crimson Mountain Beauty Vine

LARGE FLOWERING BEGONIAS

Unsurpassed as bloomers. From the time the plants are fairly established they bear a continuous supply of flowers of strikingly beautiful colors, which are set off by deep green foliage.

Vernon Single White. No other kind of flowering begonia can begin to compare with B. Vernon for profusion of blooms, and this variety is covered for months with pure white flowers. **15c. each; 2 for 25c.**

Vernon Single Pink. Lovely blush and pink shades. In other respects exactly like above, and a plant of perpetual beauty. **15c. each; 2 for 25c.**

Rubra. One of the best of all begonias for house culture. They will commence to bloom when but 6 inches high, and will continue to bloom without ever missing a day for 5 or 6 years at a time. **15c. each; 2 for 25c.**

New Begonia, Argentea Guttata. This variety is an introduction by M. Lemoine, and is a cross between Olbia and Alba picta. This beautiful sort has the silvery blotches of Alba picta and the grace and beauty of growth of Olbia. It has purple-bronze leaves, oblong in shape, with silver markings, and is in every way a most beautiful begonia. It produces white flowers in bunches on ends of growth stems. **Strong plants, 15c.; 2 for 25c.**

New Double Begonia, Vernon. There is certainly no other plant producing fine double flowers in such quantity the year round as does this. It is adapted to any window or porch, or it may be bedded out in summer. In any position it is always a prize bloomer, and beautiful in foliage. **20c. each; 3 for 50c.**

Vernon Double White, Pure. **20c. each; 3 for 50c.**

Vernon Double Crimson. Deep and rich. Foliage rich bronze in open air, and very handsome. **20c. each; 3 for 50c.**

Large-flowering Begonia.

Rex Louise Closson.

BEGONIA REX

Enormous triangular leaves of satin-like texture, and metallic lustre, richly-belted and zoned with the most striking colors. No finer decorative plant anywhere.

Louise Closson. One of the richest and most beautiful of the Rex family. The coloring is simply magnificent, center of leaf deep bronze, with a broad band of silvery rose, edged bronze and spotted rose. **20c. each; 3 for 50c.**

Mixed Begonia Rex. Our collection of Rex Begonias is perfectly magnificent, including over 30 finest named sorts, which we can supply in mixed varieties. **15c. each; 3 for 40c.**

PASSION FLOWER

Constance Elliot. One of the most graceful of all vines, worth a place in every home for its exquisite foliage. The shining, leathery, five-fingered leaves fringing the slender stems. Flowers pure white with a very slight touch of color. **15c. each; 2 for 25c.**

SWEET VIOLETS

Giant Imperial. Plant vigorous and absolutely free from disease; flowers immense in size; color clear violet purple (does not fade out); fragrance intense; flowers borne on strong stems 10 to 14 inches long. **10c. each; 3 for 25c.**

Swanley White. It pots it grows luxuriantly and is loaded with flowers. In the garden it is hardy with slight protection, and greets us in early spring with a profusion of its large, snowy, sweet-scented blossoms. The growth of the plants is vigorous and healthy, bearing in great numbers very large, perfectly double flowers of pure snowy whiteness and unexcelled fragrance. **10c. each; 3 for 25c.**

Marie Louise. This is the variety which is grown by the hundreds of thousands to supply the cut flower markets of the country. One of the finest purple, very double, sweet scented, **10c. each; 3 for 25c.**

Princess of Wales. Of hardy, vigorous growth, the plants are wonderfully free flowering, with stems from 10 to 12 inches long; large green leaves of a thick, leathery texture. The grand single flowers of a true violet-blue color that does not fade, are of round, symmetrical form, almost as large as pansies, and of the richest, most delicious fragrance. **10c. each; 3 for 25c.**

1 each of 4 Violets for 30c.

PASSION FLOWER SEED

Very beautiful rapid-growing climber; grown for their very handsome foliage and striking flowers; elegant for window culture or outdoor planting, and grows very quickly from seed. Mixed colors. **Pkt., 5c.**

Hibiscus "Peachblow."

Maranta.

MARANTA (*Stove Plant*). A beautiful and most useful dwarf growing variety, especially adapted for use in connection with ferns for filling fern dishes, jardinieres, etc. Its leaves have an exquisite, silky appearance and are beautifully covered with rich markings; the outer portion is olive-green, the middle a silvery gray color, ornamented with large blotches of dark velvety purplish maroon. It is of a much neater habit of growth than the cut indicates. **15c. each; 2 for 25c.**

ABUTILON FLOWERING MAPLE

The abutilons are popular for their vigor of growth, clean foliage and constant blooming, and will give great satisfaction as summer bloomers.

Eclipse. A pretty trailing variety. Foliage beautifully marked deep green and yellow; flowers bright yellow, with crimson throat.

Savitzii. A striking variety. The leaves are green, with a heavy white border, more than one-half of the leaf being pure white. The contrast between the white and green is very sharp. It is a strong grower, and thrives well out of doors, retaining its variegation in the hottest sun. It is admirably adapted for a border plant, as it harmonizes splendidly with the bright colors of geraniums, the noble foliage of the cannae and caladiums, and is especially fine with palms and dracænas.

New Gold Spotted Abutilon. Thompsonii Plena. Rich, glossy green leaves spotted all over with deep golden-yellow, fine double flowers, rich orange-yellow, veined with crimson, beautiful.

Infanta Eulalia. This is perfection itself. Plants dwarf and short jointed, producing exquisite large cuffed blossoms by the score from the time the plant is 4 inches high. Blooms all the time, summer and winter. Color, a most beautiful soft, satin pink. **Strong plants, 15c. each, 4 for 40c.**

SEED. We have the finest strain of Abutilon seed to be found. All the new sorts. **Choice Mixed, Pkt. 10c.**

Three Grand Hibiscus

Hibiscus Peachblow. This is one of the finest plant novelties offered in recent years. The flowers are double and from four to five inches in diameter; of a charming, rich, clear pink color, with a small deep crimson center; an entirely new and most beautiful shade. We are confident it will give entire satisfaction to all who grow it, either in pots, or plants out in the garden. It is also a good winter bloomer in the greenhouse or sunny window. **Strong Plants 15c. each; 3 for 40c.; 8 for \$1.**

Hibiscus Double Crimson. Flowers not quite so large as Peachblow, but otherwise plant is identical to above, with the exception of color, which is a **deep rich crimson**, and grown side by side with Peachblow will indeed give you a beautiful contrast of color. **Strong plants 15c. each; 3 for 40c.; 8 for \$1.**

Hibiscus Cooperii Tricolor. This is one of the most beautiful variegated foliage plants that we know of, and should be in every window collection. The leaf markings are white, brown, green, red, etc. **15c. each; 3 for 40c.**

CYPERUS,

Umbrella Palm

Alternifolius. A beautiful, easily grown plant that is admirably adapted to many different modes of culture. It makes a very showy plant for pot culture, is one of the best for ferneries, while for the aquarium it is without an equal. **15c. each; 2 for 25c.**

Seed germinates very quickly and soon makes fine plants. **Pkt. 5c.**

Russelia Elegantissima

SCARLET FOUNTAIN

Here is certainly a fine new plant that you should not be without. It's another of Mr. Lemoine's scientific works, and a vast improvement of the Russelia. The habit is drooping as shown, the slender branches and leaves being completely hidden by hundreds of the vivid scarlet tubular flowers. It is so floriferous that tiny cuttings show more flowers than leaves. It is one of the finest and best new plants ever introduced and one that will give satisfaction to every one.

15c. each; 2 for 25c.

Justicia Velutina

New Dwarf Justicia Velutina

Grown extensively by Parisian florists, for garden and table decoration. When only a few inches high it begins to bear clusters of large pink, feather-like flowers, lasting for a long time, and is never thereafter out of bloom—frequently fifty spikes at one time. An excellent novelty. Of easy growth. Highly praised.

Strong Plants. Price, 20c., each; 3 for 50c.

Lycium Chinense

Alcalypha Sanderi

The flower spikes, which appear in pairs from the axis of the leaves, grow from 2 to 3 feet in length. They are of bright crimson color, and look exactly like a long piece of crimson scarlet cord, drooping and mixing among the brightgreen foliage with charming effect. It will be extensively used as a pot and window plant everywhere, as plants will bloom when not over 3 inches tall and continue to bloom throughout the year. For bright and curious effects it has no equal. Wherever the plant has been exhibited in this country and in Europe it has attracted universal attention and admiration. It has received silver and gold medals and premium certificates at the Flower shows this Autumn. Strong plants,

ready to bloom, 20c., each; 3 for 50c.

Alcalypha Sanderi

Caladium Esculentum
(Elephant's Ears)

A grand sub-tropical foliage plant growing 4 ft., high and bearing immense shield shape leaves of the smoothest richest green. Extra fine for groups or single specimens upon the lawn, or as borders to tropical beds, or to plant at the margins of ornamental pools, etc. The bulbs should be taken up in fall and wintered in cellar, 15c. each; 3 for 35c.; 6 for 65c.; 12 for \$1.15.

Crotons

These are but little known among general collections of house plants, yet they are not exceeded in beauty of foliage by any foliage plant, not even palms. The leaves are long, narrow and graceful, and are most charmingly spotted and variegated. Strong Plants, 15c., each; 2 for 25c.

Holly Berry Vine (Lycium Chinense)

A most vigorous hardy climbing plant when trained to an arbor, fastened to a fence, attached to a tree, to the pillars of a piazza, or in any location where a hardy vigorous climber is desired. It sends out numerous side branches, so that it covers a great amount of space in a short time, and every new growth is at once covered with bright purple flowers which are succeeded by brilliant scarlet berries nearly an inch long, every branch being loaded with them; the contrast between the glossy, dark green foliage and shining scarlet fruit is extremely beautiful, surpassing Holly in appearance. It continues flowering and new berries are forming from late Spring until frost. The berries ripen in early Autumn and remain on the vine late into the Winter. Strong plants, 15c., each; 3 for 40c.; 12 for \$1.25.

Fuchsia—Storm King

6 SUPERB-FLOWERING FUCHSIAS

Storm King. Its graceful, weeping habit, and its superlatively beautiful flowers, more freely borne than those of any other sort, make it the most valuable of Fuchsias. It is always in bloom, often as many as 200 buds and blossoms on a plant at once. The branches droop most gracefully, and the blossoms are frequently as large as tea cups. The buds for two weeks before they expand are balls of glowing scarlet crimson. When expanded the enormous double flowers are almost pure white, capped by a calyx of glowing scarlet. **15c., each; 3 for 35c.**

Black Prince. This is, without question, the very finest Fuchsia grown for the amateur to cultivate. It makes a shapely bush, is robust in growth, free from disease and insects, and is probably the freest in blooming. Blossoms of a beautiful waxy-carmine or pink color. Certainly a plant for easy culture. **15c. each; 3 for 35c.**

Trailing Queen. This Fuchsia is an entirely new departure different from other large-flowering varieties in its habit of growth, as it is a trailing vine. The young plants, as they commence growth, creep out to the edge of the pot, and then go trailing downward. It continues growing and branching in this way until the vines are a solid wavy mass of the most elegant foliage and purple flowers. The flowers are borne in large, drooping clusters; very large, long, graceful. **15c. each; 3 for 35c.**

Phenomenal Fuchsia. The grandest of them all. Phenomenal is the largest flowering Fuchsia in cultivation. The plant is a tall grower, branching like a tree; the leaves are dark, glossy green, with veins of dark crimson, giving the foliage a rich, ornamental appearance. The flowers are of enormous size, a single flower measuring $3\frac{1}{2}$ inches across; sepals bright scarlet, with rich, violet purple corollas, very double. **15c. each; 3 for 35c.**

Speciosa (Ladies' Eardrop). All who know it value it very highly for its quality. Habit is erect and compact, presenting a decidedly neat and attractive appearance as a pot plant. The fine star-shaped flowers are produced in profusion and begin when plants are quite young. The flowers are 4 inches or more in length, tube and sepals bright rose; corolla brilliant carmine. **15c. each; 3 for 35c.**

Wave of Life. This is a great novelty among Fuchsias. The foliage is golden yellow which fact alone would recommend it, but as a bloomer it has no equal, plants producing hundreds of beautiful purple flowers with bright pink sepals. **20c. each; 3 for 50c.**

One each of the 6 named Fuchsias, 75c.

Fuchsia seed, Finest mixed, 15c. per Pkt.

EVERBLOOMING CAPE JESSAMINE

This grand novelty does not differ from the common Cape Jessamine or *Gardenia* except it blossoms all the year round, while the old sort blossoms only for a short time in the spring. The flowers of this are very large and perfect with pure white wax-like petals and glorious fragrance. Large, double and surpassingly lovely. A good plant will show flowers every day in the year, and it is an easy thing to manage, growing well as a window plant. **20c. each; 3 for 50c.; 7 for \$1.00.**

GREVILLEA ROBUSTA, or SILK OAK

A splendid decorative plant, much quicker growing than a Palm and very effective with its long, drooping silky foliage, deeply cut, like a large, growing Fern, or a pinnated-leaved Palm. Be sure and try it for your window. It cannot be excelled.

15c. each; 2 for 25c.; 9 for \$1.00.
Seed per pkt. 10c.

Double Ivy Leaf Geranium. Caesar Frank.

Geranium, Mme Bruant.

12 VERY BEST NAMED GERANIUMS

Alphonse Ricard (No. 4) (**Semi-Double Scarlet**.) Color deep vermillion scarlet, compact habit; strong vigorous grower, broad deeply zoned foliage, large trusses of flowers, borne on very heavy stalks.

Beaute Poitevine. Very large and semi-double florets of the most beautiful and distinct form and borne in immense trusses; very fine bloomer, and as a bedding variety it has no equal in its color, brilliant salmon.

Black Knight. The very best bedding variety; very robust grower and always in flower; color dark red, almost black.

General Grant. The finest single scarlet bedder. Color similar to the double Gen. Grant. Very free flowering and extra strong and vigorous growth.

Getruede Pearson. One of the older sorts that is always scarce; a fine dwarf habit, with foliage attractively zoned; color pure rose pink with a conspicuous white blotch on the two upper petals; the flower is of beautiful form and largest size; a profuse bloomer trusses held erect, well above foliage.

Gloire de France. Individual flowers very large and double; color, salmon white, with a dark distinct salmon red center.

Jean Viaud. Very large semi-double blooms borne in large trusses well above the foliage; individual floret large, color bright rosy pink with distinct white blotch in the center, habit dwarf, compact; very vigorous and exceptionally free blooming; foliage clear deep green with distinct bronzed-green zone; probably the best pink Geranium for bedding yet introduced.

La Favorite. In the La Favorite we have the finest double white Geranium ever introduced, and unlike other double white Geraniums it is suitable for bedding and flowers as profusely as the best single varieties. The perfect double flowers are unsurpassed for cut flowers. They are borne in trusses and are spotless, snowy white, retaining their pure whiteness even in the heat of summer.

Madame Debouche. This is a marvel in beauty. Large spherical trusses of very double round florets. Color is soft shade of pink like the La France. Very dwarf habit; profuse bloomer. Excellent for cut bloom.

Madame Bruant. It is entirely distinct from any other Geranium in cultivation; the plant is a very vigorous grower and very free flowering. Center of flower is white veined with carmine lake, and each of the five petals bordered with bright Solferino.

Marquese de Montfort. Deep, brilliant, carmine-purple; one of the most novel and striking shades yet seen: excellent grower and profuse bloomer; fine large floret, massive truss held well up and erect; foliage deeply zoned, exceptionally novel; this variety was extensively used the past season as a bedder and gave general satisfaction.

Mad. Jaulin. Holds an enviable record among the delicate pink or blushed varieties. Plant is of dwarf but robust habit of growth, flowers of good size and very abundant. Center of flower delicate pink; outside pure white. A decidedly attractive variety. **Strong Plants, 15c. each; 5 for 50c.; 12 for \$1.00.**

2 GRAND NOVELTIES

Cactus-Flowering Geraniums

A very unique and strikingly beautiful distinct type, which, originating in England but a few years ago, at once won great popular favor. The peculiarity of the bloom consists in graceful, narrow curled and twisted petals, similar to those of the cactus dahlia, produced in fine trusses, and in the greatest profusion, on long stems held well above the foliage.

Of remarkably handsome and thrifty but dwarf growth; as pot plants they are unsurpassed and for window boxes, or for the conservatory in winter, they are unusually pleasing, being at once beautiful and effective. **Mixed Colors 20c. each; 3 for 50c., 7 for \$1.00.**

IVY-LEAVED GERANIUM

CAESAR FRANK, (Lemoine 1905)

This is unquestionably destined to become the most popular **Ivy Geranium** yet introduced; the color is the most magnificent shade of soft crimson, with an exquisite shading of tender rose at the base of petals. The flowers are about as double as those of the Crimson Rambler Rose—which they resemble—only much richer, in color and finish, produced on long stems in enormous trusses. Habit, vigorous, quick-growing and pleasing with a strong constitution. For baskets and vases it is all that could be desired.

Considering its general good behavior, being in keeping with its other good points we are convinced that it is a most desirable sort. **25c. each; 3 for 60c.; 6 for \$1.00.**

SCENTED GERANIUMS

Exceedingly useful on account of their fragrant foliage; largely used in bouquets and baskets of flowers, also for making up toilet waters, fragrant jars, etc. We offer the sorts named below: **Rose, Nutmeg, Peppermint, Mrs. Taylor** (scarlet flower), **Skeleton Leaved**. Price, 15c., each; 5 for 50c.; 12 for \$1.00.

Pansy Geranium. This new and beautiful geranium is of easiest growth, dwarf in habit, and literally covered with flowers all the time, and as it requires little or no attention it is invaluable as a window plant. The coloring and marking of the flowers are most extraordinary—light pink, white, dark purple and black, etc., almost rivaling the pansy in uniqueness of flower. It is this combination of coloring which obtained for it the popular name of Pansy Geranium. **Strong Plants 20c. each; 3 for 50c.; 7 for \$1.00.**

Mrs. Parker (Silver Leaves). A beautiful double-flowering, ivy-leaved in which we have the only double-flowering variety in the silver leaved section. While the foliage is deep green, with a broad border and margin of pure snow white, the flower is perfectly double and of a clear bright pink, a combination at once novel and beautiful in the extreme. **Strong Plants, 20c. each; 3 for 50c.; 7 for \$1.00.**

BEAUTIFUL FERNS

"OSTRICH-PLUME" FERN

An entirely new form of the famous Boston Fern. The fronds grow in the most luxuriant manner, the pinnae subdividing, making miniature fronds, which are superimposed on the main fronds, looking as if two or even three were condensed in one. They are graceful beyond description, feathery, plump; nothing describes them better than Ostrich Plumes, which they very much resemble. **20c. each; 3 for 50c.**

THE NEW DWARF BOSTON FERN (*Nephrolepis Scotti*)

A compact, dwarf form of the favorite Boston Fern, in general appearance very much like the original form. It is just as gracefully drooping in habit of growth, but is more compact, making well finished, shapely specimens in the smaller sizes, yet growing into grand large specimens in time. It has been exhibited at all principal plant shows the past two years, receiving high awards. **15c. each; 3 for 40c.**

The New Fern,

WHITMANII

The newest and finest Fern yet introduced. This fine Fern received first award at the Society of American Florists. It is somewhat similar to the Pierson, but more compact, more sturdy in its growth, and never running back to the old Boston leaf. **20c. each; 3 for 50c.**

Adiantum Cuneatum—(Maiden Hair Fern.) Very popular; the most graceful and useful in cut-flower work. **15c. each; 3 for 40c.**

FRESH FERN BALLS

These are large, basket-like bunches of Fern roots interwoven with moss. When suspended in a window, and watered, elegant green foliage starts out from every side, top and bottom, making a highly ornamental object and one that keeps fresh and green for years. Grows well in sun or partial shade, and is a novel and beautiful object. These Fern Balls are made in Japan, and we import them every year. Greatest success is had with strictly fresh stock.

Large balls 45c. each; 3 for \$1.00. Smaller size 30c.; 3 for 75c.

Japanese Fern Ball in Leaf

"Pierson" Boston Fern

BOSTON FERN

(*Nephrolepis Exaltata Bostoniensis*.)

This plant is so well known it needs no description. No other plant is used so extensively, and no other makes as fine a specimen plant. The drooping habit of the long, graceful fronds makes it an excellent plant to grow as a single specimen for the table or pedestal. **15c. each; 3 for 40c.** Fern seed, choicest mixed, saved from finest collection. **Pkt., 10c.**

Weeping or Filifera Palm

PALMS

Latania Borbonica. The Chinese Fan Palm, from which the palm-leaf fans of commerce are made. The most popular palm in cultivation for decorative work; stands neglect well and also a considerable amount of cold. If grown in partial shade while young the leaves will be of a richer, darker green. **Strong plants, 15c. each; extra size, 40c.**

Cocos Weddeliana. This beautiful palm is unquestionably the most elegant and graceful in cultivation. It is admirably adapted for the center of jardinières and fern dishes as it retains its freshness for a long time, while for dinner-table decoration it is unexcelled, and should be in every collection.

Large plants, 12 to 15 inches, 30c. each. Extra size, 60c.

One each of the 6 palms, by mail postpaid, for \$1.00; one each of the 6 palms; extra size, \$2.25.
Express not prepaid.

WEEPING LANTANA

A Weeping Plant of Great Beauty. One of the grandest basket plants grown. The plant has a most graceful, drooping habit, grows very rapidly and blooms continually summer and winter, producing large clusters of the most delicate lilac or rosy-pink.

15c. each; 3 for 40c.

Filifera or Weeping Palm. This plant needs no petting or skill to grow. It flourishes with any treatment in any location in the house, porch or outside. The leaves are fan-shaped, beautifully cut and draped with a silk-like filament along the segments of the leaves. The plant is a compact grower and will make a grand ornament during winter. **Plants, 15c.; extra size, 25c. Seed, per pkt. 5c.**

Kentia Belmoreana. The Kentias are the hardest in cultivation, and give better satisfaction as a house plant than any other variety. They are of slow growth, and are not affected by the dust and dry atmosphere of the house, and were we to select one palm only, it would be a Kentia.

Strong plants, 20c. each; extra size 60c.

Areca Lutescens. One of the handsomest and most useful palms for house culture, to which it adapts itself readily. Once established it makes a regular growth, and if given a fair amount of light it will prove superior to very adverse conditions. Its beautiful leaves are pinnate, and gracefully arched, rich shining green, and very firm in texture. The stems and sheathing petioles are perfectly smooth, as if polished, yellow in color, mottled with black, forming an elegant contrast with the deep green. Grows to an immense size. **Strong plants, 15c. each. Extra size, 50c.**

**Phoenix Roebelenii.**

Our illustration conveys but a faint idea of the delicate beauty of this the most graceful of all the Phoenix, and a Palm which we feel safe in predicting will become one of the most popular varieties for room decoration. The plant is of vigorous growth, and its gracefully recurving leaves, with very narrow dark green pinnae, give the plant a lightness and airiness not surpassed, if equalled, by the popular Cocos Weddeliana; at the same time it is hardy as a Kentia, succeeding admirably as a house plant. **20c. each; 3 for 50c. Extra size, 50c.**

Ivory. Unexcelled for pot culture or cutting: pure white flower of exquisite form and finish. Has been shown in grand shape at all recent exhibitions: it is especially noticeable for its grand globular form, its Dahlia-like petals and absolute purity of color.

Modesto. This variety has proven one of the finest yellows, and has been a prize winner at every exhibition of 'Mums. It is intense in color, unsurpassed in size, of an incurved solid form, with full high center.

Maud Dean. Probably the most popular large pink. An extra good grower, making long stout stems with beautiful foliage. Flower extra large and splendidly formed.

Price—**Above Chrysanthemums, 15c. each; 3 for 35c.; 8 (the set) for 75c.**

GENERAL LIST OF CHRYSANTHEMUMS

Col. D. Appleton. This is in yellows what the Timothy Eaton is in whites, outclassing all other yellows at the fall shows. The flower is Japanese incurved, bright yellow in color, of great depth and solid build. Besides its immense size and beautiful color, another point in its favor is its faultless stem and foliage.

The Queen. A very popular pure white Japanese incurved variety.

Major Bonnaffon. Soft clear yellow globular flowers, crowded full of petals, perfect every way, one of the very best kinds.

Bronze Beauty. Quite an early sort, with large, double incurved bronzy-yellow flowers, long stems.

Mrs. Chamberlain. Enormous double flowers on strong, long stems, medium, early. Color, pure pink.

Timothy Eaton. This is the largest globular incurved white chrysanthemum yet introduced, flowers measuring 25 inches in circumference. Awarded first prize at every flower show last fall as the largest and finest of white chrysanthemums. The stems are strong and stiff.

Glory of the Pacific. An extra early pink, magnificent size and depth, with broad petals, which finely reflex, showing the clear pink color to excellent advantage: this is the best very early pink chrysanthemum to date.

Black Hawk. The largest and most beautiful dark crimson scarlet ever introduced; the richest crimson velvet chrysanthemum ever raised; the flowers look as if made; the very color so much desired and never showing any dull colors. The flowers are borne on stiff stems, which are nearly covered with dark green foliage. A wonderful variety all around and cannot be recommended too highly.

10c. each; 3 for 25c.; 8 for 55c.

CHRYSANTHEMUMS

Justly called the "Queen of Autumn," are the most gorgeous and elegant of all the fall and winter blooming plants.

NOVELTIES

Alice Byron. This is a magnificent variety, with every good quality. For size, finish and purity of color it leaves little to be desired. Color, purest white, with smooth clear florets. In some stages it resembles Mrs. H. Weeks but as the florets expand, the whole fall back and form into a deep, solid bloom. This will be found an extraordinary fine exhibition variety

"Golden Chadwick." It is a sport of the well known popular variety W. H. Chadwick, same habits, form, etc., as the white variety, except in color, which is lemon yellow. A magnificent variety in both form and color, and unsurpassed in size.

Dr. Enguehard. A superb pink variety: one of the very best introductions of recent years. It originated in France, and has now become thoroughly Americanized and has been awarded the highest honors wherever exhibited. In color it is a remarkably beautiful shade of true pink, showing no traces of lavender or purple whatever. It has the reputation of perfecting all its blooms, which are spherical in form, incurved, very large and perfectly double, making it alike invaluable for commercial and exhibition purposes. The stem and foliage is simply perfect. It is easy to handle, and will prove a choice variety for amateur cultivation.

Polly Rose. Extremely early, pure white. A sport from well known Glorie of Pacific, of which it is an exact counterpart except in color.

Mrs. O. P. Bassett. The finest of its color ever offered. It is a sport from the grand variety, Mrs. Henry Robinson, and takes after its parent in all the fine qualities. The color is a fine canary-yellow of a soft texture. It is a large flat incurved variety with broad petals, out petals drooping a little as the flower opens. The dark green foliage, stiff stems, and medium height, make it one of the finest cutter-flower varieties we have ever grown. It has received several certificates of merit at the Chrysanthemum shows.

Price—Above Chrysanthemums, 15c. each; 3 for 35c.; 8 (the set) for 75c.****

Hardy Chrysanthemums

These beautiful varieties are now universally popular for outdoor bedding, and considering their many good qualities, there is no cause for surprise to see them cultivated so extensively. They produce a lavish profusion of blooms, giving color, life and beauty to the garden just at a time when other plants have been destroyed by frost and are looking their worst. Frost does not materially affect the flowering, and it will frequently happen that an armful of flowers can be cut late in November. They are quite hardy, and, with but slight covering of leaves or litter during the winter, will take care of themselves after once planted.

Alena. Large flower, beautiful daybreak pink.

Little Bob. Small red flowers.

Oriole. Yellow, marked with crimson.

Viola. Deep violet. Very showy and distinct.

Zenobia. Bright pure yellow.

Each 12c.; 3 for 30c.; 5 for 45c.

Chrysanthemum Seed. Composed of all the very best Japanese and Chinese sorts, imported direct from Japan. Beautiful colors, curved and twisted in a manner never before seen.

Hardy Varieties, Mixed. Pkt., 5c.

Annual Varieties, Mixed. Pkt., 5c.

CARNATIONS

The delicately rich and grateful odor, in connection with the beautiful colors and perfect outline of the carnation, secures for it a prominent place in all collection of plants, either for the house or garden. It is one of the sweetest of flowers, and yields an abundance of bloom all summer in the open ground. The plants may be potted in September, watered and shaded a few days, and they will go right along blooming all winter, in a bright sunny window.

CARNATION WINSOR

The most talked about carnation at the Toronto Convention. Won first prize for best 100 pink

This is sure to prove a winner. Nothing approaches it in color, which is a clear silvery pink—a shade between Enchantress and Mrs Thos W. Lawson—and much more beautiful than either. In fact, it is just the shade that we have all been trying to get. The color will make it sell in any market. The stem is just right. The flowers are considerably larger than Lawson and much better shaped. As a grower it has everything that can be desired. So far we have not seen any large flowering variety quite so free as Winsor.

Anyone who fails to plant Winsor this year will regret it. Rose pink Enchantress is good, and a good many other varieties are good, but if you want the winner, plant Winsor.

ARISTOCRAT

Color like *Lawson*, but brighter; flower held built and perfect in form, size $3\frac{1}{2}$ inches; splendid stem and calyx; fine keeper; free and continuous in bloom, beginning in September. Won the seedling premium at Chicago show for "100 best *Lawson* shade." Habit and health unexcelled.

NEW PINK CARNATION, ENCHANTRESS

(The Great \$10,000.00 Beauty)

The great forward stride in Carnations is made more manifest in this than any other since the advent of the Mrs. Thos. W. Lawson. It was raised by the same grower, and he pronounces *Enchantress* superior to it. The flowers are $3\frac{1}{2}$ to 4 inches across when well-grown; the stems are strong and from 2 to 3 feet long; the color is a superb shade of rosy blush-pink, richer and warmer towards the center; an early and continuous bloomer, a strong, healthy grower; the ideal Carnation in every way. Ten thousand dollars were paid for the stock of it by a cut-flower grower, the best evidence of its value.

Lady Bountiful. A pure white, $3\frac{1}{2}$ inches across, stems 24 inches, splendid calyx and good clove fragrance; for a big, fine carnation this is marvelously free; the bench has been a sheet of bloom constantly up to this date. In perfect health. Probably the best white carnation to date.

Price, above Carnations, 20c. each; the set of 4 for 60c.

EIGHT CHOICE CARNATIONS

Lawson. This famous carnation was bought last year for \$30,000, the highest price ever paid for a flower of any kind. A standing challenge of \$50,000 to produce its equal within a year failed to find one, so it still remains undisputedly the best in the world. The flowers are the largest, deepest, best formed. The stems are the longest and strongest. The color, purest rose pink, which illuminates splendidly under artificial light.

Governor Roosevelt. A large, full flower, symmetrical to a degree, strong, stiff stems and perfect calyx. Color, deep, rich, brilliant scarlet shaded with maroon so as to give a general crimson-scarlet effect.

Lizzie McGowan. Extra large, full, perfect flowers, pure snow-white; deliciously perfumed; very free bloomer; one of the best.

New Scarlet Carnation, Robert Craig. Perfection is more nearly attained in this peerless variety than in any other scarlet yet introduced. The flowers are of the largest size, perfect form, fragrant, and borne on long, stiff stems. The growth is splendid, healthy and vigorous. An early and continuous bloomer.

General Maceo. Very full, deeply fringed flower, $2\frac{1}{2}$ to $3\frac{1}{2}$ inches in diameter, on stiff stems, 12 to 18 inches long under ordinary culture. Ground color deep brilliant scarlet, heavily overlaid with maroon, making it one of the darkest and richest shades yet seen in carnations, as rich and striking as the *Meteor Rose*.

Mrs. Patten. Pronounced the best fancy colored or variegated flower in existence. White, delicately marked with deep pink. Blooms early and freely throughout the Carnation season. The cut flowers harmonize nicely with those of almost any variety.

White Lawson. A pure white sport of Mrs. Thos. W. Lawson.

Red Maceo. A brilliant scarlet, easy to grow and of healthy constitution.

Price, above Carnations, 10c. each; 3 for 25c.; 6 for 50c.; 8 for 60c.

Special Offer—1 each of 12 Carnations on this page for \$1.00.

CRIMSON CREEPER

(*Heeria Mexicana*)

We are indebted to the Agricultural Department at Washington for this splendid new pot plant, so entirely distinct from any other and so exquisitely beautiful and useful. As a pot plant it is highly ornamental all the time the long slender and exceedingly graceful vines, red stemmed with dark, rich-green foliage, being exceedingly pretty as they hang in wavy trusses over the side of a hanging pot or basket. It blossoms during late winter, spring and early summer the flowers being large and of a peculiar shade of rich bright crimson, and borne in great profusion. Our customers will find this splendid new creeper exceedingly attractive and novel, and we offer it at a price that brings it easily within the reach of all. 20c. each; 3 for 50c.

PINEAPPLE SALVIA (Grahami)

This is one of the finest salvias grown to-day. The leaf has such a delightful Pineapple fragrance, that a bed of it in open ground or a plant in the house will produce the most delicious fragrance. Covered with bright red flowers all summer and winter. 15c. each; 3 for 40c.

BABY PRIMROSE

It blooms in thumb pots when the plants are scarcely 1 or 2 inches high and continues to bloom for 10 months in succession, forming dense clumps of foliage crowded with dozens of long flower spikes, dainty and graceful, of a most pleasing rose color, with eye or center of pale gold. They are carried in tiers on erect but delicate stems, and positively remain fresh for two weeks after being cut. It is unequalled in keeping qualities. Plants ready to bloom, 15c.; 2 for 25c. Baby Primrose Seed germinates very quickly and the little plants throw up flower stalks when only a few weeks old. Pkt., 10c.; 3 for 25c.

PARROT'S FEATHER

A lovely mossy plant with long trailing stems covered with plumy feathery foliage, of the freshest loveliest green imaginable. Fine for aquariums, where few plants do well, and makes the water much more healthful for the fish. Grows nicely also in water tubs or ornamental pools, and is much admired when grown in hanging pots or baskets of soil. It grows as well in soil as in water, if it is kept well watered. It is one of the most charming trailing and drooping plants, and grows so rapidly that it can be cut with the greatest freedom. One of the most novel ways of growing it is to plant it in a water-tight hanging basket so water can be kept standing on the surface of soil, and the plant will trail down over the side in the most charming manner. 10c. each; 3 for 25c.

Parrot's Feather

OTAHEITE ORANGE

The Great House Orange

This wonderful Orange is a regular dwarf, growing no larger than a good specimen geranium and equally as easy to manage. Incredible as it may seem it has produced flowers and ripened its fruit perfectly in a two-inch pot. Its beautiful blossoms are produced in the greatest abundance, are as fine and large as other Orange flowers and possess the same delicious fragrance. The fruits are about half the size of ordinary oranges, with a flavor resembling the Mandarin. It is not unusual for the plant to produce a full crop of its exquisite flowers while yet full of its pretty fruits. It is a plant of remarkable beauty and has received unstinted praise from every quarter. Fine mailing plants large enough to bloom, 20c. each; 3 for 50c.

The Wonderful NEW LEMON PONDEROSA

It is a true ever-bearing variety. On a plant six feet high no less than eighty-nine of these ponderous Lemons were growing at one time. It was a beautiful sight to see. The tree was blooming and at the same time had fruit in all stages of development, from the size of a pea up to the ripe fruit showing it to be a true ever-bearer. It blooms and bears fruit when quite small and you do not have to wait 4 or 5 years to get fruit.

Fruit has been taken from this tree weighing over four pounds. The lemons will average two and one-half to three pounds. Now this may seem to you like a fairy tale, but it is a fact that this is the largest lemon known. There is a lemon sold by nurserymen that goes under the name of Large Lemon, but **Ponderosa** is distinct from that variety. **Strong plants, 20c. each.: 3 for 50c.; 6 for \$1.00.**

The King Raspberry. The earliest red raspberry on record. It is the earliest red raspberry that makes the money—they often sell for 25 cents per quart. It is thus described by H. E. Van Deman, the well known pomologist: "Round, medium size; light crimson color; moderately firm and of excellent quality. A seedling of Thompson, and ripens about the same time, but larger and more productive." (Note that Thompson has for years stood as the earliest of raspberries, red or black).

Ohio Experiment Station, Wooster, Ohio

The King raspberry is fine indeed. Large, firm, beautiful color and prolific. It is far ahead of Loudon or Miller here.

PROF. W. J. GREEN.

We cannot too highly recommend this grand early berry. It is the only early berry that unites large size, bright and beautiful color, firmness, and high quality and productiveness, vigorous growth, and hardness of cane. It has been planted in field culture in various parts of the country and we have yet to hear anything but praise for it. We will have a good supply of plants to start the season with, but the demand is going to be heavy, and it will be well to place your orders early. **10c., each; 6 for 50c.; 14 for \$1.00.**

New Giant Raspberry, Cumberland—It is the universal verdict of all who have tried the Cumberland that it is the largest, finest flavored and most productive Black Raspberry they ever saw. It has been thoroughly tested by many fruit-growers for several years, and is sold with the full assurance that it is the most profitable and best market sort yet produced. It is an enormous bearer, the berries are of immense size, and most excellent quality, and always bring the highest price. The vine is a strong, vigorous grower, and entirely hardy, makes no suckers, roots from tips and is one of the most valuable kinds, both for market and family use. **10c., each; 6 for 50c.; 14 for \$1.00**

Mersereau Blackberry

The cardinal properties of the Mersereau are great size, luscious flavor, great hardiness of cane and great productiveness. But these are not its only merits. In hardness it is doubtless without an equal among blackberries, having endured a temperature of twenty degrees below zero and was not injured in the least, even at the tips, although Snyder and Taylor's Prolific were much damaged. Just how low a temperature it will withstand uninjured it is not known. The berries are sparkling black throughout, and what adds great value to it, as a market berry, it remains black after it is gathered. In quality it is so exceptionally sweet, rich, melting and luscious, being without core, and the seedy character of Snyder and most other ironclad sorts also being absent, that a shortcake being made of it, after the manner of strawberry shortcake, is even more delicious than any made from strawberries. As a shipper and keeper it is unsurpassed, being firm and does not "bleed" in handling. The canes are of exceedingly strong, upright habit, attaining, upon fairly good soil, a height of eight feet, if permitted to grow unchecked, and are so stout as to remain erect without staking; foliage large, abundant, and entirely free from rust or blight. Its yield is simply enormous, affording heavy pickings from the first until the crop is all matured. Its season is early to midseason, ripening with the Snyder—in advance of Kittatinny, Lawton, Taylor's Prolific or Erie.

One thousand dollars per acre per annum is the record of Mersereau; for it has yielded 12,000 quarts of berries per acre, which sold at an average of 10 cents per quart. Allowing \$200 for picking and marketing, the returns were \$1,000 an acre.

**Strong plants 10c. each; 6 for 50c.; 14 for \$1.
Per hundred, \$5; per thousand, \$45.**

SELECTED HARDY GRAPES

There is scarcely a yard so small, either in country or city that room for one to a dozen more grapevines cannot be found. They do admirably trained up the sides of any building, or along the garden fences, occupying but little room and furnishing an abundance of the healthiest of fruit. Make the soil mellow, and plant the vines somewhat deeper than they stood in the nursery. Plant about 8 feet apart by the fence or building. For vineyard, make rows 8 feet apart, 6 to 10 feet apart in rows.

Agawam. (Rogers' No. 15). Large, dark red, sweet. **Brighton.** Resembles Catawba, with richness of the Delaware.

Campbell's Early. An improved Concord; very early. **Catawba.** Red, sweet and rich, with pleasant musky flavor. **Concord.** The most popular grape; succeeds everywhere. **Delaware.** Light red, sweet, sprightly, fine flavor.

Lindley. (Rogers' No. 9). Large, black, good quality. **Moore's Diamond.** Delicate, greenish white with rich yellow tinge. Prolific, early and hardy; of fine quality.

Moore's Early. Large, black; good quality. **Niagara.** Berries large, light greenish white, slightly ambered.

Pocklington. Bunch and berry, large, golden yellow.

Worden. Black, hardy, healthy, of fine quality.

One-year plants 15c. each; any 3 for 35c.; 6 for 50c.; 12 for \$1.10.

Two-year plants 25c. each; any 3 for 60c.; 6 for \$1; 12 for \$1.75.

BANANAS FOR WINTER FRUITING

Everybody has doubtless seen and probably tasted the fruit of the Banana. But very few know that the plants can be grown in the North as successfully as cannae or even corn. They make grand decorative plants grown in large pots, kegs or tubs of rich soil. But they are particularly valuable for open ground culture in the center of beds of foliage plants, moist situations, etc.

Orinoco Banana (var. Sapientum). A grand sort for bedding out; grows very large, producing a magnificent effect. Very hardy, and should be grown everywhere as an ornamental plant. **20c.; 3 for 50c.**

The Rathburn

The fruit grower who desires a blackberry like the Wilson in its palmy days will be delighted with this. To the younger generation we may say there is no other berry of any kind that ever yielded such large profit to growers as did the Wilson Blackberry when it was brought before the public. That was more than thirty years ago; and this grand old sort has, during the many years of its existence, become enfeebled and is afflicted with the infirmities of old age, such as lack of hardiness of cane, double or rose blossom, etc. Rathburn comes to us from Western New York, and is harder in cane than Wilson. It is evidently a seedling of the Wilson and has all the vigor and productiveness of the Wilson in its youth and with berries equally as large, beautiful and firm, ripening at the same time as its supposed parent, and with all its good qualities of keeping and shipping. To describe it in brief, its berries are extra large, globular, glossy, jet black, acid and not of the highest quality, but exceedingly firm. Canes vigorous and hardy, free from disease, and so wonderfully prolific that they are frequently weighed to the earth with fruit. Its season is early—in advance of all except Kenoyer, Early Harvest, and other similar extra early varieties—and it matures its entire crop quickly. Its fruit is so firm it will endure shipping farther and keep in good condition longer than any other variety; never turning red after gathered, as with a number of otherwise good market sorts. **10c. each; 6 for 50c.; 14 for \$1.00.**

EARLY KING

EARLY KING. An extra early and exceedingly hardy variety of great merit. Canes of strong growth, as hardy as Snyder, and very prolific. It is larger and earlier than Early Harvest, and its delicious sweetness renders it of special value for the home garden. It is also free of double blossoms, rust or other disease. It has been thoroughly tested at the North, and has given very general satisfaction. Highly recommended by the experiment stations. Growers coin money on the variety on account of its hardiness, large size and earliness. The only large berry ever grown. Many dealers send out Early Harvest plants for this variety, as the genuine stock is very scarce. Our plants are fine and true to name. Be sure to add it to your collection. Price, **10c. each; 6 for 50c.; 14 for \$1.00.**

\$8,000.00.

CRANDALL TREE Currant

A VERY important new fruit. It attains a height of 7 to 9 feet, branching freely, shoots often growing 4 or 5 feet in one season. It bears an enormous crop every year of large black fruit the size of a grape, which is

in quality entirely unlike any other black currant, as it has none of the odor or disagreeable flavor common to black sorts. On the contrary, its quality is very fine indeed, and is not excelled for cooking in any form, either for pies, jam or jelly. Its flavor is that of the Sweet Currant combined with the acid of the Cherry Currant. It will bear the second year from cuttings, and will yield a big crop in proportion to its size. It begins to ripen the middle of July and continues to the middle of August. Fruit hangs to the branches for a long time after ripening. The Currant worm does not infest this sort, and it is, in fact, entirely exempt from all insect ravages. It is perfectly hardy, and will stand the most severe climate without a particle of injury in any respect. Price of strong, healthy plants, **20c. each; 3 for 50c.**

COPYRIGHTED 1888
BY A. BLANC

Crandall Tree Currant

Fay's New Red Currant.

FAY'S NEW RED CURRANT

The Best Market Currant in Existence

Extra large stems and berries, uniform in size, easily picked, exceedingly productive. No variety ever made as quick a jump into popular favor, the demand most seasons being in excess of the supply. Strong plants 10c. each; 3 for 25c.; 7 for 50c.; 15 for \$1.00.

PRIVET FOR HEDGES

Nothing makes so fine a hedge as the California Privet which is perfectly hardy and almost evergreen as its beautiful bright shining dark green leaves do not drop until nearly spring. Set plants 1 to 2 feet apart and trim to any height desired.

Privet

Hedge will be so dense that a chicken can hardly get through it. Beautiful and neat at all times. Will grow to any height desired from 1 foot to 15. Fine stock 12 to 18 inches, **60c. per doz.; \$4.00 per 100; \$30 per 1000.**

NEW TREE STRAWBERRY

This is one of the most beautiful fruits ever seen; berries the size and shape of the largest strawberries; bright; rich, shining scarlet, with an exquisite bloom; makes lovely jams, jellies and tarts, having a delicious flavor entirely different from any other fruit; bears the first season and gets larger and stronger every year. It came from Japan, and was tested for two years here. The bush grows from 18 inches to 2 feet high, is entirely hardy and will do well everywhere, regardless of heat and drought. All lovers of new fruits should give it a trial. **Strong Plants fruits first year, 10c.; 7 for 50c.; 12 for 75c.**

Tree Strawberry Seed germinates very quickly and soon produces fine plants which will fruit the second year. **Per Pkt., 5c.**

NEW WHITE BLACKBERRY ICEBERG.

Another season's experience with it has only the more thoroughly confirmed our good opinion of the Iceberg Blackberry. No one should judge of it from the unsatisfactory qualities of the White Blackberry heretofore known, for they have been of interest as curiosities only. In the Iceberg we have a berry above the average of other kinds in size and flavor, equalled by only a very few in hardness and productiveness, and absolutely unequaled by any in handsome and attractive appearance. We especially recommend the Iceberg as a dessert fruit. What could be more enticing and appetizing, as well as delicious, than a dish of these transparent, crystal-like berries, suffused with yellow cream? No blackening of the teeth and lips in eating this snowy fruit. The Iceberg is one of the very earliest varieties, ripening its first fruit in latitude of Western New York as early as July 6th to 8th, being more than a week ahead of Taylor. The fruit is of a good size, usually not less than 1 inch in length when fully developed, thus being rather above the average of other varieties in this respect. Like other Blackberries, the Iceberg has a slightly bitter flavor if not thoroughly ripened, but when fully ripe the flavor is sweet and pleasant. There is no hard core, as in many other sorts; in fact, no core is perceived in eating them—all is sweet and delicious. In this point the Iceberg is unsurpassed by any other variety with which we are familiar. The berries are borne in splendid large clusters, and so freely that the canes are often bent over nearly to the ground. **Strong Plants, 10c. each; 3 for 25c.; 7 for 50c.; 12 for 75c.; \$5.00 per 100.**

EVER-BEARING STRAWBERRY “PERPETUAL”

This is really the first true ever-bearing large fruited Strawberry ever offered. We quote the introducers of this grand fruit as follows; “During last season we had it at our grounds, and a bounteous crop of splendid fruit has been gathered on these plants up to October.” And we—on our own grounds, at Floral Park—gathered fruit as late as November 1st. The flower stems are produced in succession from May to October, and as they have an abundance of fruit, some support for them is almost necessary. The fruit is of good size, dark red in color, solid, firm, very juicy, and of elegant quality. Early runners, planted separate during Summer, have also produced a very good crop the same Autumn. The Department of Agriculture writes that it is the only true ever-bearing variety of merit yet introduced. It also obtained a first-class certificate from the Societe Nationale d’Horticulture de France. **Strong Plants, fruit first year, 6 for 25c.; 30 for \$1.00; \$2.50 per \$100.**

PLEASE NOTE.

The fruit garden is an indispensable part of any rural home. It is a delight, a satisfaction, a convenience, a profit, and a source of the most healthful and delicious food supply any family can have. Beginning with the Strawberry in May, the supply is never exhausted until the last winter apples are used in May or June.

FULLER'S BEST SMALL FRUITS

JAPANESE WINEBERRY

Japanese Wineberry

DOWNING

THIS grand new fruit is the greatest novelty of the age, and universally conceded to be one of the most valuable introductions. It belongs to the Raspberry family, is a strong, vigorous grower, attaining the usual height of a Raspberry, and is perfectly hardy in all situations, needing no protection. The fruit is borne in large clusters, often 75 to 100 berries in a bunch. The flavor of the fruit is entirely different from any other berry, being very sprightly, sweet and juicy. It retains its fresh, sprightly flavor after being cooked and for cooking in any form there is nothing which can compare with it. Fruit ripens in July and continues in bearing for a long time; very prolific. Price—First class vigorous plants for fruiting first year, by mail post-paid, **15c. each; 5 for 50c.; 12 for \$1.00.**

Seed. The Wineberry grows freely from seed and produces strong, vigorous plants, which fruit abundantly the second year; per pkt., **10c.** To get seed to germinate freely, allow the soil in which it is sown to freeze. Fall is the best time to sow seed.

GOOSEBERRIES

A good soil, thorough pruning, top dressing with manure, are the essentials for a crop of gooseberries. For worms, use Paris Green or White Hellebore. For mildew, Potassium Sulphite, one ounce to four gallons of water.

PEARL. This is a very desirable American variety—a cross between Houghton and one of the large English varieties. It is very hardy, entirely free from mildew, superior in size and quality and more productive than the Downing, and is likely to supersede this standard sort. From the many flattering testimonials of this new berry from most of the leading horticulturists we have pleasure in recommending this variety for small or extensive planting as one of the best berries of recent introduction. Price, **20c. each; 3 for 50c.; 7 for \$1.00.**

DOWNING. A large, handsome fruit, green in color; fine flavor, immense cropper, and always in demand at fancy prices. American variety, free from mildew; bush strong grower; wood thick and strong. Price; strong plants, **20c. each; 3 for 50c., 7 for \$1.00.**

HOUGHTON. Berries medium under ordinary care, but if thinned thoroughly in fall or spring fruit will be greatly improved. Color, pale red; tender and good; plants make a spreading growth of rather slender wood; enormously productive. Price, strong plants, **20c. each; 3 for 50c.; 7 for \$1.00.**

FULLER'S VELVET LAWN GRASS SEED THE BEST IN THE WORLD

The velvet mixture contains all of the very best varieties of grasses suited for the purpose of making a lawn beautiful in appearance, durable and lasting and which will stand the frosts of winter and the hot sun of summer, showing a deep, rich green at all seasons. We make only one mixture of this velvet lawn grass, and it can be sown with equally good effect on terrace, polo, tennis or park grounds, while it is especially adapted for a beautiful home or residence lawn. The seed used is pure and heavy and especially cleaned, and the finest ever offered. **By mail postpaid, 1 qt., 25c.; 2 qts., 40c. By express, purchaser paying charges, 1 qt., 20c.; 2 qts., 30c.; 4 qts., 50c.; peck, 90c.; 2 pecks, \$1.75; bushel, \$3.00.**

"Bonora"

The Greatest Plant Food Ever Discovered

Results from only one or two applications are beyond description. It will make plants bloom that have never flowered before. Plants that are withered, yellow and almost dead will become vigorous and thrifty by using "Bonora." This wonderful discovery is good for all living plants, indoors or out, lawns, shrubbery, vegetables, fruit and shade trees, etc. It invigorates, promotes the growth, increases the crop and causes it to mature earlier, producing a lasting and healthy growth. It encourages and retains moisture thus enabling the plant to withstand drought. Sold in condensed form and is used by dissolving in water.

Paper Flower Pot.

PAPER FLOWER POTS

Here we offer flower pots made from Naponet waterproof fabrics. They are very light, durable, unbreakable, cheap and of terra cotta color.

How to Grow Your Flowers Successfully

WHEN you buy flowers from us, you are anxious to make them grow and bloom. And we are just as anxious as you are, because your success is ours.

Many people do not know what to do with a plant when it is received—what kind of soil and how much water to give, whether it requires sun or shade and the dozens of little things that make for success. For that reason, we have made arrangements whereby we can supply our customers with a monthly magazine devoted to home flower-growing. This magazine is *FLORAL LIFE*. It tells all about how to plant, prune and water, how to destroy the insects which infest plants, and of the soil and fertilizers which give the best results. Its contributors are all practical flower growers who have had experience with the plants of which they write. They use only simple language, so that anyone can understand it.

We have carefully examined *FLORAL LIFE* and can recommend it in the highest terms. In fact, we urge everyone of our customers to get *FLORAL LIFE*, and to make it easy for them to do so, we make the following offer:

1 PLANT IVY LEAVED GERANIUM, Price, 15c.	1 PLANT HIBISCUS, - - - - - Price, 15c.
1 " SWEET SCENTED " " 15c.	1 " CUPHEA CIGAR PLANT " 15c.
1 " WEEPING LANTANA " 15c.	1 " PARROT'S FEATHER " 10c.

And *Floral Life* for one year 50c. The value of above collection \$1.35, which we will send postpaid for 50c. Net. No Discount Allowed on the Above Collection.

KILLS

Sulpho-Tobacco Soap

INSECTS

Sulpho-Tobacco Soap A WONDERFUL INSECT AND BUG EXTERMINATOR

Gives best results in quickly exterminating all insect life on plants and flowers, in and out of doors. Effectively destroys Squash and Potato Bugs, Currant Worms, Lice, Green Fly, Mealy Bug, Red Spider, etc. Unexcelled for spraying shrubs, fruit trees and vines. For domestic purposes it rids the house of cockroaches, and is a superior wash for dogs and all animals. Prevents poultry lice. This popular insecticide never fails to give satisfaction. It is cheap, clean, harmless and non-injurious to the tenderest growth. You cannot afford to be without **SULPHO-TOBACCO SOAP**, if you desire to be successful in plant culture. A trial will give highly gratifying results.

3-oz. cake makes 1 1-2 gallons prepared solution, 10c.; mailed.
8-oz. cake makes 4 gallons prepared solution, 30c.; mailed.

OUR GREAT SURPRISE COLLECTION

Many Dollars' Worth of Fine Plants, Bulbs and Seeds for \$1.00

WE are obliged to grow enormous stocks of all kinds of Plants and Seeds, generally more than is necessary, to make sure of having enough. It is our custom after the heavy spring business is over, in May, to take this surplus stock of Novelties and various good things, make it into "Surprise" Collections, and offer same to our customers, giving them four or five times the value of their money. In fact, the "Surprise" is the great amount of fine things one gets for the money paid. These collections will be ready about the middle of May, and will be entirely of our own selection, from kinds of which we have a surplus. No collection will be made up for less than ONE DOLLAR, and from that up to any amount the purchaser may desire. They will be sent free, by mail, unless desired by express, and in that case we can send very much more for the money than by mail. We advise our friends to invest one dollar or more in this collection. We guarantee that they will be greatly pleased. The collection this year will be much larger and finer than ever before.

A 95-page Book on "House Plants" for 15c.

A Valuable Book on Plant Culture. Scores of books and booklets there are on this subject, but it has been reserved to our author to write a text book, the result of her own practical experience, that faithfully followed, will enable every lady to keep her home delightful with dainty and fragrant flowers the year through. The volume is written by a woman for women, in plain concise language easily understood, and the book has the special merit of giving directions which can be readily followed, the methods prescribed being of the simplest, and the material suggested to be used easily within the reach of all. Price, 15c., postpaid.

OUR FALL CATALOGUE FOR 1908

Our Illustrated Catalogue of Hyacinths, Tulips, Narcissus, Crocus, Scillas, Freesias, Crown Imperials, Snowdrops, Alliums, and all Hardy Bulbs and Plants, for fall planting and winter blooming, will be sent to our customers the first of September. It will also be sent free to all who apply. Address all orders and other communications to

STERLINGWORTH

Plant Food Tablets

Contain Nitrogen, Ammonia, Phosphoric Acid and Potash.

A New, Scientific, Odorless, Concentrated Fertilizer for Potted Plants and Vegetables

Takes the place of liquid manure. Used by dissolving in water. By being wholly soluble they start the plants at once into healthy and vigorous growth and make them grow and bloom luxuriantly. These Tablets drive troublesome insects and worms from the soil.

They are odorless, non-poisonous, uninjurious and are clean and easy to handle, and owing to their concentrated form are far superior to other plant fertilizers which are composed largely of waste material and useless filler. If your plants are not doing well, try **Sterlingworth Plant Food Tablets**, and see how quickly they are benefitted.

Trial size box, sufficient for 10 house plants for three months, 10 cents, postpaid. Regular size box sufficient for 35 plants for 3 months, 25 cents, postpaid.

Address all orders to J. ROSCOE FULLER & CO., Floral Park, N. Y.

Great Vegetable Novelties

TOMATO EARLY LONG ISLAND

Our New Market Gardener's Everbearing Tomato

Ready for market July 15, and will continue to bear until frost. A bushel of tomatoes to a plant. Crop never fails. Fruit solid and will stand a week's journey without crushing. Never rots, never cracks. Absolutely smooth and no core.

Early Long Island. Having tested at one time or another nearly every variety offered by seedsmen, we confidently claim that there is no better variety than this for general market or family use. We speak emphatically because we have given a great amount of time perfecting our stock, and know that for smoothness and regularity of shape, uniformity of size, color and freedom from rot or cracking, **Early Long Island** is unsurpassed. Its first fruits are very early, but the vines continue to bear for a long time. Vines large, with large, dark green leaves, vigorous and wonderfully productive, being under high culture one of the heaviest croppers; fruit medium sized to large, and, unlike most varieties, grows larger as the season advances; perfectly smooth, solid, but without a hard core; deep rich red color, and of excellent flavor. Try it and you will never plant any other variety in the future. Pkt. 10c.; $\frac{1}{2}$ oz. 25c.; 1 oz. 45c.; 2 oz. 75c.; $\frac{1}{4}$ lb. \$1.40; $\frac{1}{2}$ lb. \$2.60.

NEW LETTUCE. Early May King. (See back cover.)

This valuable new lettuce from Germany is, without any question, one of the best lettuces on the list. For early spring planting in the open ground it is unequalled. Extremely hardy, it is very quick growing. The plants grow six to seven inches in diameter, with the outer leaves so closely folded that the plant is practically all head. Of rich buttery substance, the outer leaves are light green slightly tinged with brown; the inner leaves are bright yellow, and of a specially fine rich buttery flavor. The round compact heads are very solid, so that they will carry well to market; they weigh from 12 to 16 ounces. Per Pkt., 5c.; oz. 15c.; $\frac{1}{4}$ lb. 45c.; per lb. \$1.50.

FULLER'S GIANT RHUBARB, or IMPROVED EVER READY

The Greatest Money Maker

We have for the past few years been making a careful selection from the old Ever Ready and have at last succeeded in growing one that is a great deal earlier and better flavor, in fact better in every way, that we do not hesitate to offer it, knowing that it will give better satisfaction than any Rhubarb grown to-day. It is extremely early; last spring, although it was a very cold spring, and without any protection whatever, we were picking it for table use early in April right in the open ground.

In the Southern and Pacific States it may be used all the year round, requiring only water in dry localities to keep it growing. It is particularly fine in winter. Color, bright crimson, except new stalks on young plants. It forces readily in the greenhouse or cold-frames, and will become popular and very profitable in the North for this purpose. For winter growing in the Southern and Pacific States for shipping to Northern markets it will prove to be a great thing. In quality it is simply superb, fully equal in flavor to the finest berries. The stalks are not so bulky, soft and watery, as most other kinds and the skin is so thin and tender that it is not necessary to remove it, and when cooked a beautiful crimson-colored sauce is the result, looking, as well as tasting, like berries. Flavor sprightly and refreshing, combining that of the raspberry and strawberry, but greatly superior to either as a cooked fruit. In fact, it makes the most delicious sauce and pies we have ever tasted, while its beautiful color when cooked makes it exceedingly attractive and appetizing. It is a rapid and perpetual grower, forming new crowns continually, and is rapidly increased by division; robust and perfectly hardy anywhere. It will stand frosts which would destroy any other sort. This new rhubarb has qualities which will make it as freely used as any of our standard fruits or vegetables. Large fortunes will be made in growing it for market, and those who start first will reap the greatest harvest. Set the plants $2\frac{1}{2}$ by 6 feet apart. We have the only stock in the world and will sell strong roots at the low price of 25c. each; 3 for 60c.; 5 for \$1.00.

It will also grow fine from seed of which we have a large quantity. Per pkt., 10c.; 3 for 25c.

Fuller's New Pineapple Flavored Strawberry

This new variety, from the past season's test at our fruit farm, and from the tests of other years, demonstrates the fact that it is a strong grower, wonderfully productive, producing its blossoms on strong stems and the fruit in large clusters. The berries are of large size. The quality is superior, having a rich pineapple flavor. Berries separate from the hulls easily. On light and medium to heavy soil it is giving good results, yielding a big crop. For the home garden and for market within twenty-five miles it promises to be a valuable addition to our list of favorites. Don't fail to plant it. The best of all new kinds. It is seldom that a strawberry is of superior quality and yet profitable as a market berry. We can recommend it as valuable for market as well as for home table. We have seen it growing in different localities, and different soils during the past five years and are satisfied that it is a variety of great value, not only for its remarkable productiveness and vigor of growth but also for its superior quality. After eating this variety many others will seem insipid.

Strong plants, 50c. per 12; \$3.00 per 100. Plants ready for shipment.
